WC Docket no. 10-90
Response to FCC orders on Sandwich isles Communications

Dear FCC Commissioners,

Please keep Sandwich Isles Communications' (SIC) study area waiver. Their waiver is critical for the Hawaiian Home Lands. SIC is the only company that can and has brought Universal Service Funds to Hawaiian Home Lands. They are also the only company that has used the funds for the intended purpose. Mobi and Sprint were given hundreds of millions of dollars to build, maintain and provision wireless service to Hawaiian Home Lands. They build ZERO infrastructure on Hawaiian Home Lands. To this day many of the Home Land areas have poor cellular coverage. When the money ran out Mobi and Sprint ran away. Mobi was allowed to sell their network that was built with stolen money. Those monies were stolen from the Homesteaders who were the intended beneficiaries of the federal funds. The FCC has allowed two companies to steal federal funds and use them for whatever they please but they are hounding SIC for building needed infrastructure, maintaining the infrastructure and providing services that no other phone company has provided. That makes no sense. Threatening to take away SIC's study area waiver is just another irrational act by the FCC. I request that the FCC start protecting the federal funds that were intended for us rural resident by keeping SIC's study area waiver as is. Keep SIC around so that we may be served by a company that uses the federal monies for their intended purpose.

Sincerely,

Mateo Kihilaau
