RE: Interstate Interchangeable Marketplace
Case No. 96-461

April 2, 1996

DOCKET FILE COPY ORIGINAL

Dear Commission:

I would like to take this time to strongly voice my opposition to the above-referenced case number and, particularly, the detariffing of interstate common carriers.

At this writing, it is already very difficult for a consumer such as myself to obtain rate information. By eliminating tariffs, all common carriers will be able to easily misrepresent its fees to the public. They do even now to some extent.

Detariffing is just not in the public interest. It will only serve to allow more overbilling and the consumer will be stuck; without recourse because there will be no

publicly available data to verify the veracity of their invoices to consumers. That's certainly not a very fair or equitable practice.

So, therefore, I request your assistance in denying the detariffing that these common carriers are seeking.

Sincerely,
Kevin Loflin
