Dear Ms Dortch:

In compliance with the filing requirements associated with, and attached to Form 481, we wish to advise the Commission that Oregon Telephone Corporation provides High Speed Internet service to its customers and:

- Has taken reasonable steps to provide upon reasonable request broadband service at actual speeds of 10 Mbps downstream/1 Mbps upstream;
- Provides latency suitable for real-time applications including VoIP and usage capacity which is reasonably comparable to those in urban areas and;
- That reasonable requests for service are met within a reasonable timeframe.

If there are questions, I may be contacted at 541-932-4411.

Sincerely,

Delinda Kluser
Vice-Pres, Manager

Oregon Telephone Corporation
2016
PROGRESS REPORT ON SERVICE QUALITY IMPROVEMENT PLAN

PREAMBLE

This document is an integral part of the Company's 2016 Annual Report, as attached to Form 481. It is in compliance with §54.313(a)(1) adopted in the FCC's USF/ICC Transformation Order (11-161) and incorporates all further clarifications identified in subsequent Reconsideration Orders, as applicable, that were in effect at the time the Annual Report was due by Rule to the requisite regulatory authorities.

Oregon Telephone Corporation (OTC) advises that the environment in which the Company operates is dynamic, not static. As a result, certain network targets identified in its initial 5 Year Network Improvement Plan, filed in 2014, may be modified in response to regulatory decisions that have been subsequently adopted, and as their implication upon the Company's financial viability in providing the required services and service level quality became known.

Modifications to the network plan may also have been taken due to changes in technology, vendor-driven support, weather, or emergency related contingencies.

Targets not met or changed since the initial 5 Year Plan filing are identified and reasons provided for those changes.

UNIVERSAL SERVICE SUPPORT RECEIVED IN 2015

Per the Universal Service Administrative Company (USAC), as available for the period up to this filing, OTC has received a total of $4,610,053 for 2015 (as of 06/09/16). The breakdown of the funding for the year is:

- $2,290,099 High Cost Loop Support
- $1,137,822 Connect America Fund-Intercarrier Compensation Support
- $1,144,488 Interstate Common Line Support
- $ 37,644 Safety Net Additive

Universal Service Support funds are used to: 1) maintain, upgrade, and improve the Company's network and, 2) cover operating expenses and debt commitments as necessary to permit it to offer a high level of service for both voice and broadband within the authorized serving area.

USF support will continue to be included in the Company's current revenue accounts and forward-looking projections. Revenues, in the aggregate, are used for both capital expenditures as well as to cover operating expenses and fixed costs incurred to obtain capital from lenders. The Company does not segregate USF separately for purposes of capital and

operating expenditures; USF is expended in the same proportion as the Company's aggregated revenue amount.

The proportionate share of USF expenditures in 2015 for CAPEX is $913,586 (18%); for OPEX $4,076,105 (82%).

In the accompanying 2015 project detail, expenditures for network improvements sometimes involve service quality, coverage and capacity as an integrated improvement project and are not mutually exclusive from one another. In terms of cost, projects involving multiple qualifiers are of equal dollar equivalence. Where a project involves a single qualifier, it is so noted.

PROGRESS REPORT

2015

DC Rectifier and Battery Upgrades: OTC's policy is to upgrade emergency and backup power generation capabilities on a rotating basis. Battery life and years in service are evaluated each year and replacements are completed as necessary. Generators and batteries at each Central Office and batteries at each DLC or remote are all considered. Backup power upgrades of $21,914 were completed during 2015.

Vehicles: In 2015 the Company plans to replace one service truck. Because the Company's service area is so large, by necessity significant miles (an average of 30,000 annually) are put on service trucks in order to serve subscribers. To ensure the safety of employees as well as ensuring serviceable vehicles, the Company replaces most fleet vehicles every five to six years. A new vehicle along with a new bucket truck was purchased during 2015. Total expenditures were $120,400.

Work Equipment: OTC purchased a reel trailer along with a new cable plow during 2015. Total costs were $215,750.

Redundant Fiber Build: OTC was able to construct a redundant fiber path in the Unity exchange area. Additional conduit along with fiber was placed in order to provide another network fiber path. Total cost of this project was $494,679.

HWY 395 Drop: OTC was able to deploy a combination of fiber and wireless equipment to serve customers with both voice and broadband in a previously unserved portion of our MT Vernon exchange. Cost of this project totaled $24,837.

Upgrade Switch and Network: The switch cards allow for more functionality, ease of software upgrades and increased capacity. The virtualization of the network allows for increased service quality for both monitoring and technical support. In the event of an emergency, staff technicians can access the network from anywhere to resolve the issue quickly. The cost of these upgrades was $33,780.
