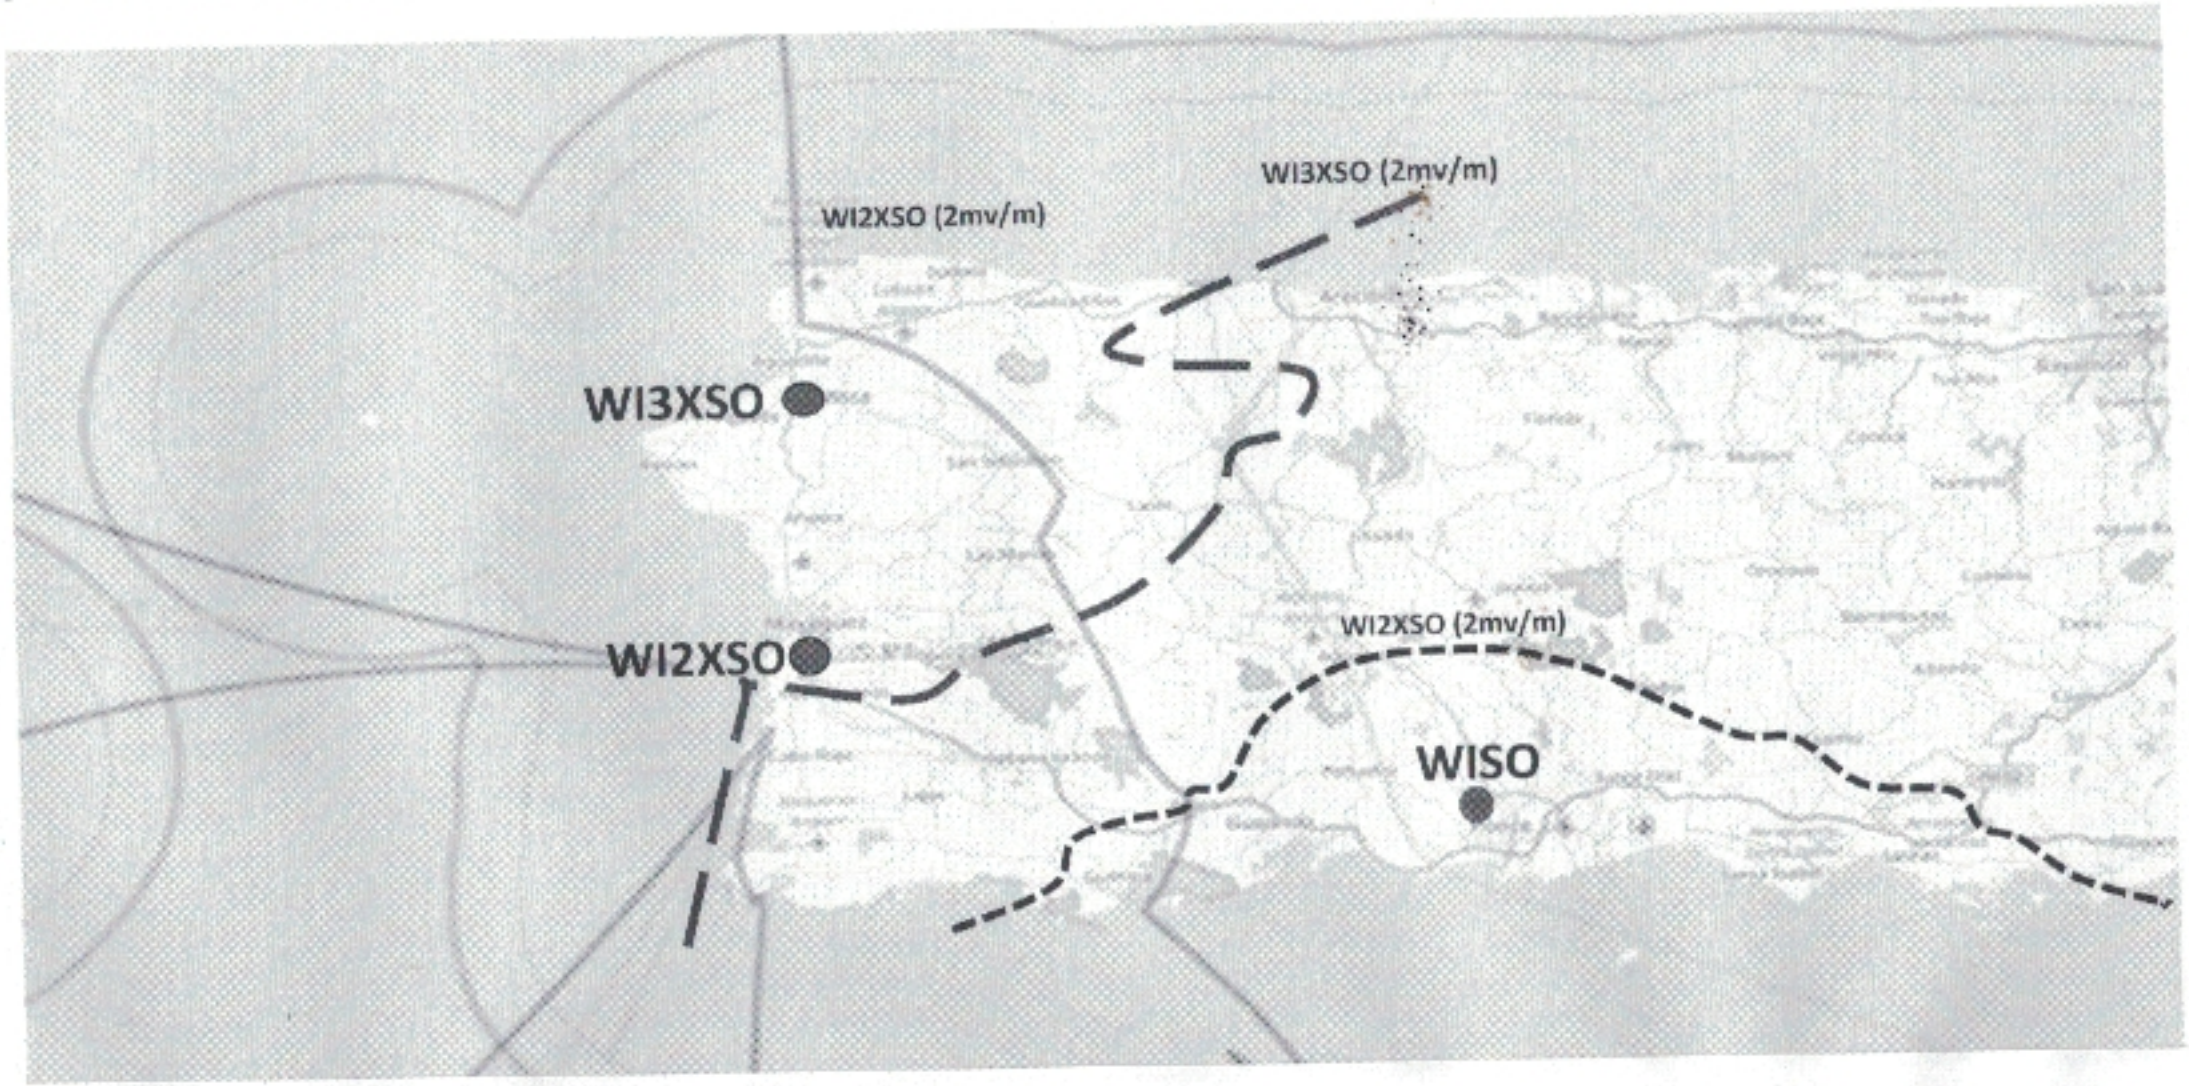
EXAMPLE OF THREE ADJACENT SYNCHRONOUS AM STATIONS SYSTEM OVERLAPING AT THE 2 MV/M CONTOURS MAKING A CONTINUOS AND UNINTERRUPTED COVERAGE CONTOUR:

WISO-AM SYNCHRONOUS BOOSTER SYSTEM – PUERTO RICO

WISO-AM PONCE - WI2XSO-AM MAYAGUEZ – WI3XSO-AM AGUADILLA (1260 KHZ.)



NOTE: This AM synchronous system permits the listener tuning WISO's programing on 1260Khz. uninterruptedly, without any signal gaps, nor annoying interference in a car trip thru main road PR-2 around the NORTHWEST/WEST/SOUTHWEST/SOUTH of the island or at any fixed point anywhere in the compound coverage area of the three am synchronized transmitters on 1260Khz.
