Re: WT Docket No. 09-176; ET Docket No. 05-345; WT Docket No. 08-166; WT Docket No. 08-167; and ET Docket No. 10-24 Notice of Ex Parte Communication

Dear Ms. Dortch

At the request of Scot Stone of the Wireless Telecommunications Bureau ("WTB") Mobility Division, the Nuclear Energy Institute ("NEI") and the Utilities Telecom Council ("UTC") hereby provide this further supplement to our Ex Parte filing of May 28, 2010.

Specifically, NEI and UTC were asked to supplement the referenced Ex Parte filing so as to confirm that only one channel group in the Telex 700/800 BTR series operates above 698 MHz. To that end, NEI and UTC confirm that counsel for NEI has been told by Telex that this is the case. Attached is a table prepared by Telex of the "BTR-700/800 Channel Groups" confirming that only the C6 channel group includes frequencies above 698 MHz, and those frequencies are limited to the 704-722 MHz range.

We hope that this further supplement provides the data requested by the WTB and we look forward to a prompt resolution of this matter.

Very truly yours,

Thompson Coburn LLP
