F.C.C. Docket 96-61 Interstate Interexchange Marketplace

Dear Commissioners:

Now is not the right time to eliminate tariffs for carriers. Many carriers, such as AT&T, misrepresent their rates through high power advertising.

Consumers have no idea as to the rates they are paying. Without tariffs, the little protection we have will be gone!

AT&T and others use sneaky tactics like one day advertising "dial 10288" then adding a 60¢ per call "non-subscriber" charge.

Without tariffs, they could do what they want when they want. They abuse the 1-day notice, what will happen when they can just change their rates?

How will the carriers notify the customers of the pricing, terms and conditions? They won't.

Do not eliminate tariffs.

Thank You

Gerald Hunter
