DOCKET FILE COPY ORIGINAL

Dear secretary Dortch - (of Federal communications Commission - FCC) - This is a Public comment for - WC - Docket Number - 12-375 - Local calls - in-state (intrastate) - especially should be made Free or greatly reduced to 1¢ per 15 minutes, also All Prison and Jail phones should be able to have Toll Free Phone calls made From Them, none in California or Else where that I know of do This, Also interstate - (long distance) - Phone calls must be Further Greatly reduce or made Free or reduced to 1¢ per 15 minutes From Jails and Prisons - This will Greatly Move To Take The Profit out of Prison - corporations states, city and county's, Jail and Prison systems have For long enough gain from the Poor and ignorant persons caught up by Fodish mistakes deliberate or intentional and Ended up in Jail or prison and Exploited and Taken advantage of in Every conceivable way - The current reduced capped rates on Long Distance calls is alright but not good enough, 10's of millions of lives have been destroyed and driven in to poverty - by not being Able to contact or stay in contact with love ones family and Friends, I myself, Just because I seek vigorously to help People and confront Powerful People and organizations was Framed and sent to prison and one of The Main reasons I was able to be Framed was That I could not reach people to help me calls were to expensive From Jail, and I was Poor, The sheriffs Jailers were throwing my mail away I was Basicly Isolated and my lawyers were Framing me and really not helping me as was The case with many others, sheriffs

police, Lawyers, were actively on purpose - deliberately trieing to keep Jails and prisons full, Generations of families have been lost to Jails and prisons and mainly because once a person was arrested and behind walls-Bars he could not reach out to others for help and protection a lot of people in Jails and prisons can and could not read or wright or spell They were easily exsploited and framed This is still going on today but on a smaller scale in California because of it's realignment Act - Jail and Prison reform, but it is still happening, The phone system is driving the poor into poverty and denieing prisoners of many constitutional rights and religous rights such as to maintain and keep families in whole contact safe and healthy, To have adequate duprosess - duprosess rights To redress government and to be protected from cruel and unusual punishment to have a sufficint adequate defence in criminal matters - my life is being destroying now, I am illegally being held in Jail now and kepted away from my now 8yr old son and his mother, if I could make phone calls I would have a better chance at seeing and talking to my child as by corruption I am being framed and have not talked to my son in months and have not ~~talked to~~ held and kissed him or been in his presence in years now I am in Jail - All fees and commi-ssion payments should be Eliminated - Abolished Time for the states counties, Jails prisons systems to give back to society - Prison-Jail reform has taken place because of deceit conniving corruption - private prisons building has been reduced - free contact by phone must be made available. I will write again as this letter was in haste, This is all true under penalty of perjury, Federal Judge Yvonne Gonzalez Rogers in Oakland California has my civil rights case(s) some issues on Jail-Prison-Phone reform.
