JANUARY 30 1993

THE HONORABLE CAROL M. BRAUN
UNITED STATES SENATE
HART BLDG ROOM 708
WASHINGTON D.C. 20510

SUBJECT: NOTICE OF PROPOSED RULE MAKING
[illegible]

Honorable Carol M. Braun
U.S. Senate
Wash. D.C. 20510.

136194

Dear Honorable C.M. Braun

I am very concerned about the proposed rule that is currently under consideration by The FCC. P.R Docket - # 92-235. If adapted the new rule will greatly endanger and reduce the use-ability of Radio frequencies currently - assigned for Radio Controlled Model - Airplanes... which will increase the risk of accidents and liabilitys by having the frequencies to close.

Please help me and my children. To continue my hobby safely!

Please Do Not allow The F.C.C. To carry out The proposed P.R. Docket 92-235 for The 72-75 MHZ. Band Width.

Thanks you Gratefully yours
Frank Kotlarz

U.S. Senate
Washington, D.C. 20510

136179

Dear Senator Mosley-Braun

I am a retired nurse who teaches part-time. One of my hobbies is R.C. helicopters. My husband flies RC airplanes. Together we spend many enjoyable hours with this pastime. Our equipment represents many thousands of dollars. Now our hobby is being threatened by a proposed FCC ruling. We go to great lengths to assure the safety of the operators and

safe enjoyment of my pastime by not allowing the FCC to carry out proposal PR Docket 92-235. for the 72-75 MHZ band. We all need your help urgently because the FCC has a deadline of February 26, 1993, after which it may become more difficult to avoid

Dear Senator Mosley-Braun 007340 APR-2 93

I am writing you to ask you not to support the proposed FCC rule changes in NPRM-PR Docket 92-235.

I am an avid R/C aircraft enthusiast. My whole family (four children and wife) are also involved, especially my eldest son and daughter (11+13) (My daughter wants to be an astronaut and is very interested in physical science.)

The FCC rule change would allow commercial businesses of cellular phones + pagers to emit strong radio interference to the aircraft R/C channels. What particularly irritates/concerns me is that the AMA (Academy of Modeling Aeronautics) and the FCC made important changes in 1991 requiring all [illegible]

135735

The Honorable Carol Moseley Braun

I am a resident of Illinois, currently residing in Hoffman Estates. The reason for this letter is to express my concern over the new proposed rule making (NPRM-PR Docket 92-235) by the Federal Communications Commission.

I am a member of a local club, and we share a public park, for operating are model air planes. We and other clubs have contests May through September. My self and others fly year around. I enjoy building and flying my model air planes, which weigh anywhere from 4 to 8 pounds and operate at speeds well over 45 M.P.H. In some of our local contests most of the air planes fly considerbly much faster.

The proposed massive frequency restructing will put frequencies with in 2.5KHz of the radio control model frequencies. Interference will occur, according to the information I just recieved and render my transmitters and most other radio control (R/C) model frequencies unusable. I hope this restructuring isn't implented in our model frequency band, it surely would be derasting to the hobby. Thank you for your time.

Sincerely Yours

Niles Bosh

FEB. 14, 1993

con/ RTR Docket 92-235

SENATOR C.M. BRAUN:

I AM VERY CONCERNED ABOUT PROPOSED RULES THAT ARE CURRENTLY UNDER CONSIDERATION BY THE FCC REGARDING PR DOCKET 92-235

IF ADOPTED, THE NEW RULES WILL GREATLY REDUCE THE USABILITY OF FREQUENCIES CURRENTLY ASSIGNED FOR MODEL USE AND INCREASE RISK OF ACCIDENTS AND ATTENDANT LIABILITY FOR CONTROLLING MODEL AIRPLANES.

PLEASE HELP ME CONTINUE THE SAFE ENJOYMENT OF MY PASTIME BY NOT ALLOWING THE FCC TO CARRY OUT IT'S PROPOSALS FOR THE 72-76 MHZ BAND.

SINCERELY
BOB

Dear Senator Braun,

My name is Gerald M Supinski AMA# 183931. I am writing about P.R. Docket 92-235 and its existence.

I am curious if you know of its impact, if it is allowed to go through?! This P.R. Docket 92-235 would eliminate half of the channels assigned to the Radio Control Hobbies. Radio Control is a 10 Billion Dollar international industry, supporting thousands of workers and their familys. R.C. is a Hobby which attracts many people of all ages and walks of life. R.C. attracks many younger people which gives them another interest other than gangs and drugs.

Eighty percent of all pilots and aeronaugical engineers become interested as R.C. Hobbiists, Even the Scientists during WWII, while Designing and Building the Atomic Bomb used R.C. planes as a relaxing hobby at the Argon Labortory.

The number of locations where R.C. Planes are allowed to operate are limited. It seems unfair that the serving of a few, if this rulings

passed, it would render more than half of the R.C. equipement unusable. Because we stress Safty so Highly that the R.F interfuence would be like putting the sidewalks between the Lanes of an interstate highway.

I remind you that if P.R Docket 92-235 is passed there would be thousands of people unemployed, and many more unhappy people looking for another hobby, outlet, passtime, or way to spend the billions of dollars, now being put into the Economy supporting small businesses through R.C.

Member of Suburan Aero Club
AMA #274

Hopefully,
Gerald M Supinski

Washington, D.C. 20510

Re: FCC Proposed Rule making
PR Docket 92-235

Senator Moseley-Braun:
As a retired person, one of my greatest pleasures is derived from the building and flying of radio controlled planes. I belong to the Suburban Aero Club of Chicago, which is only one of many such

injury and property damage liability for all parties involved.

Conceivably, this could result in the death of our hobby countrywide, which I understand is a 10 billion dollar plus a year industry.

I sincerely ask that you give this proposal your serious consideration, and vote against it. Please allow me and the many thousands of flyers to continue to enjoy our sport, and the Chicago area to continue to benefit monetarily from the commercial manufacture and sale of the products used by our membership.

Respectfully yours,
Van W. Fowers

Dear Senator Braun, 93 APR -5 AM 7:56

My name is Maureen McGrail I am 30 years old and the mother of two children. My husband and I both work hard to give our children thing they need & want. I am writing to you about my eight year old son's hobby. He loves R/C cars, he also works hard for his money doing chores and saving birthday & Christmas money to buy his own R/C car. It took Dan about a year to save $70 for a car & radio. Now seventy dollars may not seem like much to you, but it is a lot to an eight year old boy & his parents.

I am very concerned about the proposed rule that is currently under consideration by the F.C.C. The proceeding is P.R. Docket 92-235. If adopted the new rule will greatly reduce the usability of frequencies currently assigned for R/C models, and

frequencies available to us, eliminating safe use of at least 31 of the 50 channels on the 72 MHz band and 10 of the 30 frequencies on the 75 MHz band now used by Hobbyists. In fact, more channels will likely be affected.

When we operate our R/C models we go to great length to assure the safety of the operators & bystanders & the protection of property. I don't think it is wise of the FCC to seek to expand the operation condition of land mobile radio users at the expense of the radio/control modeler, or its safe operation. The FCC may not think we are as important as business users of radio, but we have a considerable investment in our models & in our radio equipment. It is a sizeable industry that must be saved from these detrimental FCC actions. The hobby provides many hours of enjoyment to hundreds of thousands of people like my son and contributes to the advancement and development of the commercial aviation industry.

This may also affect my job because I work in a hobby shop and the main stay of the business is the year round selling of R/C models, radios & equipment. If these band are rendered useless then the shop could end up closing.

Please help me continue the safe enjoyment of my son's pastime & my job, by not allowing the FCC

136176

Jan 25, 1993.

TO: HON. PAUL SIMON (D.),

FROM: RADIO CONT. MODEL AIRPLANE FLYER

SUBJ: PR DOCKETT 92-235

Dear sir: As a retired Chgo. police officer I have been building and flying radio controlled model airplanes for the past three years and find it a pleasurable and rewarding pastime. (also expensive. as I have six radio's)

I understand this proposed frequency allotment may cause a danger and a problem in our flying. I hope you will investigate and take the proper action to see that this allotment will not be allowed if it is going to cause a problem.

(over)

myself and many others who rely on this spot as a pristine will not be lost.

thank you
Ronald Lund

Could you please respond as to any action taken.
