Rocky Mountain HealthNet (RMHN)
Pilot Program Participants Quarterly Data Report
Due April 30, 2010 Including Responsive Data Through
March 31, 2009, WC Docket No. 02-60

(Addition/updates made since the last quarterly report are noted in bold blue Arial text.)

1.Project Contact and Coordination Information

a.Identify the project leader(s) and respective business affiliations.

Rocky Mountain HealthNet (RMHN) represents mental healthcare providers in Colorado who are members of the Colorado Behavioral Healthcare Council. (CBHC). This extensive alliance was formed for the purpose of responding to the FCC Pilot Program in an effort to gain access to telemedicine services through a new broadband regional network.

CBHC is a non-profit 501 (c) 3 membership organization that represents Colorado's statewide network of community mental health centers. CHBC member organizations contract with the State of Colorado and work together to provide comprehensive behavioral and psychiatric services to defined geographic areas of the state.

The Project Coordinator is George DelGrosso.

b.Provide a complete address for postal delivery and the telephone, fax, and e-mail address for the responsible administrative official

George DelGrosso
Colorado Behavioral Healthcare Council
1410 Grant St. Ste. A-301
Denver, CO 80203
Telephone 303-832-7594
FAX 303-832-7132
gdelgrosso@cbhc.org

c. Identify the organization that is legally and financially responsible for the conduct of activities supported by the award.

The Colorado Behavioral Healthcare Council (CHBC) is the applicant organization and will bear full legal and financial responsibility for the proposed project.

d. Explain how project is being coordinated throughout the state or region.

CBHC is sharing with a sister Pilot Program participant, the Colorado Health Care Connections (CHCC), the services of a FCC Pilot Program Associate Project Coordinator. No federal USAC funds will be used for this purpose. Program coordination staffing and activities will be carried out using internal resources.

Program coordination will include the leadership, fund-raising, and implementation needed to develop healthcare applications enabled by the proposed network.

2. Identify all health care facilities included in the network.

See attached Addendum A (spreadsheet which addresses items a. and b. below) with information on all health care facilities that were included on our approved 466-A Attachment and Network Cost Worksheet.

a. Provide address (including county), zip code, Rural Urban Commuting Area (RUCA) code (including primary and secondary), six-digit census tract, and phone number for each health care facility participating in the network.
b. For each participating institution, indicate whether it is:
i. Public or non-public;
ii. Not-for-profit or for-profit;
iii. An eligible health care provider or ineligible health-care provider with an explanation of why the health care facility is eligible under section 254 of the 1996 Act and the Commission's rules or a description of the type of ineligible health care provider entity.

3. Network Narrative: In the first quarterly report following the completion of the competitive bidding process and the selection of vendors, the selected participant must submit an updated technical description of the communications network that it intends to implement, which takes into account the results its network design studies and negotiations with its vendors. This technical description should provide, where applicable:

The competitive bidding process was initiated on December 18, 2008 with the posting of Form 465, 465 Attachment and RFP. Bid proposals were officially opened on January 19, 2009. A proposal evaluation meeting was held on February 2, 2009. RMHN followed documented Competitive procurement Policies and Procedures. Committee members completed detailed, quantitative proposal evaluations keyed to the RFP evaluation criteria. RMHN selected the bid proposal submitted by Qwest Communications as it most nearly conformed to the specifications set forth in the RFP, will best serve the needs of RMHN and its members, and will provide the most cost effective means for producing results defined in the RFP. RMHN and Qwest Communications completed negotiations and signed a contract on June 29, 2009.

a. Brief description of the backbone network of the dedicated health care network, e.g., MPLS network, carrier-provided VPN, a SONET ring;

The Rocky Mountain Health Net (RMHN) is a carrier-provided VPN. RMHN has contracted with Qwest to provide a reliable, secure, managed broadband network (the Network) that links participating health care providers (HCPs) to one another with both Layer 2 and 3 transport including Asynchronous Transfer Mode (ATM) and Metropolitan Optical Ethernet (MOE). Qwest has subcontracted with major ILECs and CLECs in Colorado to provide ubiquitous transport statewide.

b. Explanation of how health care provider sites will connect to (or access) the network, including the access technologies/services and transmission speeds;

The Network provides Ethernet handoff to each participating HCP terminated on a Qwest-managed router (CPE) placed on the HCP customer premises. Transmission speed categories and transport (in parentheses) are 4.5/5.0 Mbps, 7.5 Mbps, 40 Mbps and 100 Mbps. Qwest and RMHN will jointly determine the IP addresses needed to meet RMHN's business requirements and Qwest will provide the public IP addresses to

be used by the HCPs for network address translation (NAT) and port address translation (PAT) services on individual HCP CPEs. If required by an HCP, Qwest will provide NAT and PAT services on that HCP's CPE device to translate LAN RFC1918 IP addressing into pre-determined unique, publicly routable IP addresses. Qwest will address the Ethernet handoff with IP addresses determined by the HCP. Qwest will provide Dynamic Host Configuration Protocol (DHCP) services on the CPE if required by the HCP.

c. Explanation of how and where the network will connect to a national backbone such as NLR or Internet2;

The Network will obtain access to Internet2 at the Front Range GigaPoP (FRGP), a national research network node operated by the University Center for Atmospheric Research. RMHN will subscribe to Internet2 for this access.

d. Number of miles of fiber construction, and whether the fiber is buried or aerial;

Qwest will spend approximately $17M to build out more than 25 miles of new fiber construction to support this project. These builds will be from central offices to specific HCP sites, in particular those subscribing to 40 and 100 Mbps service.

e. Special systems or services for network management or maintenance (if applicable) and where such systems reside or are based.

RMHN has contracted with Qwest for a managed services solution. These services include: IP addressing and routing; 7 X 24 network monitoring; architectural support for private subnetworks emulating hub-and-spoke topologies; Quality of Service traffic management; a single gateway firewall between the Network and access to both the Internet and the FRGP; read-only SNMP and Sflow access to designated CPE routers; and, multicast capability. All systems reside or are based in Qwest facilities.

4. List of Connected Health Care Providers: Provide information below for all eligible and noneligible health care provider sites that, as of the close of the most recent reporting period, are connected to the network and operational.

No Health Care Providers are connected; therefore this is not applicable at this time.

a.Health care provider site;
b. Eligible provider (Yes/No);
c. Type of network connection (e.g., fiber, copper, wireless);
d. How connection is provided (e.g., carrier-provided service; self-constructed; leased facility);
e. Service and/or speed of connection (e.g., DS1, DS3, DSL, OC3, Metro Ethernet (10 Mbps);
f. Gateway to NLR, Internet2, or the Public Internet (Yes/No);
g. Site Equipment (e.g., router, switch, SONET ADM, WDM), including manufacturer name and model number.
h. Provide a logical diagram or map of the network.

5. ***Identify the following non-recurring and recurring costs, where applicable shown both as budgeted and actually incurred for the applicable quarter and funding year to-date.***

No Health Care Providers are connected; therefore this is not applicable at this time.

a. Network Design
b. Network Equipment, including engineering and installation
c. Infrastructure Deployment/Outside Plant
i. Engineering
ii. Construction
d. Internet2, NLR, or Public Internet Connection
e. Leased Facilities or Tariffed Services
f. Network Management, Maintenance, and Operation Costs (not captured elsewhere)
g. Other Non-Recurring and Recurring Costs

6. ***Describe how costs have been apportioned and the sources of the funds to pay them:***

RMHN received its Funding Commitment Letter on March 11, 2010.

a. Explain how costs are identified, allocated among, and apportioned to both eligible and ineligible network participants.

A high-level summary is presented here. The detailed description of RMHN cost and pricing strategy cost data was provided with our Form 466-A Package. It includes a spreadsheet showing all cost and pricing data and a narrative explaining the process. USAC reviewed and accepted these documents as a part of the FCL approval process. During this process, RMHN made a number of changes to its cost/price documents and methods to comply with USAC guidance. The final posted documents incorporate these changes.

The high-level summary is: RMHN costs are established by Qwest under the terms of our service contract with them. Costs are presented in two categories: Allocated Costs (itemized by HCP) and Network Costs (a single total for each network cost category). The main eligible Allocated Cost is the per-HCP costs of providing network service (NRC and MRC) for eligible members. All non-eligible members have their per-site costs shown in the spreadsheet as Unallocated Costs. Unallocated Costs may also be eligible or ineligible costs. Eligible unallocated costs are allocated across all members equally (eligible and non-eligible members). Ineligible Unallocated Costs are not prorated, not reflected in Form 466-A Attachment, the Network Cost Worksheet, nor HCP bills, and are paid directly by RMHN to Qwest. Figure 1 illustrates these cost categories.

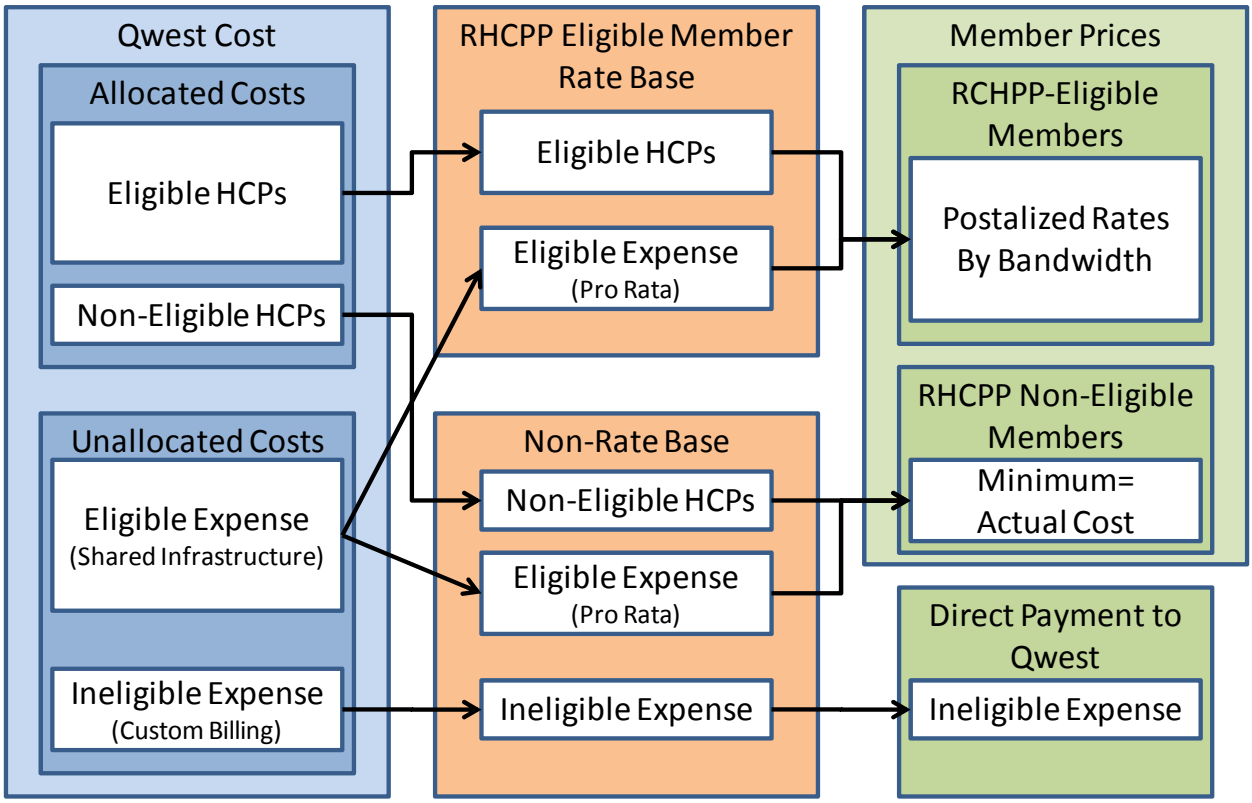

Figure 1: Network cost, rate base and pricing.

A number of cost and pricing issues were raised and resolved in the 14-day letter process. Below we summarize these issues and their resolution:

1. **<u>Custom billing</u>. Qwest included a cost for custom billing in their overall costs. This was initially shown as a cost element of the Eligible HCP rate base. However, after discussion between RMHN and USAC and FCC personnel, RMHN agreed to classify custom billing as an ineligible expense. The affect of this decision on RMHN's overall cost/price model is apparent in Figure 1; that is, RMHN has removed custom billing from the rate base and pays for it by direct payment to Qwest. This arrangement was incorporated into the RMHN Self-Sustainability Plan.**
2. **<u>Internet2 expense</u>. The annual subscription for 3 years of Internet2 service had been bundled as a NRC expense in Shared Infrastructure. Since the subscription is for service over time, it was recategorized as MRC.**
3. **<u>Fair share</u>. This issue was raised as to whether non-eligible members were paying fair share. Following discussing with USAC, RMHN recognized changes in pricing policy were necessary to comply with fair share as defined by the FCC. According to October 24, 2008 FCC correspondence from Dana Schaffer, Chief Wire Competition bureau to Scott Barash, Acting Chief Executive Officer, USAC, fair share is determined from the following criterion (last 3 lines, paragraph 2, page 3): *"Participants should demonstrate that the net eligible costs being paid for by Pilot Project funds, for eligible users of the network, is not higher than such costs could have been had a non-eligible component for the project not been included."* This**

criterion is met when non-eligible members are not included in the rate base used to calculate eligible member postalized prices. This is why new non-eligible members are to be added in the unallocated cost section of the Cost and Price spreadsheet. This process is illustrated by Figure 1.

b. Describe the source of funds from:

i. Eligible Pilot Program network participants

Eligible pilot program network participants use as source of funds their normal operating budget allocations for networking expenses. There is no RMHN-arranged funding provided to HCPs to cover the expense of participant match.

ii. Ineligible Pilot Program network participants

Ineligible Pilot Program network participants likewise pay their fair share of cost through their normal operating budget allocations for networking expenses.

c. Show contributions from all other sources (e.g., local, state, and federal sources, and other grants).

i. Identify source of financial support and anticipated revenues that is paying for costs not covered by the fund and by Pilot Program participants.

All network expenses are paid for by member match and USAC subsidy except for the cost of Custom Billing which is paid for directly by RMHN. The source of funding for this expense is budgeted in the revenue section of the RMHN Self-Sustainability Plan budget. The expense itself is shown as in the expense section of the RMHN Self-Sustainability Plan budget.

ii. Identify the respective amounts and remaining time for such assistance.

This is explicit in the RMHN Self-Sustainability Plan.

d. Explain how the selected participant's minimum 15 percent contribution is helping to achieve both the selected participant's identified goals and objectives and the overarching goals of the Pilot Program.

RMHN is the selected participant. We are providing 30.64% of the Total Eligible Costs. Simply put, RMHN and its members, without outside assistance, could not meet the overarching goals of the Pilot Program to deploy a statewide, dedicated health care network in Colorado including those areas of the state where the need for those benefits is most acute. However, with the assistance of USAC, and matching payments from our members, we have been able to contract for and begin the deployment of this network and contribute to meeting the overarching goals of the RCHPP.

7. Identify any technical or non-technical requirements or procedures necessary for ineligible entities to connect to the participant's network.

Non-eligible entities will pay their full share of network costs including non recurring costs (NRC) and monthly recurring costs (MRC).

If non-eligible entities are allowed to join the network, they will be invoiced separately for each service item for their fair share of the network costs without USAC subsidy. These invoices will be provided directly to the for-profit participant. USAC will receive invoice documentation that reflects eligible rural health care providers only.

8. Provide an update on the project management plan, detailing:

a.The project's current leadership and management structure and any changes to the management structure since the last data report; and

The RMHN consortium project is managed by George DelGrosso, the Project Coordinator. The Associate Project Coordinator is Debby Farreau.

b. In the first quarterly report, the selected applicant should provide a detailed project plan and schedule. The schedule must provide a list of key project deliverables or tasks, and their anticipated completion dates. Among the deliverables, participants must indicate the dates when each health care provider site is expected to be connected to the network and operational. Subsequent quarterly reports should identify which project deliverables, scheduled for the previous quarter, were met, and which were not met. In the event a project deliverable is not achieved, or the work and deliverables deviate from the work plan, the selected participant must provide an explanation.

RMHN will follow the prescribed process in the FCC Orders. Namely, we will obtain Letters of Agency from each of our participants, complete and file Form 465, select a service provider, file Form 466, obtain funding authorization, file Form 467 as services contracts are established, file the quarterly reports required by Order 07-198, maintain all audit records as required and cooperate with all audit requests.

TARGET (UPDATED) SCHEDULE

June – July 2008	Obtain Letters of Agency (LOA) and Questionnaires
June – November 2008	Prepare Form 465, 465 Attachment and RFP
November 2008 – January 2009	USAC/FCC review and waiting period for bidder responses (Posted 465/RFP December 18, 2008)
January – June 2009	Select and negotiate with vendor, prepare 466-A (Form 466-A and contract posted June 30, 2009)

June – December 2009	Member final sign-up and completion of 466-A package documents. Posted Form 466-A Package and Sustainability Report December 16, 2009.
December 2009 **– March 2010**	USAC/FCC 466 package and Sustainability Plan review and Funding Commitment Letter (FCL)
March 2010	**FCL issued**
June 2010	Begin Year 1 service

Initial Target Schedule missed some of the target dates, the Target Schedule has been updated to reflect new target dates.

Preparation and informal review of the Form 465, 465 attachment and RFP took longer than anticipated. Time required reviewing, qualifying, correcting and re-reviewing the LOAs, questionnaires, Form 465, 465 Attachment, and RFP was incorrectly estimated in the original target schedule**.** RMHN posted Form 465, 465 Attachment and the RFP December 18, 2008. Allowable contract date: January 15, 2009.

Form 466-A and contract were posted June 30, 2009.

Form 466-A Package and Sustainability Plan posted December 16, 2009.

Funding Commitment Letter (FCL) issued March 11, 2010.

The updated target schedule is an estimate only, based on current knowledge of time required to complete tasks.

We will fully complete network build-out within the 5-year period required by Order 07-198.

9. *Provide detail on whether network is or will become self sustaining. Selected participants should provide an explanation of how network is self sustaining.*

a. Status of obtaining minimum fifteen percent match for the project:

RMHN has 105 health care providers (HPCs) listed on the approved 466-A Attachment and Network Cost Worksheet, 104 as eligible for USAC support, and 1 as non-eligible. RMHN has set pricing such that each eligible participant pays a minimum 15% of its priced rate for the service. In the aggregate, the eligible HCPs pay 30% of total costs. HCPs have committed to a 36-month term of service.

b. Projected sustainability period:

RMHN projects a 10 year sustainability period.

c. Principal factors that were considered by the participant to demonstrate sustainability:

a. **We have decided to keep the rates for our eligible members steady once the RCHPP support is expended. Thus, as cited above, eligible members will continue to pay approximately 30% of monthly recurring costs. The remaining 70% will be the responsibility of RMHN and will be raised as described below.**
b. **We have determined how much revenue will be needed to pay the monthly recurring operating expense of the network once the USAC subsidy is expended. RMHN will take responsibility for continuing the eligible member subsidy at that time. Pro forma cost projects are included in the Self-Sustainability Plan budget.**
c. **The Self-Sustainability Plan is based on a business services model rather than a subscription fee model to cover network costs. That is, revenue from the delivery of business services over the network will be used to cover the cost of operating the network. We do not anticipate charging HCPs a membership fee to cover these management costs, while, however, we do reserve this option.**
d. **Sources of revenue included in the Self-Sustainability Plan include: VPN access to the RMHN network for private practice physicians (12,505 licensed in Colorado); dedicated access to health insurance providers; and marketing agreements with health care information technology product vendors.**

d. Terms of membership in the network:

RMHN membership is open to all health care service providers, including: physicians; clinics; hospitals; and any mental health service providers; applications service providers that support our institutions with electronic medical records, server space, medical record exchange, billing and similar services; health insurance companies; educational institutions providing CME; etc. This is made explicit in our contract with our service provider.

- **Agreements. Each Participating Health Care Provider (PHCP) signs a Participating HCP Agreement with Qwest which binds them to the terms and conditions of RMHN's Master Contract with Qwest and specifies the terms and conditions of membership as a PHCP. The form of the PHCP Agreement is cited by the Master Contract and included therein as an exhibit.**
- **Financial and/or time commitments. The Master Contract contains the pricing information for all PHCPs as an exhibit, plus the procedures for making final modifications to this pricing before service begins. By signing the PCHP Agreement, the PHCP agrees to the final pricing, detailed as total, match, and USAC support for both non-recurring and monthly recurring charges. No time commitments or in-kind contributions are asked of the PHCPs.**
- **Financing of excess bandwidth for growth. Since our Master Contract with Qwest is for leased, managed services, we are free to add additional user bandwidth on demand without the need to finance this in advance. The network consumes exactly the amount of bandwidth subscribed.**
- **Membership fees for non-eligible health care providers/Fair Share. Non-eligible HPPs pay 100% of the network service rates including non-recurring costs, recurring costs and**

construction costs. The procedure for determining the fair share rates was discussed above and illustrated in Figure 1.

e. Excess capacity:

RMHN has no excess capacity at the network level. All capacity is managed, leased services. The capacity of these services is driven by HCP subscription with Qwest, our telecommunications service provider, under the terms of our Master Contract with Qwest. The Acceptable Use Policy for the network requires that all capacity leased under the master contract be used to support the primary and ancillary mission of the HCP (consistent with the guidance of the RCHPP order, Para. 76). Non-health care delivery use of the RMHN network is not permitted. Un-related business revenue from use of the RMHN network is not permitted. Incidental use of the network is permitted if it is integral with the HCP's health care delivery system, its providers and its users, and would be difficult for the HPC to quantify or segregate.

f. Ownership structure:

RMHN owns no assets and operates as a facilitator and aggregator of telecommunications services for its HCP members. RMHN enjoys the full organizational support of its founding organization, the Colorado Behavioral Health Council (CBHC). The project director is George DelGrosso, Executive Director, Colorado Behavioral Health Council.

g. Sources of future support:

- **Internal. When the USAC RHCPP award is fully expended, RMHN will replace existing USAC support with revenue from its Self-Sustainability Plan.**
- **Private. RMHN has received a $399,500 12-month grant from the Colorado Health Foundation to defray administrative expenses through June 2010.**
- **Assumption of Continued RHC Funding. RMHN strongly advocates that the RHC subsidy mechanism be continued in the future; either in its original form, or, preferably, in a revised form resulting from the successful experiments of the RHCPP.**

h. Management costs:

We estimate management costs to be approximately $33,000 per month. These costs are currently covered by the Colorado Hospital Foundation grant and will be sustained through revenue from our Self-Sustainability Plan. These costs include: support of the Project Coordinator, the Associate Project Coordinator, and support for contracted technical and legal services.

10. Provide detail on how the supported network has advanced telemedicine benefits:

No Health Care Providers are connected; therefore this is not applicable at this time.

a. Explain how the supported network has achieved the goals and objectives outlined in selected participant's Pilot Program application;

b. Explain how the supported network has brought the benefits of innovative telehealth and, in particular, telemedicine services to those areas of the country where the need for those benefits is most acute;
c. Explain how the supported network has allowed patients access to critically needed medical specialists in a variety of practices without leaving their homes or communities;
d. Explain how the supported network has allowed health care providers access to government research institutions, and/or academic, public, and private health care institutions that are repositories of medical expertise and information;
e. Explain how the supported network has allowed health care professional to monitor critically ill patients at multiple locations around the clock, provide access to advanced applications in continuing education and research, and/or enhanced the health care community's ability to provide a rapid and coordinated response in the event of a national crisis.

11. Provide detail on how the supported network has complied with HHS health IT initiatives:

No Health Care Providers are connected; therefore this is not applicable at this time.

a. Explain how the supported network has used health IT systems and products that meet interoperability standards recognized by the HHS Secretary;
b. Explain how the supported network has used health IT products certified by the Certification Commission for Healthcare Information Technology;
c. Explain how the supported network has supported the Nationwide Health Information Network (NHIN) architecture by coordinating activities with organizations performing NHIN trial implementations;
d. Explain how the supported network has used resources available at HHS's Agency for Healthcare Research and Quality (AHRQ) National Resource Center for Health Information Technology;
e. Explain how the selected participant has educated themselves concerning the Pandemic and All Hazards Preparedness Act and coordinated with the HHS Assistant Secretary for Public Response as a resource for telehealth inventory and for the implementation of other preparedness and response initiatives; and
f. Explain how the supported network has used resources available through HHS's Centers for Disease Control and Prevention (CDC) Public Health Information Network (PHIN) to facilitate interoperability with public health and emergency organizations.

12. Explain how the selected participants coordinated in the use of their health care networks with the Department of Health and Human Services (HHS) and, in particular, with its Centers for Disease Control and Prevention (CDC) in instances of national, regional, or local public health emergencies (e.g., pandemics, bioterrorism). In such instances, where feasible, explain how selected participants provided access to their supported networks to HHS, including CDC, and other public health officials.

No Health Care Providers are connected; therefore this is not applicable at this time.
