Leased Access Channels are the only "public service" these mostly monopoly, very profitable cable companies perform. Fees here in NY are also high and discourage use by people with no way to make money like public Education activists. Please stop the cable industry from raising rates - support non commercial rates for Leased Access

Re - Comments in MM Docket 92-266

I live in an area (Lehigh Valley PA) with no public access. I belong to several non profit groups & none of our videos can be shown. Our Public T.V. station doesn't show local independent productions. I had one video shown on cable as part of a student showcase. Special non profit leased access rates could help us alot
