# Universal Service Monitoring Report

2018

## Introduction and Summary

This is the twenty-first report in a series prepared by federal and state staff members for the Federal-State Joint Board on Universal Service (Universal Service Joint Board).<sup>1</sup> Unless otherwise noted, this report is generally based on information available to us as of September 2018. This report is focused on monitoring the impact of various universal service support mechanisms and the method used to finance them. This report is part of a monitoring program created by the Federal Communications Commission in 1997.<sup>2</sup>

The *Monitoring Report* incorporates data from several sources, including the National Exchange Carrier Association (NECA) and the Universal Service Administrative Company (USAC). USAC collects information from both contributors to, and beneficiaries of, the Universal Service Fund, including incumbent local exchange carriers (ILECs), competitive eligible telecommunications carriers (CETCs), schools, libraries and health care providers. NECA, at the direction of the Commission, provides information to USAC used to administer certain aspects of the high-cost program.

Section 1 of the report provides an update on industry revenues, universal service program funding requirements, and contribution factors. Sections 2 through 5 provide the latest data on the low-income, high-cost, schools and libraries, and rural health care support mechanisms. Section 6 presents recent Census and Bureau of Labor Statistics data on voice telephony subscribership and expenses taken from the Current Population Survey, the American Community Survey and the Consumer Expenditure Survey as well as data on telephone subscribership by income by state. It also includes data on residential Internet subscribership and expenses. Section 7 includes updated Consumer Price Index data.

This entire report is available electronically in page image (.pdf) format through the FCC's Federal-State Joint Board Monitoring Reports website, located at <http://www.fcc.gov/encyclopedia/federal-state-joint-board-monitoring-reports>. The tables of the report are also available separately as spreadsheet files in a single compressed (.zip) format file at this site. The *Monitoring Report* is published once a year. Information received well in advance of the next *Monitoring Report* will be made available on an interim basis in separate staff reports or in raw data files (such as most NECA filings used in the *Monitoring Report*) on the Office of Economics and Analytics Statistical Reports Internet site.

Supplementary material is available in a single compressed (.zip) format file at <http://www.fcc.gov/encyclopedia/federal-state-joint-board-monitoring-reports>. The contents of this file are provided at the end of this introduction.

We continue to look for ways to present universal service data in a way that is useful for the public. We have broken out ACAM and legacy carriers 1) in Section 3 (Tables 3.1 and 3.2) to provide additional

---

<sup>1</sup> The last report was released in April 2018. *Universal Service Monitoring Report*, 2017, CC Docket No. 96-45 et al. (Data Received Through September 2017) available at <https://www.fcc.gov/general/federal-state-joint-board-monitoring-reports>.

<sup>2</sup> In 1997, the Commission adopted rules to implement section 254 largely based on the recommendations of the Universal Service Joint Board and delegated to the Common Carrier Bureau (the predecessor to the Wireline Competition Bureau), in consultation with the state staff, the creation of a new monitoring program to replace a similar program in CC Docket No. 87-339 that previously resulted in a series of nineteen *Monitoring Reports*. *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, 12 FCC Rcd 8776, 9218, para. 869 (1997) (*Universal Service First Report and Order*). See 47 C.F.R. § 54.702(i).

information on high-cost support fund history for Rate-of-Return carriers, and 2) in Section 6 (Table 6.13) to provide additional information on switched access lines and interconnected VoIP subscribers for Rate-of-Return carriers. Table 6.10 has been expanded to include five years of residential high-speed internet subscribership by State.

We invite questions or comments on this report via email at [OEA-IADreports@fcc.gov](mailto:OEA-IADreports@fcc.gov) with subject: December 2018 Monitoring Report.

## Section 1 - Revenues and Contributions

---

### Overview – Revenues and Contributions

In response to the Telecommunications Act of 1996, the Commission established universal service mechanisms to help ensure that all Americans have access to affordable telecommunications service. Congress mandated that these programs be supported by contributions from every telecommunications carrier that provides interstate telecommunications, and other providers of telecommunications services if the Commission finds contributions from such providers to be in the public interest. The tables in this section provide an overview of the revenues of the U.S. telecommunications industry and the associated contributions to the universal service support mechanisms. The tables are based on information filed with the Commission in FCC Forms 499-A and 499-Q. To the extent that certain telecommunications industry revenues are not subject to contributions, such revenues may not be fully captured in these tables.

Additional information about the revenues collected to support universal service can be found on the Commission's website at <http://www.fcc.gov/encyclopedia/contribution-methodology-administrative-filings> and on USAC's website at <http://www.usac.org/cont/default.aspx>. Please note that the information provided in this report is based upon Commission rules in effect in 2017.

## Footnotes to Table 1.1

<sup>1</sup> Dollar amounts are calculated using the sum of Lines 303a, 308a (Federal and State USF Support Revenues), and Line 404a from Form 499-A.

<sup>2</sup> Dollar amounts are calculated using the sum of Lines 306a and 407a from Form 499-A.

<sup>3</sup> Dollar amounts are calculated using the sum of Lines 305a and 406a from Form 499-A.

<sup>4</sup> Dollar amounts are calculated using the sum of Lines 307a and 408a from Form 499-A.

<sup>5</sup> Dollar amounts are calculated using Line 405a from Form 499-A. As of 2012, includes Access Recovery Charge (ARC).

<sup>6</sup> Dollar amounts are calculated using Line 304a from Form 499-A.

<sup>7</sup> Dollar amounts are calculated using the sum of Lines 309a, 409a, and 410a from Form 499-A.

<sup>8</sup> Dollar amounts are calculated using the sum of Lines 310a, 411a, 412a, and 413a from Form 499-A.

<sup>9</sup> Dollar amounts are calculated using the sum of Lines 311a and 414a from Form 499-A.

<sup>10</sup> Dollar amounts are calculated using the sum of Lines 312a and 415a from Form 499-A.

<sup>11</sup> Dollar amounts are calculated using the sum of Lines 313a, 314a, 416a, and 417a from Form 499-A.

<sup>12</sup> The surcharge figure indicates only surcharges that have been explicitly reported as such in Form 499-A and does not account for implicit surcharge revenues where carriers collect the surcharge through higher prices.

<sup>13</sup> Dollar amounts are calculated using Line 403a from Form 499-A.

<sup>14</sup> Subtotal includes surcharge.

<sup>15</sup> Dollar amounts are calculated using Line 418a from Form 499-A.

*Note* : Detail may not add to totals due to rounding.

*Source* : FCC Form 499-A based on filings as of September 21, 2018.

## Footnotes to Table 1.2

<sup>1</sup> Data include revenues for *de minimis* filers, as well as for other carriers that are exempt from universal service contribution requirements.

<sup>2</sup> Wholesale revenues are reported on the FCC Form 499-A as sales to other universal service contributors for resale. This includes, for example, access services that local exchange carriers provide to toll carriers. Sales to *de minimis* resellers, end-user customers, government-only providers, international-only providers, and any other non-contributors are treated as end-user revenues. Filers contribute to the universal service funding mechanisms based on their end-user interstate and international revenues. *See* Table 1.5 for further details on the USF contribution base.

<sup>3</sup> Payphone revenues and interconnected Voice over Internet Protocol (VoIP) revenues are included with local service revenues in this table.

<sup>4</sup> Dollar amounts are calculated using the sum of Lines 303a to 308a from Form 499-A.

<sup>5</sup> Dollar amounts are calculated using Line 309a from Form 499-A.

<sup>6</sup> Dollar amounts are calculated using the sum of Lines 310a to 314a from Form 499-A.

<sup>7</sup> Dollar amounts are calculated using the sum of Lines 303a to 314a, minus the sum of Lines 303d to 314d, minus the sum of Lines 303e to 314e from Form 499-A.

<sup>8</sup> Revenues from calls that both originate and terminate in foreign points are reported as end-user revenues and are included in this table, but are not included in the universal service contribution base. This line best represents the USF contribution base, which is further described in Table 1.5.

<sup>9</sup> Dollar amounts are calculated using the sum of Lines 303d to 314d, plus the sum of Lines 303e to 314e from Form 499-A.

<sup>10</sup> Dollar amounts are calculated using the sum of Lines 404a to 408a from Form 499-A.

<sup>11</sup> Dollar amounts are calculated using the sum of Lines 409a and 410a from Form 499-A.

<sup>12</sup> Dollar amounts are calculated using the sum of Lines 411a to 417a from Form 499-A.

<sup>13</sup> Dollar amounts are calculated using Line 403a from Form 499-A. Surcharges are contribution amounts passed through to end users.

<sup>14</sup> Dollar amounts are calculated using the sum of Lines 403a to 417a, minus the sum of Lines 403d to 417d, minus the sum of Lines 403e to 417e from Form 499-A.

<sup>15</sup> This line best represents the USF contribution base, which is further described in Table 1.5. Dollar amounts are calculated using the sum of Lines 403d to 417d, plus the sum of Lines 403e to 417e from Form 499-A. This is different from billed interstate and international end user revenue, which does not include international-to-international revenues and uncollected revenues.

*Note* : Detail may not add to totals due to rounding.

<b>Total Telecommunications Revenues</b>		<b>119,375</b>	<b>63,543</b>	<b>182,918</b>
	Total Non-Telecommunications Revenues <sup>15</sup>	219,011	102,587	321,597
<b>Total Reported Revenues</b>		<b>\$ 338,386</b>	<b>\$ 166,130</b>	<b>\$ 504,516</b>

<sup>1</sup> The "Top 5 Affiliated Entities" are those with the greatest revenues as defined by Line 419a, which includes Lines 303a to 314a and Lines 403a to 418a on Form 499-A. These companies are (in alphabetical order): AT&T Inc., CenturyLink, Deutsche Telekom AG, SoftBank Corporation, and Verizon Communications. The affiliated entity structure is current as of year-end 2017.

<sup>2</sup> Dollar amounts are calculated using the sum of Lines 303a and 404a from Form 499-A.

<sup>3</sup> Dollar amounts are calculated using the sum of Lines 306a and 407a from Form 499-A.

<sup>4</sup> Dollar amounts are calculated using the sum of Lines 305a and 406a from Form 499-A.

<sup>5</sup> Dollar amounts are calculated using the sum of Lines 307a and 408a from Form 499-A.

<sup>6</sup> Dollar amounts are calculated using Line 308a from Form 499-A.

<sup>7</sup> Dollar amounts are calculated using Line 405a from Form 499-A. As of 2012, this amount also includes the Access Recovery Charge.

<sup>8</sup> Dollar amounts are calculated using Line 304a from Form 499-A.

<sup>9</sup> Dollar amounts are calculated using the sum of Lines 309a, 409a, and 410a from Form 499-A.

<sup>10</sup> Dollar amounts are calculated using the sum of Lines 310a, 411a, 412a, and 413a from Form 499-A.

<sup>11</sup> Dollar amounts are calculated using the sum of Lines 311a and 414a from Form 499-A.

<sup>12</sup> Dollar amounts are calculated using the sum of Lines 312a and 415a from Form 499-A.

<sup>13</sup> Dollar amounts are calculated using the sum of Lines 313a, 314a, 416a, and 417a from Form 499-A.

<sup>14</sup> Dollar amounts are calculated using Line 403a from Form 499-A.

<sup>15</sup> Dollar amounts are calculated using Line 418a from Form 499-A.

*Note* : Detail may not add to totals due to rounding.

**Table 1.4**  
**Telecommunications Revenue Reported on FCC Form 499-Q: 2016 - 2018**  
**(in Millions of Dollars)**

Data from FCC Form 499-Q			All Filers	LIRE Exemption <sup>1</sup>	Total Less LIRE
<b>Projected Revenues for 2016</b>	Interstate and International <sup>2</sup>	Retail (End User) Billed <sup>3</sup>	61,506		
		Retail Net of Uncollectibles <sup>4</sup>	60,955	(2,446)	58,509
		Implied Uncollectible Rate	0.9%		
<b>Historical Revenues Reported for 2016</b>	Intrastate, Interstate, and International	Wholesale (Carrier's Carrier) Billed <sup>5</sup>	50,246		
		Retail (End User) Billed	148,259		
		Total Revenue	198,505		
	Interstate and International	Retail (End User) Billed	60,071		
<b>Projected Revenues for 2017</b>	Interstate and International	Retail (End User) Billed	56,366		
		Retail Net of Uncollectibles	55,800	(2,152)	53,649
		Implied Uncollectible Rate	1.0%		
<b>Historical Revenues Reported for 2017</b>	Intrastate, Interstate, and International	Wholesale (Carrier's Carrier) Billed	45,059		
		Retail (End User) Billed	136,393		
		Total Revenue	181,452		
	Interstate and International	Retail (End User) Billed	55,716		
<b>Projected Revenues for 2018</b>	Interstate and International	Retail (End User) Billed <sup>6</sup>	53,217		
		Retail Net of Uncollectibles <sup>7,8</sup>	52,855	(1,861)	50,994
		Implied Uncollectible Rate	0.7%		
<b>Historical Revenues Reported for First Half of 2018</b>	Intrastate, Interstate, and International	Wholesale (Carrier's Carrier) Billed <sup>9</sup>	22,617		
		Retail (End User) Billed <sup>10</sup>	64,855		
		Total Revenue	87,473		
	Interstate and International	Retail (End User) Billed <sup>11</sup>	26,896		

<sup>1</sup> A provider receives the Limited International Revenue Exemption (LIRE) and its international revenues are excluded from the contribution base if the total amount of interstate end-user revenues for the filing entity, consolidated with all affiliates, is less than 12% of the total of interstate and international end-user revenues for the filing entity consolidated with all affiliates. Affiliated filer entities who do not pass the 12% rule, but whose USF obligation exceeds its interstate revenue, may be considered for the LIRE exemption on a case by case basis. See 47 C.F.R. § 54.706(c). In addition, filers that provide only international services are exempt regardless of services offered by affiliates.

<sup>2</sup> Projected intrastate revenues are not reported on FCC Form 499-Q.

<sup>3</sup> Prior to 2014, this line was referred to as "Billed to End Users."

<sup>4</sup> Prior to 2014, this line was referred to as "Collected from End Users."

<sup>5</sup> Prior to 2014, this line was referred to as "Billed to Resellers."

<sup>6</sup> Dollar amounts for projected revenues billed to end users are calculated using the sum of Lines 119b and 119c from Form 499-Q.

<sup>7</sup> Dollar amounts for projected revenues collected from end users are calculated using the sum of Lines 120b and 120c from Form 499-Q.

<sup>8</sup> Dollar amounts for projected LIRE exempt revenues are calculated using the sum of Lines 120b and 120c in the Form 499Q filings from those filers who are LIRE-exempt.

<sup>9</sup> Dollar amounts for historical revenues billed to wholesaler is calculated using Line 115a from Form 499-Q.

<sup>10</sup> Dollar amounts for historical revenues billed to retail is calculated using Line 116a from Form 499-Q.

<sup>11</sup> Dollar amounts for interstate and international historical revenues billed to end users is calculated using the sum of Lines 116b and 116c from Form 499-Q.

*Note* : Detail may not add to totals due to rounding.

*Source* : FCC Form 499-Q as of September 21, 2018.

**Table 1.5**  
**USF Contribution Base by Year<sup>1</sup>: 2007 - 2017**  
(in Millions of Dollars)

	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017
<b>Revenues Subject to USF Contribution</b>											
Billed interstate and international retail (end-user) revenues (includes Universal Service Surcharge) [Line 403 to Line 417, parts (d) and (e)]	\$81,235	\$80,956	\$75,988	\$72,292	\$70,323	\$70,037	\$68,399	\$66,942	\$63,930	\$60,181	\$55,733
less revenues for international-to-international services [ Line 412(e) ]	886	862	576	469	452	444	589	673	362	174	150
less international revenues of international-only filers and international revenues that were excluded because of the LIRE Exemption <sup>2</sup>	3,978	4,148	3,393	3,326	3,079	2,653	3,086	2,827	2,616	1,960	2,026
less interstate and other international revenues for filers who are de minimis or otherwise exempt from universal service support requirements	50	51	49	34	31	28	31	31	31	31	38
less uncollectible contribution base revenues [Line 422(d) + Line 422(e) ] <sup>3</sup>	1,301	1,131	1,075	960	787	709	610	527	470	427	356
<b>equals</b>	<b>\$75,020</b>	<b>\$74,764</b>	<b>\$70,895</b>	<b>\$67,503</b>	<b>\$65,971</b>	<b>\$66,203</b>	<b>\$64,083</b>	<b>\$62,884</b>	<b>\$60,451</b>	<b>\$57,590</b>	<b>\$53,163</b>

<sup>1</sup> This table shows the contribution base for the Universal Service Fund (USF), but the actual amounts used for determining contributions may differ due to the following factors: (1) Adjustments are made by the Administrator to account for additional and corrected filings received; (2) Exempt amounts were based on revenues and the filer type (i.e., principal business activity) information contained in the FCC Form 499-A filings; (3) The Administrator may use carrier type, revenue type, Line 603 exemption certifications, and additional information requested from filers to determine which filers are required to contribute; (4) The Administrator bills delinquent filers based on estimated revenues and may, in some instances, include estimated revenue amounts in contribution base amounts; (5) The universal service contribution factors are set quarterly based on FCC Form 499-Q filings; and (6) FCC Form 499-A data are used for true-up and auditing purposes. As a result of these factors, actual contribution bases have been based on different amounts than those shown.

<sup>2</sup> A provider receives the Limited International Revenue Exemption (LIRE) and its international revenues are excluded from the contribution base if the total amount of interstate end-user revenues for the filing entity consolidated with all affiliates is less than 12% of the total of interstate and international end-user revenues for the filing entity consolidated with all affiliates. Affiliated filer entities who do not pass the 12% rule, but whose USF obligation exceeds its interstate revenue may request to be considered for the LIRE exemption on a case by case basis. See 47 C.F.R. § 54.706(c). In addition, filers that provide only international services are exempt regardless of services offered by affiliates.

<sup>3</sup> Does not include uncollectible amounts associated with filers who are de minimis or LIRE exempt.

*Note* : Detail may not add to totals due to rounding. Revisions have been made for 2007.

*Source* : FCC Form 499-A based on filings as of September 21, 2018.

**Table 1.7**  
**Billed Interstate and International Retail Telecommunications Revenues<sup>1</sup> by**  
**Top 5 Affiliated Entities vs. Other Companies: 2009 - First Half 2018**  
**(in Millions of Dollars)**

	<b>Top 5 Affiliated Entities<sup>2</sup></b>	<b>Other Companies</b>	<b>Total</b>	<b>Top 5 Share</b>
2009	\$54,503	\$21,485	\$75,988	72 %
2010	51,655	20,637	72,292	71
2011	50,412	19,911	70,323	72
2012	49,795	20,242	70,037	71
2013	48,530	19,870	68,399	71
2014	46,870	20,072	66,942	70
2015	43,682	20,247	63,930	68
2016	40,013	20,169	60,182	66
2017	38,888	16,844	55,733	69
First Half 2018 <sup>3</sup>	18,511	8,385	26,896	69

<sup>1</sup> Revenues for 2011 - 2018 are calculated as the sum of Lines 403d to 417d (interstate end user revenue) and 403e to 417e (international end user revenue) from Form 499-A. Previous years were calculated as the sum of Lines 403d to 417d (interstate end user revenue) and 403e to 417e (international end user revenue), minus Lines 412e, 422d, and 422e.

<sup>2</sup> The "Top 5 Affiliated Entities" are the five affiliated entities with the greatest revenues as defined by Line 419a, which is the sum of Lines 303a to 314a and Lines 403a to 418a, and is determined as of each year-end affiliate structure. These companies for 2009 and 2010 are (in alphabetical order): AT&T Inc., Deutsche Telekom AG, Qwest Services Corp., Sprint Nextel Corporation, and Verizon Communications. These companies for 2011 to 2012 are (in alphabetical order): AT&T Inc., CenturyLink, Deutsche Telekom AG, Sprint Nextel Corporation, and Verizon Communications. These companies for 2013 - 2018 are (in alphabetical order): AT&T Inc., CenturyLink, Deutsche Telekom AG, SoftBank Corporation (which acquired Sprint Nextel Corporation in June 2013), and Verizon Communications.

<sup>3</sup> Preliminary revenues are calculated using Line 116b plus Line 116c for each quarter in FCC Form 499-Q.

*Note* : Detail may not add to totals due to rounding.

*Source* : Data for 2009 through 2017 are based on Form 499-A filings as of September 21, 2018. Data for 2018 are based on FCC Form 499-Q filings as of September 21, 2018.

Notes : Figures may not add due to rounding.

<sup>1</sup> Data are from USAC.

<sup>2</sup> High-cost support excludes penalties from Mobility Fund and includes recovered forfeited funds for CAF-Phase I Support.

<sup>3</sup> Contributions include administrative cost of approximately \$203 million, as shown in USAC's Annual Report. Allocation of contributions among states is an FCC staff estimate. See the Technical Appendix at <http://www.fcc.gov/encyclopedia/federal-state-joint-board-monitoring-reports>.

<sup>4</sup> Net dollar flow is positive when payments from USF to carriers exceed contributions to USF. Total is negative because of administrative expenses.

*Notes :* Figures may not add due to rounding. The figures used in this table are for the calendar year and include disbursements that were committed over several years but paid out in the respective calendar year. In Sections 4 and 5, figures for the Schools and Libraries program and the Rural Health Care program are reported based on fiscal year rather than calendar year. High-cost support excludes penalties for Mobility Fund and includes recovered forfeited funds for CAF-Phase I Support.

<sup>1</sup> In the *USF/ICC Transformation Order*, the Commission converted support received by price cap carriers and their rate-of-return affiliates, including: IAS, HCMS, ICLS, LSS, and HCLS, to CAF Phase I Frozen Support. *USF/ICC Transformation Order*, paras. 128-157.

<sup>2</sup> In the *USF/ICC Transformation Order*, the Commission froze support received by competitive ETCs, including IAS, HCMS, ICLS, LSS, and HCLS at 2011 levels, effective January 1, 2012, and began phasing the frozen support down effective July 1, 2012. *USF/ICC Transformation Order*, paras. 498-532.

<sup>3</sup> In the *USF/ICC Transformation Order*, the Commission created the Connect America reserve to be used to manage fluctuations in high-cost demand. *USF/ICC Transformation Order*, paras. 547-556. Subsequently, in 2016, in the *Rate-of-Return Reform Order*, the Commission directed USAC to eliminate the CAF reserve and to combine those funds with the high-cost account. *Connect America Fund et al.*, WC Docket No. 10-90 et al., Report and Order, Order and Order on Reconsideration and Further Notice of Proposed Rulemaking, 31 FCC Rcd 3087, 3111, paras. 17-79, n.130 (2016) (*Rate-of-Return Reform Order*).

<sup>4</sup> Interest income is shown as negative because it is subtracted from expenses to yield the total.

Source : Support mechanism data are from USAC Appendix M02 from pertinent filings as shown at <http://www.usac.org/about/tools/fcc/filings/default.aspx>. Contribution factor information is available at <https://www.fcc.gov/encyclopedia/contribution-factor-quarterly-universal-service-fund-usf-management-support>.

## Section 2 – Lifeline (Low Income)

---

### Overview – Lifeline and Link Up Programs for Low-Income Consumers

Since 1985, the Universal Service Lifeline program has provided a discount on phone service for qualifying low-income consumers to ensure that all Americans have the opportunities and security that phone service brings, including being able to connect to jobs, family and emergency services. Recently, the Commission has made ensuring the availability of broadband service for low-income Americans a goal of the Lifeline program. In 2016, the Commission adopted an order to comprehensively reform the Lifeline program. Among other things, the Commission included broadband as a supported service in the Lifeline program, set out minimum service standards for Lifeline-supported services, and directed USAC to establish a National Eligibility Verifier to make independent subscriber eligibility determinations. As of May 2019, the National Verifier has launched in 27 states and territories, and USAC is planning additional launches in the remaining states and territories throughout 2019.

The Lifeline program is available to eligible low-income consumers in every state, territory, commonwealth, and on Tribal lands. The Link Up program offsets the cost of service activation to qualifying low-income households. Since 2013, Link Up has been available only on Tribal lands. Consumers with proper proof of eligibility may be qualified to enroll. To participate in the Lifeline or Link Up program, consumers must have an income that is at or below 135% of the Federal Poverty Guidelines or participate in a qualifying assistance program. The Lifeline and Link Up programs are administered by the Universal Service Administrative Company (USAC).

Additional information about the Lifeline program can be found on the Commission’s website at <http://www.fcc.gov/lifeline> and on USAC’s website at <http://www.usac.org/li/>. Please note that the information provided in this report is based upon the program rules through June 2018.

2017	10,469	293	10,763	0	11	11

*Note :* The Lifeline subscribers and Link Up beneficiaries represent USAC data for the time period January through December, including true-ups reported through September 2018. Data for 2011-2016 were revised because carriers can revise their filings. When carriers revise their line counts up, they receive more support and when carriers revise their line counts down, they receive less support.

<sup>1</sup> Subscriber data were not collected in 1997. Lifeline subscribership data were estimated by USAC. Link up data were not estimated.

*Source :* Universal Service Administrative Company.

Note : Data for 2011-2016 were updated to account for true-ups.

<sup>1</sup> Effective in 1998, the federal Lifeline support mechanism was expanded so that a basic level of assistance would be provided in all states. Further, the basic level of federal support was increased in 1998.

<sup>2</sup> Tribal Lifeline subscribers also receive General support which is currently \$9.25 per subscriber. This amount is not included in Additional Tribal support.

<sup>3</sup> TLS is an abbreviation for toll limitation service.

<sup>4</sup> Carriers no longer charge a residential Presubscribed Interexchange Carrier Charge (PICC) as of July 1, 2000.

Non-facilities based carriers have either submitted a compliance plan with the FCC that they are not a facilities-based provider or have been approved to be a non-facilities-based provider by the FCC. Other carriers are assumed to be facilities-based.

## Section 3 – Connect America Fund (High Cost)

---

### Overview – Connect America Fund Program

The federal universal service Connect America Fund program (formerly High-Cost Support) is designed to ensure that consumers in rural, insular, and high-cost areas have access to modern communications networks capable of providing voice and broadband service, both fixed and mobile, at rates that are reasonably comparable to those in urban areas. The program fulfills this universal service goal by allowing eligible carriers who serve these areas to recover some of their costs from the federal USF. In 2011, the Commission adopted the *USF/ICC Transformation Order*, which comprehensively reformed and modernized the high-cost program to support networks capable of providing both voice and broadband services.<sup>1</sup> Among other actions taken in the *USF/ICC Transformation Order*, the Commission adopted a framework, known as the Connect America Fund (CAF).<sup>2</sup>

For price-cap areas (those areas of the United States and its territories historically served by larger incumbent local exchange carriers (ILEC)), there are several CAF programs: CAF Phase I (completed); CAF Phase II (model-based support), CAF Inter-carrier Compensation (CAF ICC), the Rural Broadband Experiments, and the CAF Phase II auction.

For rate-of-return areas (typically the more rural parts of the United States), the Commission established two paths for providers to receive high-cost support for building, supporting and maintaining voice and broadband networks — 1) model-based support as determined by the Alternative Connect America Cost Model (A-CAM) or 2) legacy cost-based mechanisms as reformed to allow support for standalone broadband connections.<sup>3</sup> The Commission also created an Alaska Plan to fund voice and broadband services for rate-of-return carriers serving Alaska, due to their unique challenges.<sup>4</sup>

As in the 2017 Report, all support dollar values in these tables reflect claims<sup>5</sup> as opposed to disbursements.<sup>6</sup> These claims are subject to true-ups. For example, claims for support in 2015 may be true-up in 2015; such a true-up is reflected in the year supported (2012), not in the year the true-up was made (2017). Data on changes in local exchange carriers and High-Cost ILEC support data by study area are available at <http://www.fcc.gov/encyclopedia/neca-usac-data-0>. Please note that the information provided in this report is based upon the program rules through June 30, 2018.

---

<sup>5</sup> A “claim” is the distribution of funds *in support of a specified time period*. These funds were distributed in that period and possibly a later time period. The disbursements in later time periods are the result of true-ups to resolve differences between initial payments and disbursements necessitated by revisions to supporting data made at that later date. Claims are positive values with the possible exceptions of CAF Intercarrier Compensation (CAF ICC) support and Connect America Cost Model (CACM) support. CAF ICC claims can be negative when a study area’s actual access recovery charge revenues in the prior two years substantially exceed the forecasted amount. Some CACM initial claims were negative as a result of true-ups when Frozen High Cost support exceeded CACM support.

<sup>6</sup> A “disbursement” is the distribution of funds in a specified time period. These funds were distributed in support of high-cost mechanisms in that period and possibly in support of earlier time periods. The disbursements in support of earlier time periods are the result of true-ups to resolve differences between initial payments and disbursements necessitated by revisions to supporting data. It is possible for disbursements to be negative, thus requiring the recipient to return dollars to the high-cost fund. Some negative disbursements are penalties (see the file “HC Penalties” in the Supplementary Material). Penalties are not included in claims.

<sup>1</sup> This column refers to "affiliate name" rather than "holding company" so as to include all entities under common ownership or control, to the extent this information is readily available to the Commission. In most cases, the "affiliate name" is reported by the entity or entities in FCC Form 477. Affiliate groups appear on this list if they are in the top 10 for any of the presented years.

<sup>2</sup> In the *USF/ICC Transformation Order*, the Commission eliminated the rule providing identical support to CETCs, determining the rule did not provide an "appropriate level of support for the efficient deployment of mobile services in areas that do not support a private business case for mobile voice and broadband." *Connect America Fund et al., WC Docket No. 10-90 et al., Report and Order and Further Notice of Proposed Rulemaking*, 26 FCC Rcd 17666, 17851-59, para. 502 (2011), *aff'd* In re: FCC 11-161, 753 F.3d 1015 (10th Cir. 2014). The Commission, however, transitioned the elimination of that support over five years, beginning on July 1, 2012. *See USF/ICC Transformation Order*, 26 FCC Rcd at 17853, para. 513. This phase down of support for competitive ETCs was halted at 40 percent on June 30, 2014 under the terms adopted in the *USF/ICC Transformation Order* because the Mobility Fund Phase II is not yet operational. *See id.* at 17832, para. 519.

<sup>3</sup> Verizon Wireless and Sprint Nextel, in separate transactions in 2008, each committed to phase down their CETC high-cost universal service support in 20 percent increments over five years, beginning in 2009. These commitments were not implemented until the Commission released an Order on August 31, 2010 providing guidance to the Universal Service Administrative Company regarding the methodology to achieve those commitments. *See High-Cost Universal Service Support, Federal-State Joint Board on Universal Service, Request for Review of Decision of Universal Service Administrator by Corr Wireless Communications, LLC, WC Docket No. 05-337, CC Docket No. 96-45, Order and Notice of Proposed Rulemaking*, 25 FCC Rcd 12854 (2010). To the extent that Verizon Wireless received support prior to the August 31, 2010 Order that should have been surrendered under its commitment, USAC reclaimed that support in 2010 and 2011.

<sup>4</sup> Telapex, Inc. owns C Spire Wireless.

## Section 4 – E-Rate (Schools and Libraries)

---

### Overview – Schools and Libraries Program

The Schools and Libraries universal service support program, commonly known as the E-Rate program, helps schools and libraries obtain affordable broadband Internet access, internal network connections, and telecommunications services.

Eligible schools, school districts and libraries may apply individually or as part of a consortium. Funding may be requested under two categories of eligible services: category one services to a school or library (e.g., data transmission services and Internet access), and category two services that deliver Internet access within schools and libraries (e.g., internal connections, basic maintenance of internal connections, and managed internal broadband services). Discounts for support depend on the level of poverty, as calculated by eligibility for a free or reduced price lunch or other federally-approved alternative mechanism, and whether the school or library is located in an urban or rural area. The discounts range from 20 percent to 90 percent of the costs of eligible services. E-Rate program funding is based on demand up to an annual Commission-established cap, which is \$4.06 billion for 2018 and is adjusted annually for inflation.

The E-Rate program is administered by the Universal Service Administrative Company (USAC) under the direction of the FCC. Specifically, USAC is responsible for processing the applications for support, confirming eligibility, and reimbursing service providers and eligible schools and libraries for the discounted services. USAC also ensures that the applicants and service providers comply with the E-Rate rules and procedures established by the FCC.

Additional information about the Schools and Library program can be found on the Commission's website at <http://www.fcc.gov/encyclopedia/e-rate-schools-libraries-usf-program> and on USAC's website at <http://www.usac.org/sl/>.

*Note* : Activity through June 30, 2018. Funding Year 2018 commitment and disbursement information have not been displayed because only a small fraction of commitments (and no disbursements) have been made for that funding year. A substantial amount of commitments and disbursements for funding year 2018 will be made. Also, because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Disbursements may also continue beyond the end of the program year in the event of delayed internal connections installation. Other adjustments and corrections may also be made.

<sup>1</sup> Starting in fund year 2016, Libraries includes both Library and Library System applicants.

*Source* : Universal Service Administrative Company

<sup>2</sup> Starting January 2011, applicants could designate their consortium as a statewide entity if the application encompassed all public schools, private schools and/or all public libraries in the state. *See* [http://hraunfoss.fcc.gov/edocs\\_public/attachmatch/DA-10-2218A1.pdf](http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-2218A1.pdf). In 2016, applicants filing as a consortium, school district, and library system could designate their sub-type as a statewide entity. These applicant's commitments and disbursements are included within their primary applicant type column and are not included in the Statewide Contract column.

*Note :* Activity through June 30, 2018. Unlike in Table 4.1, all commitments and disbursements have been included, including those in funding year 2018. Because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Also, disbursements may continue beyond the end of the program year in the event of delayed internal connections installation. Other adjustments and corrections may also be made.

## Section 5 – Rural Health Care

---

### Overview – Rural Health Care Program

The Rural Health Care (RHC) Program provides funding to eligible public or non-profit health care providers for broadband and telecommunications services necessary for the provision of health care. The goal of the program is to improve the quality of health care available to patients in rural communities by ensuring that eligible public or non-profit health care providers have access to broadband and telecommunications services. RHC Program support is provided on a funding year basis. Funding years run from July 1 through June 30 of the subsequent year. Beginning in funding year (FY) 2017, funding for the RHC Program is capped at \$571 million and annually adjusted for inflation beginning in FY2018. Prior to FY2017, the RHC Program cap was \$400 million. The RHC Program is administered by the Universal Service Fund (USF) administrator, the Universal Service Administrative Company (USAC), under the direction of the Commission.

The RHC Program provides funding through two programs: the Telecommunications (Telecom) Program and the Healthcare Connect Fund Program. The Telecom Program, established in 1997, ensures that rural health care providers pay no more than their urban counterparts for telecommunications services. Specifically, an applicant's program support is based on the difference between rural rates charged for telecommunications services in the rural areas where the health care provider is located, and the urban rates charged for similar telecommunications services in the State. The rural health care provider pays only the urban rate for the telecommunications service, and the USF pays the difference between the urban rate and rural rate for the service to the service provider – in effect, providing a discount to the health care provider in the amount of the "rural-urban differential." The Healthcare Connect Fund Program, established in 2012, provides a flat 65% discount on an array of communications services to both individual rural health care provider and consortia, which can include non-rural health care providers (if the consortium has a majority of rural sites). These services include Internet access, dark fiber, business data, traditional DSL, and private carriage services. With the Healthcare Connect Fund Program, the Commission intended to promote the use of broadband services and facilitate the formation of healthcare provider consortia recognizing the increasing need for rural health care providers to have access to specialists who are often located in urban areas, as well as the advent of certain communications-based trends in healthcare delivery, such as the move towards electronic health records.

Additional information about the RHC Program can be found on the Commission's website at <http://www.fcc.gov/encyclopedia/rural-health-care> and on USAC's website at <http://www.usac.org/rhc/>.

*Note :* Activity through June 30, 2018. Funding Year 2018 commitment and disbursement information has not been displayed because by June 30, the data cutoff date for this report, no commitments or disbursements for funding year 2018 were made during that time. However, we anticipate that a substantial amount of commitments and disbursements for funding year 2018 will be made. Also, because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Disbursements may also continue beyond the end of the program year in the event of delayed internal connections installation. Other adjustments and corrections may also be made.

*Source :* USAC data.

## Section 6 – Subscribership

---

### Overview – Subscribership: Voice & Internet

Continuing analysis of telephone subscribership statistics allows one to examine the aggregate effects of Commission actions and industry evolution on households' decisions to maintain, acquire or drop telephone service. In addition to telephone subscribership statistics, recent surveys by the Census Bureau now also provide information about the subscribership of high-speed Internet services. Starting in 2016, this section includes telephone and internet expense statistics for lower income households. Starting in 2017, this section includes fixed broadband deployment and subscription information for ILECs. This chapter presents comprehensive data on telephone subscribership and expense statistics and information collected by the Bureau of the Census, the Bureau of Labor Statistics, and the FCC primarily through the American Community Survey (ACS), the Current Population Survey (CPS), the Consumer Expenditures Survey (CE), and FCC Form 477. The chapter also provides national and state-level estimates of high-speed Internet adoption based on the ACS. Along with telephone and high-speed Internet subscribership statistics for the nation and each of the states, data are provided on subscribership for various demographics. For telephone service, particular attention is given to subscribership and expenses for lower income households given the Commission's various low-income programs such as Lifeline.

To provide regular, high-quality data on telephone subscribership, the Commission requested that the Census Bureau include questions on telephone availability as part of its CPS, which monitors demographic trends between decennial censuses. The CPS is a staggered panel survey in which the people residing at particular addresses are included in the survey for four consecutive months in one year and the same four months in the following year. Use of the CPS has several advantages: it is conducted every month by an independent and expert agency, the sample is large, and the questions are consistent. Thus, changes in the results can be compared over time with a reasonable degree of confidence.

In addition to the CPS, the ACS also provides data for calculating a measure of telephone subscribership. The ACS replaced the decennial census long form and thus also provides a wealth of data and large sample sizes, though on a less frequent basis than the CPS. Whereas the CPS reports household subscribership, the ACS follows the design of past decennial censuses and reports telephone subscribership for occupied housing units. In this chapter, subscribership measures from the CPS, the ACS, and decennial censuses (prior to the ACS) are reported as complements to each other.<sup>1</sup>

While the ACS provides telephone subscribership data, the ACS now also provides data for calculating high-speed Internet subscribership. Specifically, the ACS for the first time in 2013 asked whether households have access to the Internet. The ACS asks, "At this house, apartment, or mobile home – do you or any member of this household access the Internet?" Statistics based on 2016 data from the ACS on high-speed Internet subscribership has been incorporated into this report. Since the ACS is conducted throughout the year, a 1-year average is calculated using the data.

---

<sup>1</sup> Subscribership statistics derived from the CPS cannot be directly compared with the subscribership estimates based on the responses to the long forms of the 1990 and 2000 decennial censuses or the ACS. This is due to differences in sampling techniques and survey methodologies as well as differences in the context in which the questions are asked. For example, the 2013 ACS reported 97.7% of all occupied housing units in the United States had telephone service available, whereas the March 2013 CPS data showed a household subscribership of 96.0%. This difference is statistically significant and may indicate that the CPS value is on the low side and the ACS value is on the high side, with the most probable value lying somewhere in between.

The specific questions regarding telephone availability asked in the CPS are: “Does this house, apartment, or mobile home have telephone service from which you can both make and receive calls? Please include cell phones, regular phones, and any other type of telephone.” And, if the answer to the first question is “no,” this is followed up with: “Is there a telephone elsewhere on which people in this household can be called?” If the answer to the first question is “yes,” the household is counted as having a telephone “in unit.” If the answer to either the first or second question is “yes,” the household is counted as having a telephone “available.” In contrast to the CPS, the ACS simply asks: “Does this house, apartment, or mobile home have telephone service from which you can both make and receive calls? Include cell phones.” Thus, the ACS question is most similar to the CPS’s “in unit” subscribership rather than “available”.

Although the CPS is conducted every month, not all questions are asked every month. The telephone questions are asked once every four months. The changes in the CPS estimates reflect changes over the preceding four months. Aggregated summaries of the responses are reported to the Commission, based on the surveys conducted through March, July, and November of each year. The ACS provides annual telephone subscribership statistics based on data collected monthly throughout the year.

The CPS data are based on a nationwide sample of about 50 to 60 thousand households in the 50 states and the District of Columbia. The CPS does not cover outlying areas that are not states, such as Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Northern Mariana Islands.<sup>2</sup> The ACS form is sent to approximately 250 thousand addresses per month, for a total of about 3 million addresses per year. The ACS covers the states, the District of Columbia, and Puerto Rico.

The questions and answer categories used to collect ACS data on computer and internet use were revised in 2016. The changes in high-speed internet subscribership may be due to the revised wording and improved measurement, rather than a result of changes in the internet use.

---

<sup>2</sup> Annual data for Puerto Rico have been available from the ACS starting with 2005. The percentage of occupied housing units with voice service for the last five years of available data are reported in Table 6.6.

<sup>1</sup> Housing Unit subscribership statistics are from the U.S. Census Bureau's *Historical Statistics of the United States, Colonial Times to 1970*, Part 2, page 783 (1920 - 1970); the decennial censuses (1980 - 2000); and the Census Bureau's American Community Survey (ACS) 1-year estimates (2001 - 2017).

<sup>2</sup> Household subscribership data (1990 - 2017) are annual averages from the U.S. Census based on the Current Population Survey. For 2018, July CPS data are used.

<sup>3</sup> Errata #53: released April 12, 2010, regarding 2008 ACS 1-year and 2006-2008 ACS 3-year estimates for household kitchen facilities and telephone service. Two errors were found affecting the 2008 ACS 1-year data and the 2006-2008 ACS 3-year data for telephone service. The errors involve the last two items in Question 8 on the housing section of the 2008 ACS questionnaire which asks whether the housing unit has telephone service (including cell phones). The error involved the incorrect capture of the responses to those items. It affected the estimates of householders who reported no telephone service, resulting in an underestimate of "no" responses and an increased imputation rate for both items. At the national level, the percent of households reporting no telephone service in 2008 was 1.8 percent; however, after correcting the data capture error, the percent reporting no telephone service is approximately 2.8 percent.

<sup>4</sup> ACS statistics for 2018 are not available.

**Table 6.12**  
**Telephone Service, Internet Access, Telephone Expenses, and Internet Expenses**  
**in Low-Income Households, 2017**

Percent of Low-Income Households with Telephone / Internet Services		
	Low-Income Group 1	Low-Income Group 2
Telephone Service	94.4	96.1
Internet Access	66.9	75.7

Low-Income Household Expenses for Telephone/Cellular Phone/Internet Services as a Percent of Total Expenses		
	Low-Income Group 1	Low-Income Group 2
<b>Telephone Expenses<sup>1</sup></b>		
All	2.9	3.4
With Expenses Only	3.3	3.8
<b>Cellular Phone Expenses</b>		
All	2.3	2.6
With Expenses Only	2.6	2.9
<b>Internet Expenses</b>		
All	1.0	1.2
With Expenses Only	1.6	1.9

All statistics between group 1 and group 2 are statistically significantly different at a confidence level of 99.9%.

*Note* : Group 1 contains occupied housing units where the household income is less than or equal to 135% of the 2017 Federal Poverty Guideline for the household. Group 2 contains occupied housing units where household income is greater than 135% of the Federal Poverty Guideline, but less than or equal to 200% of the Federal Poverty Guideline for that Household.

*Note* : Expenses are calculated for everyone in the income groups (All) and for only those who have telephone or internet expenses in the income groups (With Expenses Only).

*Note* : The 2016 Lifeline Modernization Order included affordability of voice and broadband service as a component of the program's goals and directed WCB to measure the extent to which voice and broadband service expenditures exceed two percent of low income consumers' disposable household income as compared to the next highest income group. *Lifeline and Link Up Reform and Modernization, et al.* , WC Docket No. 11-42 et al., Third Report and Order, Further Report and Order, and Order on Reconsideration, 31 FCC Rcd 3962, 4112, para. 408 (2016).

<sup>1</sup> The telephone expenses include residential phone service, VOIP, phone cards, and cellular phone service.

## Section 7 – Price Indices

---

### Overview – Price Indices

This section contains information on telephone price indices using data from the Consumer Price Index (CPI) maintained by the Bureau of Labor Statistics (BLS). The BLS collects information on telephone service as part of the CPI.<sup>1</sup> Monthly CPI data can be found on the Internet at [www.bls.gov/cpi/](http://www.bls.gov/cpi/). The monthly price indices represent prices sampled in the middle of the month.

The CPI for telephone services is based on a “market basket” intended to represent the telephone-related expenditures of a typical urban household. It includes both land-line telephone service and wireless telephone service. In January 2010, BLS discontinued collecting four land-line telephone indices, including local charges, long distance charges, interstate toll calls, and intrastate toll calls. These four indices were combined into a single land-line telephone service index, which began in December 2009.

The Producer Price Index (PPI), also published by BLS, continues to release sub-indices for telephone services. We no longer include them in this report because they have become less meaningful as the bundling of telephone services has become more common in the land-line telephone industry.<sup>2</sup>

---

<sup>1</sup> BLS publishes two sets of Consumer Price Indices. The CPI-U, used herein, is based on expenditures of all urban consumers. The CPI-W series is based on expenditures of urban wage earners and clerical workers.

<sup>2</sup> PPI data are available on the BLS website at [www.bls.gov/ppi/](http://www.bls.gov/ppi/).

**Table 7.1**  
**Long-Term Changes for Various Price Indices**  
**(Compound Average Growth Rate)**

	1969 - 2017	2007 - 2017
CPI All Items (SA0)	4.0	1.8
CPI All Services (SAS)	4.8	2.3
CPI Telephone Services (SEED)	1.4	- 0.6
CPI Major Categories:		
- Food & Beverages (SAF)	4.0	2.2
- Housing (SAH)	4.3	2.0
- Apparel (SAA)	1.6	0.2
- Transportation (SAT)	3.7	1.3
- Medical Care (SAM)	5.8	3.1
- Recreation (SAR)	*	0.6
- Other Goods & Services (SAG)	5.1	2.7
CPI Public Transportation (SETG)	4.4	1.4
CPI Utility (Piped) Gas Service (SEHF02)	4.7	- 2.1
CPI Electricity (SEHF01)	4.0	2.2
CPI Water & Sewerage Maint. (SEHG01)	6.0	5.4
CPI Postage (SEEC01)	4.4	3.2

\* Series not established until after 1969.

*Note* : The CPI Telephone Services index was revised in December of 1997. To calculate values in this table, Series MUUR0000SE270A is used for periods prior to this revision and CUUR0000SEED is used for periods after the revision. After each row, the series ID is provided and should be preceded by CUUR0000 when referencing the series.

*Note* : The Compound Annual Growth Rate is a smoothed rate of growth calculated in three steps. First, divide the ending value by the beginning value. Second, raise the result of that division to a power equal to one divided by the number of years in the period. Finally, subtract 1 from the result of the second step.

*Source* : Bureau of Labor Statistics.

**Table 7.2**  
**Annual Changes in CPI Telephone Services and All Items Indices**

	<b>All Goods and Services</b>	<b>Telephone Services</b>	<b>Land-line Telephone Services</b>	<b>Wireless Telephone Services</b>
<b>BLS Series ID</b>	CUUR0000SA0	CUUR0000SEED	CUUR0000SEED04	CUUR0000SEED03
2000	3.4	-2.3	*	-12.3
2001	1.6	1.3	*	-5.5
2002	2.4	0.2	*	0.3
2003	1.9	-2.7	*	-1.3
2004	3.3	-2.5	*	-1.4
2005	3.4	0.4	*	-1.5
2006	2.5	1.7	*	0.0
2007	4.1	2.1	*	-0.9
2008	0.1	2.9	*	0.5
2009	2.7	1.0	*	-1.1
2010	1.5	-0.9	2.2	-3.6
2011	3.0	-0.3	1.9	-2.3
2012	1.7	0.3	1.9	-0.8
2013	1.5	0.0	3.0	-2.0
2014	0.8	-2.1	1.8	-4.0
2015	0.7	0.7	2.2	0.0
2016	2.1	-2.8	0.9	-4.2
2017	2.1	-6.5	2.2	-10.2

\* Series not established until December 2009.

*Note :* Values report the percent change from December of the previous year through December of the year shown.
