OFFICE OF ENGINEERING AND TECHNOLOGY
ANNOUNCES RELEASE OF VERSION 2.2.3 OF *TVStudy*

GN Docket No. 12-268
MB Docket No. 16-306

OET announces the release of updated *TVStudy* software (Version 2.2.3).¹ The *TVStudy* Version 2.2.3 software installation package, the *TVStudy* 2.2.3 Installation and Upgrade Guide, and the post-auction template XML file (*TVStudy* 2.2.3 Template) are all available on the *TVStudy* website at <http://www.fcc.gov/oet/tvstudy>. As with prior updates, the full list of changes since the release of *TVStudy* Version 2.2.2 is included in the “Differences Between 2.2.3 and 2.2.2” section of the Change Log in the *TVStudy* 2.2.3 Installation and Upgrade Guide.

This release improves the performance of TV Interference Check mode. It also enables appropriate consideration of channel sharing applications and handling of the Longley-Rice error flag when studying DTS stations. Finally, *TVStudy* 2.2.3 contains a handful of new features, including a widely-requested ability to evaluate more than one User record within a given TV Interference Check study.

For further information regarding the *TVStudy* software and to submit bug reports, contact Mark Colombo at (202) 418-7611 or Mark.Colombo@fcc.gov.
