Dear Commission,

I recieved my notice today about my sprint long distance provider being discontinued. I had just finish a lot of work getting my Local and cell phone for emergency reduced to where I could possibly affordit. My land phone was low because I had been a well paying long time customer.

My husband recently died.

I am disabled and now 70 years old. I cannot work. I live alone and this year's AGI - Income Tax was now $16,150.00 a year! All my (what's left of it) family is LONG DISTANCE. I do not go out. It is one of the few contacts at all that I have with the outside world. (Human, not internet type)

My grown Severly Disabled Son lives in a group Home in Michigan (long distance). I am his guardian. I keep him cared for with long distance work on the phone!

If anyone looks at my records they will see this to be true. $21.00 are now my phone bills. My local server reduced me to 37.00 something.

Frankly, I dont know how I'm going to survive this. Now what else can happen? I have contributed to the world. Sick children, teaching in Detroit, my sick husband to die.

What else!

It's my turn!

Sincerely
Judith E. Smith
