Mr. Tom Wheeler
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

RE: MB Docket No. 15-149

Dear Chairman Wheeler:

As a member of the Montebello Unified School District Board of Education, I would like to urge the approval of the proposed cable broadband company New Charter. I believe the company would combine the best of Charter Communications, Time Warner Cable and Bright House Networks, bringing customers the latest innovations and supporting community development. As a district serving students from kindergarten through 12th grade, we are privileged to advocate for education that will prepare our students for the future. Technology is a crucial part of our curriculum, and I believe New Charter's partnership would allow our students to thrive.

Charter, Time Warner Cable and Bright House Networks work with numerous schools throughout the country. New Charter would partner with schools to provide its most innovative services, including digital and cloud-based technology and fast broadband speeds. In addition, the company would further support communities in need by offering low-income households a reduced rate on high-quality broadband. New Charter knows countless children are without online access when they do their homework. Its low-income program would allow many to complete their studies at home and bring them the tools many of their peers enjoy.

I believe New Charter would be a positive addition to the cable broadband industry. I support the company's merger and I urge you to as well.

Sincerely,

David Vela
Member, Board of Education
Montebello Unified School District
