Dear Sir: Re: Docket #87-268

I was very disturbed to read in our paper this week that you are considering proposing rules which would destroy a network of broadcasting in North Central Washington State. I receive my TV via antenna. I am against changing the frequencies which would affect our receiving a rebroadcasting of KREM, KXLY, KHQ, KSPS and KAYU. There are many places in our area which can only receive TV via antenna since they are not serviced by any cable companies.
