Colorado Health Care Connections (CHCC)
Pilot Program Participants Quarterly Data Report
Due October 30, 2012 Including Responsive Data Through September 30, 2012,
WC Docket No. 02-60

(Addition/updates made since the last quarterly report are noted in bold blue text.)

1.Project Contact and Coordination Information

a.Identify the project leader(s) and respective business affiliations.

The Colorado Health Care Connections (CHCC) consortium is sponsored by and housed at the Colorado Hospital Association. The Project Coordinator is Steven Summer.

The Colorado Hospital Association is a 501(c)(6) not-for-profit organization with a wholly owned subsidiary, the Colorado Center for the Advancement of Patient Safety, a 501(c)(3) not-for-profit organization. Colorado Hospital Association is a membership organization that represents over 80 hospitals in Colorado. All nonprofit and public hospitals, except for selected federal hospitals, are members. Colorado Hospital Association was founded in 1921 and has been in existence eighty-six years, providing Colorado hospitals services related to advocacy, education, data, communications, and quality and patient safety.

b. Provide a complete address for postal delivery and the telephone, fax, and e-mail address for the responsible administrative official

Steven Summer
Colorado Hospital **Associ**ation
7335 East Orchard Road, Suite 100
Greenwood Village, CO 80111
Telephone 720-330-6022
FAX 720-489-9400
Steven.Summer@cha.com

c. Identify the organization that is legally and financially responsible for the conduct of activities supported by the award.

The Colorado Hospital Association is legally and financially responsible for the conduct of activities supported by the award.

d. Explain how project is being coordinated throughout the state or region.

CHCC is sharing the services of a FCC Pilot Program Associate Project Coordinator with a sister Pilot Program participant, the Rocky Mountain HealthNet (RMHN). No federal USAC funds will be used for this purpose. Program coordination staffing and activities will be carried out using internal CHCC resources.

Program coordination will include the leadership, fund-raising, and implementation needed to develop healthcare applications enabled by the proposed network.

2. Identify all health care facilities included in the network.

See attached Addendum A (spreadsheet which addresses items a. and b. below) with information on all health care facilities that are included on the network.

a. Provide address (including county), zip code, Rural Urban Commuting Area (RUCA) code (including primary and secondary), six-digit census tract, and phone number for each health care facility participating in the network.
b. For each participating institution, indicate whether it is:
i. Public or non-public;
ii. Not-for-profit or for-profit;
iii. An eligible health care provider or ineligible health-care provider with an explanation of why the health care facility is eligible under section 254 of the 1996 Act and the Commission's rules or a description of the type of ineligible health care provider entity.

3. Network Narrative: In the first quarterly report following the completion of the competitive bidding process and the selection of vendors, the selected participant must submit an updated technical description of the communications network that it intends to implement, which takes into account the results its network design studies and negotiations with its vendors. This technical description should provide, where applicable:

The competitive bidding process was initiated on September 15, 2008 with the posting of Form 465, 465 Attachment and RFP. Bid proposals were officially opened on October 15, 2008. A proposal evaluation meeting was held on October 22, 2008. CHCC followed documented Competitive Procurement Policies and Procedures. Committee members completed detailed, quantitative proposal evaluations keyed to the RFP evaluation criteria. CHCC selected the bid proposal submitted by Qwest Communications as it most nearly conformed to the specifications set forth in the RFP, will best serve the needs of CHCC and its members, and will provide the most cost-effective means for producing results defined in the RFP. CHCC and Qwest Communications completed negotiations and signed a contract on June 29, 2009.

a. Brief description of the backbone network of the dedicated health care network, e.g., MPLS network, carrier-provided VPN, a SONET ring;

The Colorado Health Care Connection (CHCC) is a carrier-provided VPN. CHCC has contracted with CenturyLink to provide a reliable, secure, managed broadband network (the Network) that links participating health care providers (HCPs) to one another with both Layer 2 and 3 transport including Asynchronous Transfer Mode (ATM) and Metropolitan Optical Ethernet (MOE). CenturyLink has subcontracted with major ILECs and CLECs in Colorado to provide ubiquitous transport statewide.

b. Explanation of how health care provider sites will connect to (or access) the network, including the access technologies/services and transmission speeds;

The Network provides Ethernet handoff to each participating HCP terminated on a CenturyLink-managed router (CPE) placed on the HCP customer premises. Transmission speed categories and transport (in parentheses) are 4.5/5.0 Mbps, 7.5 Mbps, 40 Mbps and 100 Mbps. CenturyLink and CHCC will jointly determine the IP addresses needed to meet CHCC's business requirements and CenturyLink will provide the public IP addresses to be used by the HCPs for network address translation (NAT) and port address translation (PAT) services on individual HCP CPEs. If required by an HCP, CenturyLink will provide NAT and PAT services on that HCP's CPE device to translate LAN RFC1918 IP addressing into pre-determined unique, publicly routable IP addresses. CenturyLink will address the Ethernet handoff with IP addresses determined by the HCP. CenturyLink will provide Dynamic Host Configuration Protocol (DHCP) services on the CPE if required by the HCP.

c. Explanation of how and where the network will connect to a national backbone such as NLR or Internet2;

The Network will obtain access to Internet2 at the Front Range GigaPoP (FRGP), a national research network node operated by the University Center for Atmospheric Research. CHCC will subscribe to Internet2 for this access.

d. Number of miles of fiber construction, and whether the fiber is buried or aerial;

CenturyLink will spend approximately $17M to build out more than 25 miles of new fiber construction to support this project. These builds will be from central offices to specific HCP sites, in particular those subscribing to 40 and 100 Mbps service.

e. Special systems or services for network management or maintenance (if applicable) and where such systems reside or are based.

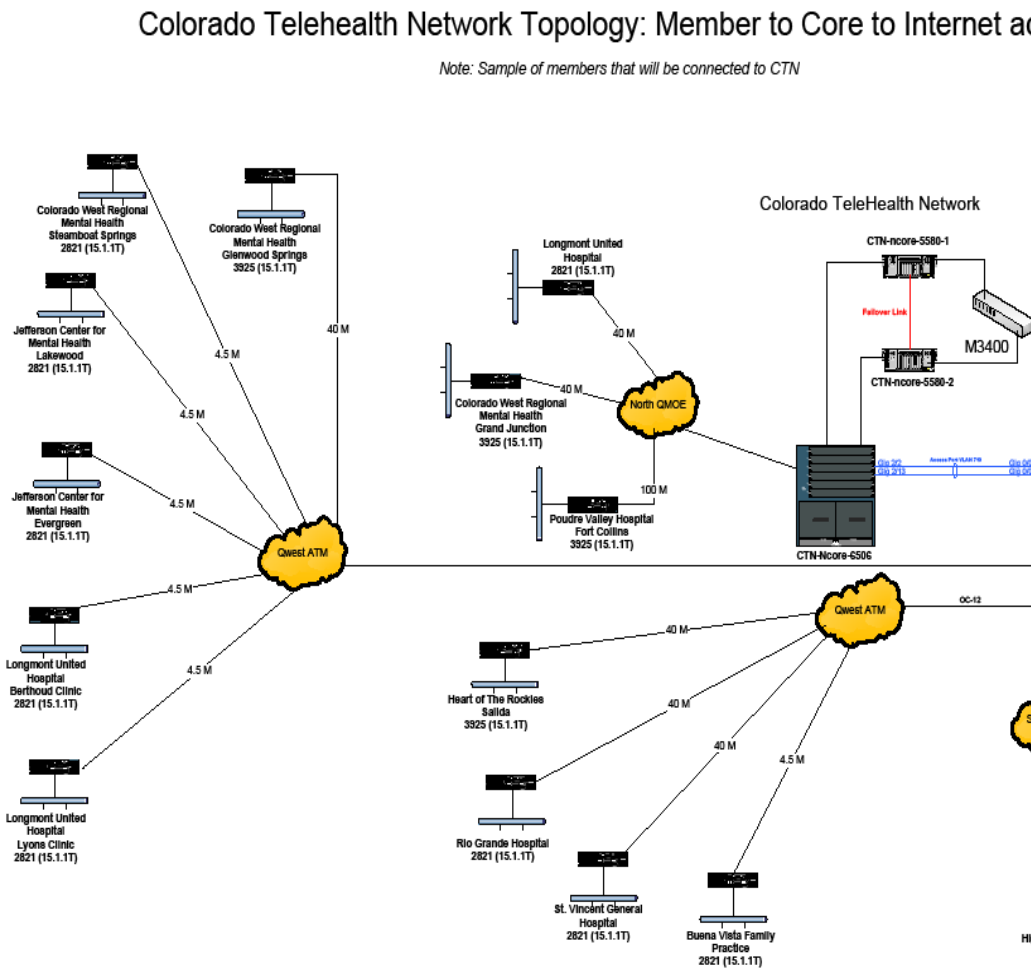
CHCC has contracted with CenturyLink for a managed services solution. These services include: IP addressing and routing; 7 X 24 network monitoring; architectural support for private subnetworks emulating hub-and-spoke topologies; Quality of Service traffic management; a single gateway firewall between the Network and access to both the Internet and the FRGP; read-only SNMP and Sflow access to designated CPE routers; and, multicast capability. All systems reside or are based in CenturyLink facilities.

4. List of Connected Health Care Providers: Provide information below for all eligible and noneligible health care provider sites that, as of the close of the most recent reporting period, are connected to the network and operational.

97 CHCC members have been installed and tested by service provider, CenturyLink. 97 members have completed their testing, accepted service and were operational. One site discontinued service in February 2012 resulting in 96 operational members.

See attached Addendum B for operational HCPs (spreadsheet with items a. through g. below)

a. Health care provider site;
b. Eligible provider (Yes/No);
c. Type of network connection (e.g., fiber, copper, wireless);
d. How connection is provided (e.g., carrier-provided service; self-constructed; leased facility);
e. Service and/or speed of connection (e.g., DS1, DS3, DSL, OC3, Metro Ethernet (10 Mbps);
f. Gateway to NLR, Internet2, or the Public Internet (Yes/No);
g. Site Equipment (e.g., router, switch, SONET ADM, WDM), including manufacturer name and model number.
h. Provide a logical diagram or map of the network.



5. Identify the following non-recurring and recurring costs, where applicable shown both as budgeted and actually incurred for the applicable quarter and funding year to-date.
a. Network Design
b. Network Equipment, including engineering and installation
c. Infrastructure Deployment/Outside Plant
i. Engineering
ii. Construction
d. Internet2, NLR, or Public Internet Connection
e. Leased Facilities or Tariffed Services
f. Network Management, Maintenance, and Operation Costs (not captured elsewhere)

g. Other Non-Recurring and Recurring Costs

COLORADO HEALTH CARE CONNECTIONS (CHCC)							
CHCC QUARTERLY COSTS							
3rd Quarter 2012							
Type HCP	Type Expense	Type Service	Quarter Budget	Quarter Actual	Calendar YTD Budget	Calendar YTD Actual	Project To Date Actual
Eligible	Non-recurring	Leased/Tariffed Facilities or Services	-	-	24,500	24,500	1,554,198
Eligible	Recurring	Leased/Tariffed Facilities or Services	588,379	588,379	1,755,826	1,755,826	3,560,363
Non-eligible	Non-recurring	Leased/Tariffed Facilities or Services	-	-	10,257	10,257	154,987
Non-eligible	Recurring	Leased/Tariffed Facilities or Services	33,753	33,753	103,247	103,247	262,113
TOTAL			**622,131**	**622,131**	**1,893,830**	**1,893,830**	**5,531,661**
NOTES:							
1) Figures are exclusive of taxes, fees, and surcharges (e.g., state sales tax, county sales tax, Colorado Universal Service Fund)							

6. Describe how costs have been apportioned and the sources of the funds to pay them:

CHCC received its Funding Commitment Letter on March 12, 2010.

a. Explain how costs are identified, allocated among, and apportioned to both eligible and ineligible network participants.

A high-level summary is presented here. The detailed description of CHCC cost and pricing strategy Cost data was provided with our Form 466-A Package. It includes a spreadsheet showing all cost and pricing data and a narrative explaining the process. USAC reviewed and accepted these documents as a part of the FCL approval process. During this process, CHCC made a number of changes to its cost/price documents and methods to comply with USAC guidance. The final posted documents incorporate these changes.

The high-level summary is: CHCC costs are established by CenturyLink under the terms of our service contract with them. Costs are presented in two categories: Access Costs (itemized by HCP) and Infrastructure Costs. Access Cost is the per-HCP costs of providing site specific network service (NRC and MRC) for eligible members. The 466 A Attachment HCPs comprise the Initial Access Cost set of HCPs. Non-eligible, new and upgraded members have their unsubsidized per site costs shown in Figure 1 as Growth Access Costs. Infrastructure Costs are also divided into the Initial and Growth pools. Growth infrastructure costs are pooled to be used to implement the infrastructure necessary to serve the needs of this group. These costs and HCP payments are, not reflected in Form 466-A Attachment or the Network Cost Worksheet since they are fully unsubsidized costs not involving USAC funding in any way. These costs are offset by revenues generated as directed by CHCC to CenturyLink, from time to time, during a "true-up" calculation. Figure 1 illustrates these cost categories, rate bases and prices.

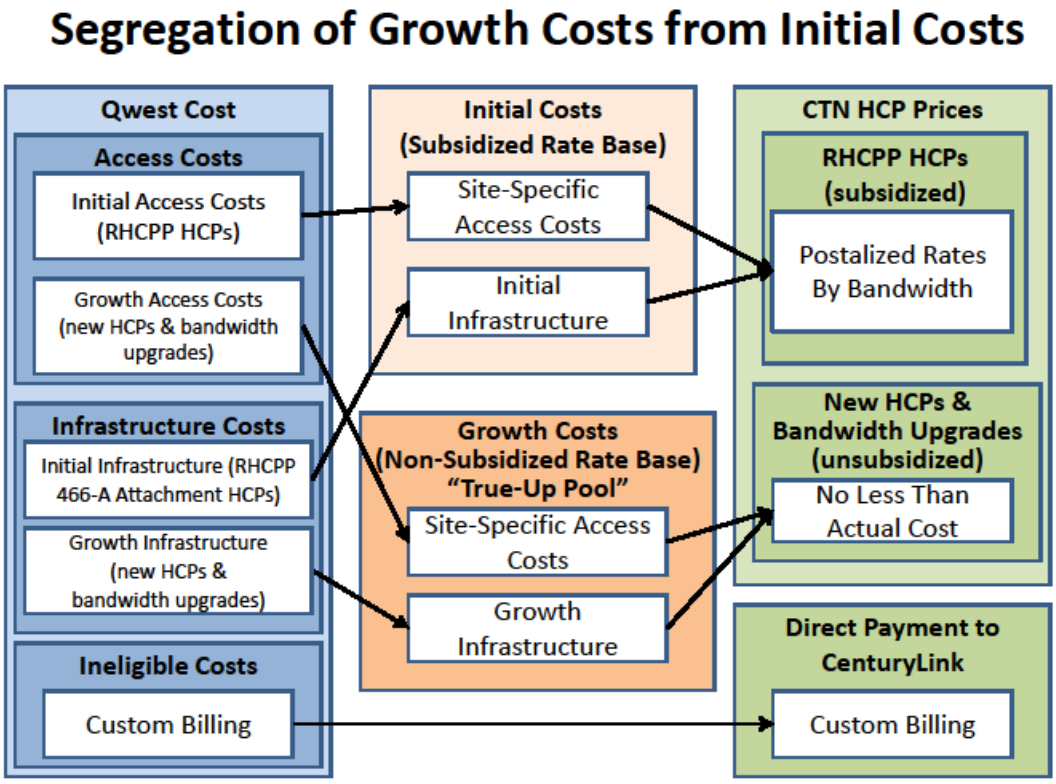


Figure 1: Network cost, rate base and pricing.

A number of cost and pricing issues were raised and resolved in the 14-day letter process. Below we summarize these issues and their resolution:

1. Custom billing. CenturyLink included a cost for custom billing in their overall costs. This was initially shown as a cost element of the Eligible HCP rate base. However, after discussion between CHCC and USAC and FCC personnel, CHCC agreed to classify custom billing as an ineligible expense. The affect of this decision on CHCC's overall cost/price model is apparent in Figure 1; that is, CHCC has removed custom billing from the rate base and pays for it by direct payment to CenturyLink. This arrangement was incorporated into the CHCC Self-Sustainability Plan.
2. Internet2 expense. The annual subscription for 3 years of Internet2 service had been bundled as a NRC expense in Shared Infrastructure. Since the subscription is for service over time, it was re-categorized as MRC.
3. Fair share. This issue was raised as to whether non-eligible members were paying fair share. Following discussing with USAC, CHCC recognized changes in pricing policy were necessary to comply with fair share as defined by the FCC. According to October 24, 2008 FCC correspondence from Dana Schaffer,

Chief Wire Competition bureau to Scott Barash, Acting Chief Executive Officer, USAC, fair share is determined from the following criterion (last 3 lines, paragraph 2, page 3): *"Participants should demonstrate that the net eligible costs being paid for by Pilot Project funds, for eligible users of the network, is not higher than such costs could have been had a non-eligible component for the project not been included."* This criterion is met when non-eligible members are not included in the rate base used to calculate eligible member postalized prices. This is why access and infrastructure costs for new members and upgrades for existing members are accumulated in the separate rate base for non-subsidized connections. This process is illustrated by Figure 1.

b. Describe the source of funds from:

i. Eligible Pilot Program network participants

Eligible pilot program network participants use as source of funds their normal operating budget allocations for networking expenses. There is no CHCC-arranged funding provided to HCPs to cover the expense of participant match.

ii. Ineligible Pilot Program network participants

Ineligible Pilot Program network participants likewise pay their fair share of cost through their normal operating budget allocations for networking expenses.

c. Show contributions from all other sources (e.g., local, state, and federal sources, and other grants).

i. Identify source of financial support and anticipated revenues that is paying for costs not covered by the fund and by Pilot Program participants.

All network expenses are paid for by member match and USAC subsidy except for the cost of Custom Billing which is paid for directly by CHCC. The source of funding for this expense is budgeted in the revenue section of the CHCC Self-Sustainability Plan budget. The expense itself is shown as in the expense section of the CHCC Self-Sustainability Plan budget.

ii. Identify the respective amounts and remaining time for such assistance.

This is explicit in the CHCC Self-Sustainability Plan.

d. Explain how the selected participant's minimum 15 percent contribution is helping to achieve both the selected participant's identified goals and objectives and the overarching goals of the Pilot Program.

CHCC is the selected participant. We are providing 30.64% of the Total Eligible Costs. Simply put, CHCC and its members, without outside assistance, could not meet the overarching goals of the Pilot Program to

deploy a statewide, dedicated health care network in Colorado including those areas of the state where the need for those benefits is most acute. However, with the assistance of USAC, and matching payments from our members, we have been able to contract for and begin the deployment of this network and contribute to meeting the overarching goals of the RCHPP.

7. Identify any technical or non-technical requirements or procedures necessary for ineligible entities to connect to the participant's network.

Non-eligible and for-profit entities will pay their full share of network costs, including non recurring costs (NRC) and monthly recurring costs (MRC).

If non-eligible entities join the network, they will be invoiced separately for each service item for their fair share of the network costs without USAC subsidy. These invoices will be provided directly to the non-eligible participant. USAC will receive invoice documentation that reflects eligible rural health care providers only.

8. Provide an update on the project management plan, detailing:

a.The project's current leadership and management structure and any changes to the management structure since the last data report; and

The CHCC consortium project is managed by Steven Summer, the Project Coordinator. The Associate Project Coordinator is Debby Farreau.

b. In the first quarterly report, the selected applicant should provide a detailed project plan and schedule. The schedule must provide a list of key project deliverables or tasks, and their anticipated completion dates. Among the deliverables, participants must indicate the dates when each health care provider site is expected to be connected to the network and operational. Subsequent quarterly reports should identify which project deliverables, scheduled for the previous quarter, were met, and which were not met. In the event a project deliverable is not achieved, or the work and deliverables deviate from the work plan, the selected participant must provide an explanation.

CHCC will follow the prescribed process in the FCC Orders. Namely, we will obtain Letters of Agency from each of our participants, complete and file Form 465, select a service provider, file Form 466, obtain funding authorization, file Form 467 as services contracts are established, file the quarterly reports required by Order 07-198, maintain all audit records as required and cooperate with all audit requests.

TARGET (UPDATED) SCHEDULE

June – July 2008	Obtain Letters of Agency (LOA)
June - August 2008	Prepare Form 465, 465 Attachment and RFP USAC/FCC Review

September-October 2008	Post Form 465, 465 Attachment and RFP, waiting period for response (posted 465/RFP September 15, 2008)
November 2008 - June 2009	Select and negotiate with vendor. Prepare 466-A (Form 466-A and signed contract posted June 30, 2009)
June - December 2009	Member final sign-up and completion of 466-A package documents. Posted Form 466-A Package and Sustainability Plan December 16, 2009.
December 2009– March 2010	USAC/FCC 466 package review and Funding Commitment Letter
March 2010	FCL issued
April-July 2010	Network testing (beta and pilot)
August 2010	Production network deployed
September 2010	467 completed, Support Acknowledgement Letter received
September 2010	CenturyLink deployment of members
October 2010- March 2012	Ongoing deployment of members
Ongoing	Operational support of existing members

CHCC posted Form 465, 465 Attachment, and RFP on September 15, 2008. Allowable contract date: October 13, 2008.

Form 466-A and signed contract was posted June 30, 2009.

Form 466-A Package and Sustainability Plan posted December 16, 2009.

Funding Commitment Letter (FCL) issued March 12, 2010.

Form 467 posted September 10, 2010 and notification of network initiation posted to FCC ECFS September 14, 2010.

Received USAC Support Acknowledgement Letter September 10, 2010.

Target dates have been updated to reflect the actual posting date of the Form 465, 465 Attachment, the RFP and Form 466-A.

Updated target schedule is an estimate only based on current knowledge of time required to complete tasks.

We will fully complete network build-out within the 5-year period required by Order 07-198.

9. Provide detail on whether network is or will become self sustaining. Selected participants should provide an explanation of how network is self sustaining.

a. Status of obtaining minimum fifteen percent match for the project:

CHCC has 92 health care providers (HPCs) listed on the approved 466-A Attachment and Network Cost Worksheet, 90 as eligible for USAC support, and 2 as non-eligible. CHCC has set pricing such that each eligible participant pays a minimum 15% of its priced rate for the service. In the aggregate, the eligible HCPs pay 30% of total costs. HCPs have committed to a 36-month term of service.

b. Projected sustainability period:

CHCC projects a 10 year sustainability period.

c. Principal factors that were considered by the participant to demonstrate sustainability:

a. We have decided to keep the rates for our eligible members steady once the RCHPP support is expended. Thus, as cited above, eligible members will continue to pay approximately 30% of monthly recurring costs. The remaining 70% will be the responsibility of CHCC and will be raised as described below.
b. We have determined how much revenue will be needed to pay the monthly recurring operating expense of the network once the USAC subsidy is expended. CHCC will take responsibility for continuing the eligible member subsidy at that time. Pro forma cost projects are included in the Self-Sustainability Plan budget.
c. The Self-Sustainability Plan is based on a business services model rather than a subscription fee model to cover network costs. That is, revenue from the delivery of business services over the network will be used to cover the cost of operating the network.
d. Sources of revenue included in the Self-Sustainability Plan include: VPN access to the CHCC network for private practice physicians (12,505 licensed in Colorado); dedicated access to health insurance providers; and marketing agreements with health care information technology product vendors.

d. Terms of membership in the network:

CHCC membership is open to all health care service providers, including: physicians; clinics; hospitals; applications service providers that support our institutions with electronic medical records, server space, medical record exchange, billing and similar services; health insurance companies; educational institutions providing CME; etc. This is made explicit in our contract with our service provider.

- Agreements. Each Participating Health Care Provider (PHCP) signs a Participating HCP Agreement with CenturyLink which binds them to the terms and conditions of CHCC's Master Contract with CenturyLink and specifies the terms and conditions of membership as a PHCP. The form of the PHCP Agreement is cited by the Master Contract and included therein as an exhibit.
- Financial and/or time commitments. The Master Contract contains the pricing information for all PHCPs as an exhibit, plus the procedures for making final modifications to this pricing before service begins. By signing the PCHP Agreement, the PHCP agrees to the final pricing, detailed as total, match, and USAC support for both non-recurring and monthly recurring charges. No time commitments or in-kind contributions are asked of the PHCPs.
- Financing of excess bandwidth for growth. Since our Master Contract with CenturyLink is for leased, managed services, we are free to add additional user bandwidth on demand without the need to finance this in advance. The network consumes exactly the amount of bandwidth subscribed.
- Membership fees for non-eligible health care providers/Fair Share. Non-eligible HPPs pay 100% of the network service rates including non-recurring costs, recurring costs and construction costs. The procedure for determining the fair share rates was discussed above and illustrated in Figure 1.

e. Excess capacity:

CHCC has no excess capacity at the network level. All capacity is managed, leased services. The capacity of these services is driven by HCP subscription with CenturyLink, our telecommunications service provider, under the terms of our Master Contract with CenturyLink. The Acceptable Use Policy for the network requires that all capacity leased under the master contract be used to support the primary and ancillary mission of the HCP (consistent with the guidance of the RCHPP order, Para. 76). Non-health care delivery use of the CHCC network is not permitted. Un-related business revenue from use of the CHCC network is not permitted. Incidental use of the network is permitted if it is integral with the HCP's health care delivery system, its providers and its users, and would be difficult for the HPC to quantify or segregate.

f. Ownership structure:

CHCC owns no assets and operates as a facilitator and aggregator of telecommunications services for its HCP members. CHCC enjoys the full organizational support of its founding organization, the Colorado Hospital Association (CHA) and subsidiary 501(c)(3), the Colorado Center for the Advancement of Patient Safety (CCAPS). The project coordinator is Steven Summer, President and CEO of the Colorado Hospital Association. CCAPS is doing business as CHCC, thus providing 501(c)(3) corporate entity status.

g. Sources of future support:

- Internal. When the USAC RHCPP award is fully expended, CHCC will replace existing USAC support with revenue from its Self-Sustainability Plan.
- Private. CHCC has received a $399,500 12-month grant from the Colorado Health Foundation to defray administrative expenses with budget revision and no-cost extension provided through June 30, 2011.
- Colorado Hospital Association (CHA) members have committed to assist in funding administrative costs for 2012 and 2013.
- Assumption of Continued RHC Funding. CHCC strongly advocates that the RHC subsidy mechanism be continued in the future; either in its original form, or, preferably, in a revised form resulting from the successful experiments of the RHCPP.

h. Management costs:

We estimate management costs to be approximately $60,000 per month. These costs are currently covered by CHA members, Colorado Health Foundation grant and HCP contributions; and will be sustained through revenue from our Self-Sustainability Plan. These costs include: the Project Coordinator, Associate Project Coordinator, Administrative Assistant, and support for contracted technical and legal services.

10. Provide detail on how the supported network has advanced telemedicine benefits:

a. Explain how the supported network has achieved the goals and objectives outlined in selected participant's Pilot Program application;

The principal goals of our project are to improve quality, access and affordability of healthcare in rural Colorado. We are now in process of deploying our network. The network offers medical-grade enterprise networking services otherwise unavailable to individual Participating HPCs. Further, the pricing offered Participating HCPs is substantially discounted from actual cost through USAC support. Seamless medical-grade electronic connectivity for Colorado's entire health care community, anchored by our Participating HCPs, is a first step toward reaching all three of our goals: quality will be improved through the eventual use of health IT to monitor clinical outcomes as associated HIT programs get underway; access is improved through remote diagnosis, tele-consultation, and interactive video continuing medical education; affordability is improved through increased continuity of care made possible by health information exchange carried over our network.

b. Explain how the supported network has brought the benefits of innovative telehealth and, in particular, telemedicine services to those areas of the country where the need for those benefits is most acute;

Colorado has a significant rural presence—47 of our 64 counties are designated rural. Fifty-one of Colorado's counties are in health shortage areas.[1] Forty to sixty percent of Colorado is medically

[1] Source: Colorado Department of Public Health and Environment.

disenfranchised due to lack of access to primary care.[2] CHCC's goal is to serve the entire state, including these disenfranchised areas. Where telecommunications service was limited to prohibitively expensive, single T-1 circuits, our new minimum standard is 3 bonded T-1s to comprise 4.5 Mbps Ethernet service, or alternatively 5 Mbps where Optical Ethernet is available. In some cases, the optical Ethernet footprint of service providers has been expanded to provision our network, including deployment of $17 million in optical fiber cable.

c. Explain how the supported network has allowed patients access to critically needed medical specialists in a variety of practices without leaving their homes or communities;

United Health Group's pilot Connected Care initiative, brought advanced telehealth technology to rural parts of Colorado through the CHCC network. Connected Care improved access to health care in Colorado by connecting patients in rural areas with primary and specialty physicians in suburban and urban locations hundreds of miles away via high-definition virtual visits. **The following are few examples of how CHCC has allowed patients access to critically needed medical specialists:**

1. **One of CHCC's hospitals on the western slope, a level 2 trauma center which supports patients between Salt Lake City and Denver, reduced the time to transmit a pediatric echo study from 3 hours to 15 minutes with the increased bandwidth of CHCC. This allows for timely remote consults for critically ill patients and improved quality and continuity of care.**
2. **One of our CHCC rural hospitals on the eastern plains reduced the time to transmit radiology studies from 2.5 hours to 10 minutes with their increased bandwidth. During a traffic emergency their ED doctor was able to consult with a remote/urban specialist, also on the CHCC private Ethernet network, and quickly determine that they could treat the patient obviating the need for a costly transport to Denver.**

In future quarterly reports, we will report on the progress of similar initiatives made possible by the CHCC telehealth network.

d. Explain how the supported network has allowed health care providers access to government research institutions, and/or academic, public, and private health care institutions that are repositories of medical expertise and information;

CHCC's deployment plan includes connecting our network to Internet2 via the Front Range GigaPoP. The Front Range GigaPoP is a national networking point of presence for government and high speed research networks including Internet2 and National Light Rail. It is operated by the University Center for Atmospheric Research and is a national supercomputer center. All of Colorado's research universities are served by the FRGP, which also has regional connections to Wyoming and Utah.

e. Explain how the supported network has allowed health care professional to monitor critically ill patients at multiple locations around the clock, provide access to advanced applications in continuing education and

[2] Access Denied: A Look at America's Medically Disenfranchised. National Association of Community Health Centers, 2007.

research, and/or enhanced the health care community's ability to provide a rapid and coordinated response in the event of a national crisis.

CHCC is researching the possible deployment of video services and unified communications as a value-added feature of our network. We are researching software which provides a rich set of communications features. This will support rapid and coordinated response in the event of a national crisis by Colorado's entire health care community.

CHCC is evaluating the best method for offering a Physician Access Plan extension of our medical-quality enterprise network to physician offices. A feature of the plan is to extend CHCC's medical-grade network features (in particular, speed, encryption and QoS) beyond our Participating HCPs to include the approximately 12,500 private practice physicians in Colorado. This will enable seamless integration between the physician office and medical facilities providing patient care.

11. Provide detail on how the supported network has complied with HHS health IT initiatives:

a. Explain how the supported network has used health IT systems and products that meet interoperability standards recognized by the HHS Secretary;
CHCC is addressing this requirement through collaboration with the designated Health IT Coordination entity in Colorado, the Colorado Regional Health Information Organization (CORHIO). CORHIO has agreed to use CHCC as the transport provider for hospital data exchange needed to meet interoperability standards.

b. Explain how the supported network has used health IT products certified by the Certification Commission for Healthcare Information Technology;
CHCC provides medical-grade telecommunications transport. Thus, we are the health IT "highway" in Colorado. IT products certified by the Certification Commission for Healthcare Information Technology are the "cars" that will ride on our highway. The responsibility for coordinating HIT in Colorado has been delegated by the Governor to CORHIO. CHCC is and will continue to work cooperatively with CORHIO and the Governor's Office of Information Technology to assure that CHCC's network has the capability and capacity to support the electronic transport of all health IT products adopted by CORHIO.

c. Explain how the supported network has supported the Nationwide Health Information Network (NHIN) architecture by coordinating activities with organizations performing NHIN trial implementations;
CHCC management tracks the activities of the Office of the National Coordinator for Health Information Technology with particular interest to initiatives, events, and standards that impact the *transport* of HIT. Specific interaction with NHIN trial implementations will be reported in future quarterly reports.

d. Explain how the supported network has used resources available at HHS's Agency for Healthcare Research and Quality (AHRQ) National Resource Center for Health Information Technology;
CHCC management tracks the activities of the AHRQ regarding initiatives, events, and standards that impact the transport of HIT, i.e., telecommunications. Specific interactions with AHRQ will be reported in

future quarterly reports. It is noted that CORHIO has completed a Point of Care Inquiry system, a 5-year, $5 million project funded by the Agency for Healthcare Research and Quality (AHRQ).

e. Explain how the selected participant has educated themselves concerning the Pandemic and All Hazards Preparedness Act and coordinated with the HHS Assistant Secretary for Public Response as a resource for telehealth inventory and for the implementation of other preparedness and response initiatives; and
CHCC has formed an Oversight Advisory Board which will help to coordinate our program with the Act and HHS. We will report progress in future quarterly reports.

f. Explain how the supported network has used resources available through HHS's Centers for Disease Control and Prevention (CDC) Public Health Information Network (PHIN) to facilitate interoperability with public health and emergency organizations.
The CHCC Oversight Advisory Board (OAB) also is responsible for advising on interoperability with public health and emergency organizations. To date, coordination with the CDC and PHIN is through our member institution, Denver Health. Denver Health is Colorado's primary "safety net" institution for health care in Colorado. Denver Health includes the Rocky Mountain Regional Trauma Center and the Rocky Mountain Center for Medical Response to Terrorism. We are planning to work with the Colorado Hospital Association's Emergency Preparedness Program to develop a strategic plan for utilization of the CHCC network which we will report on in future quarterly report.

12. Explain how the selected participants coordinated in the use of their health care networks with the Department of Health and Human Services (HHS) and, in particular, with its Centers for Disease Control and Prevention (CDC) in instances of national, regional, or local public health emergencies (e.g., pandemics, bioterrorism). In such instances, where feasible, explain how selected participants provided access to their supported networks to HHS, including CDC, and other public health officials.
This is a pending objective of CHCC. It is on the action agenda of the CHCC Oversight Advisory Board (OAB). Action item detail includes establishing formal liaison with HHS and CDC, including secure access to our network.

	Addendum A - CHCC Quarterly Report Participant List
