Re: Terrestrial Use of the 2473-2495 MHz Band for Low-Power Broadband Networks, IB Docket No. 13-213

Dear Ms. Dortch:

On September 20, 2016, Commissioner Ajit Pai and his Legal Advisor Brendan Carr attended a meeting with the following representatives of Nintendo of America Inc. at the company's offices in Redmond, Washington: Reggie Fils-Amis, President and COO, Don James, EVP Operations, Devon Pritchard, Sr. Vice President of Business Affairs and General Counsel, Ajay Singh, Director, Litigation and Compliance, Scott Crane, Senior Privacy Counsel, Hien Le, Senior Corporate Counsel, Product Compliance and Engineering, Marla Poor, Senior Corporate Counsel, Policy and Government Affairs, Rich Amtower, Senior Manager, Localization, and Don Massey, consultant for Nintendo.

During this meeting, Nintendo expressed concern about the significant potential risk for disruption of consumers' use of Bluetooth and Wi-Fi in the 2.4 GHz band resulting from Globalstar's proposed terrestrial low power service ("TLPS") deployments.

Specifically, Nintendo explained that it depends heavily upon Bluetooth and Wi-Fi technologies for use with its game consoles, and is concerned that interference from TLPS deployments could undermine the consumer experience, citing recent test results from Microsoft Corporation.[1] Accordingly, Nintendo requested that the Commission not move forward with the draft order, but instead conduct comprehensive, transparent, real-world testing that would include pre-defined, objective metrics and checkpoints.
