CINGULAR WIRELESS LLC
QUARTERLY E911 IMPLEMENTATION REPORT
FOR GSM, TDMA, AMPS, AND TDMA/AMPS NETWORKS

Cingular Wireless LLC ("Cingular"), by its attorneys and pursuant to the *Orders* in this proceeding,[1] hereby submits its Quarterly E911 Implementation Report for GSM, TDMA, AMPS, and TDMA/AMPS Networks. This Report details the status of Cingular's Phase I and Phase II E911 implementation efforts associated with its Global System for Mobile Communications ("GSM"), Time Division Multiple Access ("TDMA"), Advanced Mobile Phone Service ("AMPS") and TDMA/AMPS networks. The instant Report is limited to updating information that has changed since the filing of Cingular's previous report on October 31, 2003.[2]

---

I. PHASE I DEPLOYMENT

Cingular has worked with the public safety community, including APCO, NENA and NASNA, regarding the deployment of Phase I and Phase II services throughout Cingular's networks. In this regard, Cingular has developed a form to assist in determining PSAP readiness and facilitate Phase II planning.[3]

Cingular continues to make progress in its efforts to deploy Phase I location capability services. To date, Cingular has received 1430 PSAP requests for Phase I service, and 1349 (94.3%) of those requests are in service/in progress.[4] Of the 71 remaining requests, 11 have been withdrawn and 60 are invalid. Cingular previously avoided classifying PSAP requests as invalid to minimize disputes and facilitate deployment efforts. The FCC's new reporting format, however, requires Cingular to classify PSAP requests as valid or invalid.[5] Cingular stresses that

---

[3] *See* Attachment A. This form requests the information deemed relevant by the City of Richardson Order for determining the validity of a request for Phase II service. *See Petition of City of Richardson, Texas,* CC Docket No. 94-102, *Order,* 16 F.C.C.R. 18982 (2001). Item 11 asks if a funding mechanism is in place for the PSAP to recover its Phase II costs. Item 8 asks which equipment the PSAP will use to translate latitude and longitude coordinates into location and address and Item 9 asks if the mapping equipment and software have been installed and tested, along with copies of the applicable order or correspondence. Item 10 asks if the PSAP has requested the necessary facilities from the LEC to enable the PSAP to receive the Phase II data including upgrade to the ALI database and PAM interface with re-query capability, plus a copy of such request. *See id.* at 18982, 18986-87. Even where it appears on the face of the form that a PSAP request is valid, Cingular's experience with Phase II deployment on its TDMA networks indicates that this is often not the case. Cingular has discovered that many PSAPs who appeared to have valid requests were unable to successfully complete end-to-end testing of Cingular's Phase II solution because of readiness problems, including a lack of upgraded PSAP customer premises equipment ("CPE") and a lack of or improper connectivity between the PSAP's ALI database and its CPE. Thus, although Cingular was capable of supplying Phase II location information, many PSAPs were unable to receive the information. *See* Cingular Wireless LLC, Third Quarterly E911 Implementation Report for TDMA, AMPS and TDMA/AMPS Networks, filed Feb. 3, 2003.

[4] Of the 1349 requests that are in service/in progress, 1216 (90.1%) are in service and 133 (9.9%) are in progress.

[5] *See* Public Notice, DA 03-1902, CC Docket No. 94-102, at 4 (rel. June 6, 2003).

classification of a PSAP request as invalid does not necessarily mean that Cingular's deployment efforts have ceased. In most instances, Cingular continues to move forward with its deployment efforts. Specific details regarding these requests, including the specific reasons underlying each request that has been pending for more than six months, are included in Attachment B to this Report.[6]

II. STATUS OF PHASE II IMPLEMENTATION AND DEPLOYMENT PLAN

A. GSM Networks

1. PSAP Requests and Deployment

In accordance with the December 12, 2003 deadline for Phase II deployment, Cingular deployed a Phase II compliant technology at over 2,800 cell sites by that date, giving priority to fulfilling pending PSAP requests. Attachment E lists the PSAPs associated with these cell sites.[7] To date, Cingular has received 657 PSAP requests for Phase II service on its GSM networks. Specific details regarding these requests are included in Attachments B and C to this Report.[8]

In order to ensure that its resources are used efficiently and productively, Cingular weighs the following factors when prioritizing pending PSAP requests for Phase II service: the size of the PSAP/market; the PSAP's status with respect to Project Locate; and the date of the

---

[6] There are four working PSAPs listed on the report that do not have Master PSAP Registry IDs.

[7] Attachment E lists all cell sites deployed by December 12, 2003 and all cell sites installed through January 12, 2004.

[8] Because the FCC's new reporting format does not include all information required by the GSM and TDMA *Orders*, Cingular has attached four spreadsheets: Attachment B contains the information in the format required by the FCC, and Attachments C, D, and E contain all information regarding Cingular's GSM and TDMA networks, respectively, as required by the *Orders*. *See* Public Notice, DA 03-1902, CC Docket No. 94-102, at 2 (rel. June 6, 2003) (noting that "[t]he requirement to submit the attached spreadsheet is in addition to, and does not supercede, the E911 reporting requirements established by the Commission in previous Orders.").

PSAP request. Deployments occur on a geographic basis such that PSAPs in proximity to one another requesting E911 Phase II service will be deployed together. By prioritizing requests in this manner, Cingular serves the public interest by maximizing the number of subscribers and PSAPs provided with Phase II service, while at the same time satisfying the requirements of the *TDMA* and *GSM Orders*.

B. TDMA, AMPS, TDMA/AMPS Networks

To date, Cingular has received 511 requests for Phase II service on its TDMA networks. Of the 511 requests, 421 PSAP requests have been deployed and 79 are in progress. Of the 11 remaining requests, 8 of these requests were invalid and 3 were withdrawn. Unfortunately, of the 421 deployments, 73 PSAPs (17%) *still* are not ready to accept the Phase II data.[9] Many of these PSAPs were unable to successfully complete end-to-end testing of the Phase II solution because of readiness problems including a lack of upgraded PSAP CPE and improper connectivity between the PSAP's ALI database and its CPE. Once the PSAP readiness issues are resolved, Cingular can conduct end-to-end testing of its Phase II solution and the PSAPs will be able to receive and utilize the data elements associated with the E911 Phase II service at the remaining cell sites.

For valid PSAP requests received after September 30, 2002, Cingular is providing its Phase II compliant service to 50% of those PSAPs' coverage areas within six months of receipt of such requests unless a mutually agreed to alternative implementation date has been negotiated.[10] In accordance with the December 31, 2003, deadline for Phase II deployment,[11] Cingular has deployed a Phase II compliant technology at over 6,300 cell sites on its TDMA,

---

[9] Some of these PSAPs made their requests in August, 2000 – over three years ago.

[10] *See TDMA Order* at ¶ 8(a)(9).

[11] *TDMA Order* at ¶ 8(a)(4).

AMPS, and TDMA/AMPS network ("TDMA networks"). Specific details regarding these requests are included in Attachments B and D to this Report.[12] Cingular's Phase II service for its TDMA network meets the Commission's network-based accuracy requirements of 100 meters for 67 percent of calls and 300 meters for 95 percent of calls.

Respectfully submitted,

Attachment A

E911 PHASE II PSAP PROFILE

WIRELESS E911 PHASE II PSAP PROFILE

cingular WIRELESS

Please complete one profile for each PSAP included in the Phase II request under this 911 authority

1. Name of 911 Authority (ex: Orleans Parish Comm. District or Fulton County 911)	2. Number of PSAPs under this Authority

3. Contact Information for 911 Authority

Name/Title: Phone:

Street: Fax:

City, State, Zip: E-mail:

4. Name of PSAP (ex: Fulton County 911 or Hall County Sheriff's Office)

5. Contact Information for PSAP Director/Manager

Name/Title: Phone:

Street: Fax:

City, State, Zip: E-mail:

6. Is PSAP currently receiving Phase I service (call back number and address of cell tower)?

Yes No

If YES, then via NCAS?

7. Type of customer premise equipment or phone system (ex: Positron Lifeline or Motorola Centralink 2000)

8. What equipment will PSAP use to translate lat/long coordinates into location / address?

9. Has the mapping equipment / software been installed and tested?

Yes No If no, order date: Due date:

Please provide copy of order or correspondence

10. Has PSAP requested necessary facilities from the LEC to enable the PSAP to receive Phase II data including upgrade to ALI database and PAM interface with re-query capability?

Yes No

If yes, then provide copy of request

11. Is a funding mechanism in place for the PSAP to recover costs associated with Phase II implementation?

Yes No

If YES, please attach description of funding mechanism.

12. Comments / Notes:

DECLARATION OF EDGAR REYNOLDS

I, Edgar Reynolds, President of Network Operations for Cingular Wireless LLC ("Cingular"), make this declaration in support of the "Quarterly Report Regarding E911 Implementation for GSM, TDMA, AMPS and TDMA/AMPS Networks" filed by Cingular pursuant to the Federal Communications Commission's *Orders* (released May 9, 2002 and June 12, 2003) regarding Cingular's E911 implementation. In my role as President of Network Operations, I oversee Cingular's efforts to provide Phase I location information in response to valid PSAP requests. I have reviewed the Report and declare under penalty of perjury that the information contained therein concerning Phase I deployment is accurate to the best of my knowledge, information and belief.

Executed January 29, 2004

Edgar Reynolds
President of Network Operations
Cingular Wireless LLC

DECLARATION OF WILLIAM E. CLIFT

I, William E. Clift, Chief Technical Officer of Cingular Wireless LLC ("Cingular"), make this declaration in support of the "Quarterly Report Regarding E911 Implementation for GSM, TDMA, AMPS and TDMA/AMPS Networks" filed by Cingular pursuant to the Federal Communications Commission's *Orders* (released May 9, 2002 and June 12, 2003) regarding Cingular's E911 implementation. In my role as Chief Technical Officer, I oversee Cingular's efforts to implement Phase II location technologies. I have reviewed the Report and declare under penalty of perjury that the information contained therein concerning Phase II deployment is accurate to the best of my knowledge, information and belief.

Executed January 29, 2004

W. E. Clift

William E. Clift
Chief Technical Officer
Cingular Wireless LLC

CERTIFICATE OF SERVICE

I, Ernestine Screven, do hereby certify that on this 29th day of January, 2004, a copy of the foregoing "Quarterly Report Regarding E911 Implementation for GSM, TDMA, AMPS, and TDMA/AMPS Networks" was served by U.S. mail, first-class postage prepaid, on the following:

Terry Peters
