June 8, 2017

Dear FCC,

I am writing to request that dockets 17-79 and 15-180 are not passed as it would be a violation of the human right to health. If this technology is placed in my neighborhood, I will in all likelihood have to leave my adapted apartment for health reasons and will have no safe place to go. I will be homeless again due to the harmful biological effects of pulsed radiofrequency microwave non-thermal non-ionizing radiation. I am disabled by sensitivity to electromagnetic fields.

(see also the attached pdf "Symptoms from RF/EMF log")

Everywhere pulsed radio frequency microwave non-thermal non-ionizing radiation is installed becomes inaccessible to me. I will say this again, pulsed radiofrequency microwave non-thermal non-ionizing radiation is an accessibility barrier to an ever increasing significant portion of the global population, not just me.

(see also attached pdf "Tarragona")

There are many people suffering from this and many who are not yet aware of the cause of their symptoms. As more and more people are overexposed to pulsed radiofrequency microwave non-thermal non-ionizing radiation, more and more people are becoming sensitized to it. This technology is not safe and is directly contributing to health problems plaguing our nation and the world. The current limits are inadequate and based only on thermal effects.

(see also the attached pdf "Irradiated")

Sincerely,

Rebecca Carol Smith
