The Honorable Thomas Wheeler
Chairman
Federal Communications Commission
445 12th Street, SW Washington, DC 20554

Dear Mr. Chairman:

The more than 34,500 undersigned ColorOfChange members call on you and the Federal Communications Commission to immediately use your certification authority over International Mobile Subscriber Identity (IMSI) catchers, also referred to as Cell-Site Simulators or "Stingray" devices to:

1. Suspend the warrantless use of these devices.
2. Require all law enforcement agencies to publicly register their devices.
3. Require all law enforcement agencies looking to certify their devices to provide detailed and public policies outlining their use.

With Stingrays police are able to locate and track individuals, eavesdrop on calls, send malicious software, and even disrupt interactions between protest organizers. Even more alarmingly, they're doing this all without warrants or public oversight. In fact, the NYPD was just caught using Stingrays more than 1,000 times without a warrant while many other police departments have refused to disclose how they are using these devices.

During Eric Garner protests in Chicago last year, protesters became suspicious when a police SUV with strange looking antennas on it continued to follow them around the city. The protesters noticed that any time it got close to them, their cell phones would stop working. Now we know from a Freedom of Information Act requests that the police were in fact using a Stingray device to monitor protestors, keep tabs on their conversations, and identify key organizers.

New technological tools like Stingrays don't just amplify police power, they amplify existing biases in policing. Incidents like this show that the secretive use of this technology will lead to even greater invasions of privacy and subversions of rights in communities of color that are already the targets of biased policing.

As the federal agency tasked with certifying the use of Stingrays the FCC has the power to prevent law enforcement agencies from secretly possessing these devices and using them without warrants or publicly available usage policies. We hope you take immediate action ensure Stingrays are adopted and deployed if at all in a way that is transparent and accountable to the public.

Sincerely,

bledeh george

We have a housing crisis in NYC. More than 75,000 homeless people, but our police department seems to have endless supplies of money for buying new equipment to make our lives miserable. This has to stop. Where are our priorities?

We can not let this happen. We as Americans are giving up too many of our freedoms in the pretense of "keeping us safe"

Unchecked police power is the handmaiden to fascism and tyranny. That's why this petition is important. People use cell phones with the expectation of privacy. The technological distinction between wireless and wired communications, the latter usually requiring a warrant prior to tapping, should not be used to justify wholesale invasions of our privacy, or the violation of our constitutional rights under the 4th and 14th Amendments.

In the past several years, the abuse of authority has gotten out of control. Unfortunately, this has led to the citizens that the police are supposed to protect & serve distrusting them, & rightly so. I can just imagine how this device would be misused.

This practice of spying and disrupting communication doesn't promote equality within our collective society. Where there is forced domination, there is struggle, and history shows that struggle leads to more violence. If we are going to agree to use this level of technology to enforce the law then it would be critical to employ mandatory body cameras on police so that everyone is equally accountable.

Lately the words of Amos to Israel (echoed by Isaiah and Jeremiah to Judah) from the Hebrew Original Witnessing have been ringing clear: "Woe to you who turn justice to vinegar and stomp righteousness into the mud. Do you realize where you are? . . . People hate this kind of talk. Raw truth is never popular. But here it is, bluntly spoken: Because you run roughshod over the poor and take the bread right out of their mouths, you're never going to move into the luxury homes you have built. You're never going to drink wine from the expensive vineyards you've planted. . . . Justice is a lost cause. Evil is epidemic. Decent people throw up their hands. Protest and rebuke are useless, a waste of breath. . . . Hate evil and love good, then work it out in the public square. . . . Go out into the streets and lament loudly! Fill the malls and shops with cries of doom! Weep loudly, 'Not me! Not us! Not now!' Empty offices, stores, factories, workplaces. Enlist everyone in the general lament. . . . I can't stand your religious meetings. I'm fed up with your conferences and conventions. I want nothing to do with your religion projects, your pretentious slogans and goals. I'm sick of your fund-raising schemes, your public relations and image making. . . . Do you know what I want? I want justice - oceans of it. I want fairness - rivers of it. That's what I want. That's all I want."

Please stop this lying police officer from using my phones and my internet. This dirty police officer and his wife have their own personal reasons for doing this.

I've tried to report him to his department but was told that I needed to go to him to ask for his badge number. Why would he give me his badge number. I did go and, of course, he refused, not surprised. Then his wife comes to me pleading with me to consider her unborn child. Please don't report him. So I said okay, I don't want to hurt a child. Then they submit a report that I said all kinds of horrible things. Lies, nothing but lies, over and over again.

If they were doing something legal, they would have no problem with my reporting him. Therefore, this is proof that what they are doing is ILLEGAL.
For one, they are abusing my pets and even admit to it in private. All my pets have been killed except for the one they openly admit they are abusing.

I'm tired of buying another phone just so I can have some privacy for a short period of time until they get into that new one. Please, there has to be an honest person out there who cares to help me prove the truth.

Hey. This is America!

—Troy Faith Ward, Bellingham, WA

Invasive!

—Douglas Wentworth Campbell, West Chester, PA

This illegal and reprehensible behavior must stop. Why does the the police force use the Stinray in low income and commiunites of color and not in affluent, high finance and politicial arenas where injustices are being orchestrated daily against the low and middle classes. This is once again placing a unfair burden on the citizens who are unable to defend themselves against this treatment.

—Sarah Delany, Bronx, NY

Isolating people in order to further abuse them and denying them their livelihoods IS WRONG!!

—Stacey Taken Alive, Rapid City, SD

There are too many corrupt police out there who abuse authority. This spying has got to stop.

—Gary Jirschele, Rhinelander, WI

Protect and serve, not hate and spy.

—David Helller, Lebanon, NH

What is WRONG with these cops??
Why can't they just do their job without cheating (akin to unlawful search!!)?
Between sometimes putting the wrong person in jail, shooting people in the back or anytime when it could have been avoided, if they weren't such pussies. Always gotta shoot first because they're such fraidy-cats. Damn, hope this goes through. It's one more totally unjust way of policing. Again - why can't they just do their jobs? Are there even any good and honest cops left?

—Mr. Jeremy Storhoff, SAN CLEMENTE, CA

This is unconstitutional

—Shelley rascoe, Wappingers Falls, NY

These devices afford to much power to people who could misuse it - not just the police. Criminals and hate groups also need to be limited.

—Diane Mankin, Santa Fe, NM

How can this not be considered the same as a wire tap?

—Ray Bartlett, Fountain Valley, CA

Stingrays are outside the law. Warrants must be obtained.

A Citizen's Constitutional rights to privacy should be uncompromised in any way.

—Michael I Rosenthal, Palm Coast, FL

This is a step towards fascism. You STILL need warrants in the USA. Gathering trillions of bytes of useless data only makes it almost IMPOSSIBLE to identify anything you might have a valid concern for. NO STINGRAYS!!!

Of course Big Brother is watching us. I guess trust went out the window. We are a military police state that loves to engage in war against mostly poor people.

—Dr. Juan R. Franco, DALLAS, TX

Let's end the "Police State"!!!!

—Lyza Zeppetello, Saugerties, NY

We ALL need privacy in our calls, and letters too. If police are tracking criminals, they must get warrants, not intrusive gadgets.

It's appalling to me that police are able to use Stingray devices without a warrant. This must change!

—Dorian Gomez, Los Angeles, CA

This is not right....please stop.

—Rhea Zaks, San Pedro, CA

Speaking as someone whose job involves me being recorded and spied on regularly, there is nothing that can make you feel more infuriatingly helpless than to know someone is watching you but not know who it is. That is why it is used routinely in interrogations - it does strange things to the mind to know someone has eyes on you but not be able to see them. Police should absolutely have a warrant in order to use this device against people.

—E P, Tallahassee, FL

Pretty soon the whole world will understand what a Fascist state we have....hopeully they will ostracize us from the world's people and their governments.

—Michael J Burnham, Durham, NC

Taking away too much privacy.

—Betty Olson, NAMPA, ID

I realize that technology such as Stingray can be used to enhance public safety. However there is also reality that it can be used to thwart legitimate efforts by citizens to monitor the government that supposedly is there to serve them. With the high number of recent abuses of police over (especially) minority citizens, the proposed legislation is needed to avoid cover-ups and preserve the rights of whistle-blowers.

—Bob Railey, Marquette, MI

Our privacy is a right, if you want to listen you must have a reason and a court order.

—Bebe sekechi, Falls Church, VA

Unwarranted wiretapping, the last I heard, is against the law. Police must get a warrant showing probable cause before indulging in wiretapping. If for some cockeyed reason they no longer need warrants, we need our legislators to reestablish proper wire tapping laws, and if police break the law, they must be punished.

The public should be informed of this so that they can't use this device on any individual. Also there should be a seperate task force seperate from the police department that monitors the work the police are doing so we can catch police criminal activity. It should not be used to cast a wide net among random people or certain communities. We can be safe and secure. Use of the stingray should be limited and clearly defined. It's all about those with power, having respect for ordinary citizens. I thank Color of Change for bringing this to our attention, but really, this has nothing to do with the race of the targets (or maybe it does, and that's the whole point Color of Change is making; in this one little area, now we know how it feels to be black, only for one second instead of 24/7).

Dear Chairman Wheeler, I am shocked to learn of the existence of the Stingray tracking and monitoring tool -- much less its reportedly illegal use as a tool by police. Please use your certification authority over the Stingray (and similar) devices to:
1. Suspend the warrantless use of the Stingray;
2. Require all law enforcement agencies to publicly register their devices; and
3. Require all law enforcement agencies looking to certify their devices to provide detailed and public policies outlining their use of the Stingray.
Thank you for taking the time to read my comment.

—Kevin Shaffer, MOOSE PASS, AK

Boy, 1984 can come at is in a lot of ways. I worked in the so-called criminal justice system for many years. I knew some good, community-minded cops. I also saw cops lie for each other in court and do whatever it took to cover up racist, abusive actions. I don't want them using Stingray devices without a warrant at the very least. Better for the FCC to suspend the use of Stingrays altogether. We don't want to help cops be part of national surveillance.

Thank you !

90% of cellular interactions with towers are probably legal business - it should not be possible to deceitfully spy on everyone who is obeying the law just to screen for wrongdoers. This tool should be one requiring a search warrant to use against a person who there is already evidence is doing wrong, and collateral info gathering of info pertaining to people not in the warrant should be prohibited as evidence of wrongdoing in court, as there wasn't a search warrant for the person before they were spied upon.

This is such a violation of rights. Stingrays can also be a threat to safety. If they can prevent cell phones from working, a person with a medical emergency cannot call for help, nor anyone around them whose phones may also be obstructed by this method. This is blatantly unfair and unjust. You have the power to stop this and do right by the citizens who have the right to protest and privacy.

This is worse than unconstitutional warrantless wiretaps. Groundless snooping is bad enough, but disruption of communications could be fatal, if people are prevented from calling for help. And it is clearly capable of preventing citizen journalism -- recording of improper use of force. We rightly descry Man in the Middle attacks on the Internet. They are equally bad on cell networks.

Dear Sir/Maddam

I am writting this message to urge you to put an end on Cell Phone surveilance and to suspend the use of all police Stingray devices as soon as possible.
Here are some points to have in our minds and in consideration:
- Suspend the warrantless use of these devices;
- Require all law enforcement agencies to publicly register their devices;
- Require all law enforcement agencies looking to certify their devices to provide detailed and public policies outlining their use.

—Bruno Miguel Santos Prata, Brooklyn, NY

The use of these devices is unconstitutional, unwarranted and ILLEGAL. This type of behavior by law enforcement is the reason no one trusts law enforcement anymore. Your actions show you are more interested in power and control of the population than what is in the best interests of the population. The more you engage in this type of illegal behavior, the more the people will fight you in the courts, the media and in their local communities.

I've know about this for some time along with smart appliances eves-dropping but I had no idea this was being used without warrant or oversight although "the fox guarding the hen-house" lacks sincerity somehow and is far from reassuring.
So, now I'm guessing on any given day or night any "trusted" peace officer can bestow upon himself the authority to listen-in, disrupt, record and playback to others of his/her choosing any phone conversation broadcast from practically anywhere.
In this new digital age a conversation signal can captured in Maine and at nearly the speed of light be boosted and re-transmitted into anybodies living room nearly anywhere on the planet - not to mention what we are now being made aware of here! NOT OK! Not OK with me.
There is no right and wrong, no good and bad - this is becoming a free for all. Propriety and decency are loosing out to "I got mine and you get yours."
Politicians won't move on any socially significant issues for fear of failing reelection. Money and resource mongering now rules the planet.

Dear Chairman Wheeler:
The freedom for our democracy to flourish depends on a balance of personal safety, for which we need an adequate and well-equipped police force, and the free reign of ideas to flourish, for which we need personal privacy and freedoms of assembly, etc. Please use the power of the FCC to contribute positively to this balance in American society:
Use your certification authority over Stringray devices to:
1. Suspend the warrantless use of these devices.
2. Require all law enforcement agencies to publicly register their devices.
3. Require all law enforcement agencies looking to certify their devices to provide detailed and public policies outlining their use.

Your comment on the disproportionate use against the Black community is just my thought precisely. If they were use to capture the real hard-core criminal the device may be of use. However, like the killings and attacks on innocent, nonthreatening Black males and females, the Stingray devise will be used to scapegoat Blacks. The name of the game is to divert the attention away from the real hard core criminals by focusing on Blacks. Many police are co-sponsors of drug dealers, the KKK and other subversive White groups.

Big Brother type oversight & social control are evidently actually possible with these devices in the hands of agents who aren`t subject to public oversight themselves. It was the intent of the framers of the constitution to always have oversight of the law enforcement arm of the government by the people who are having laws enforced on them so as to avoid the creation of a body gaining tyrannical powers. It looks like police
agencies using these stingers to invade private conversations thwarts the intent of the framers of the constitution regarding rights of privacy. My understanding of the constitution places the rights of the individual above the rights of social control agents in areas of private matters.

Yes, yesterday I was chased around like a criminal. I don't understand why I was being chased like this, but I do not think law enforcement should play cat & mouse games. Between my house & my daughter's school, I saw 5 policemen, one on motorcycle, 2 with blue lights at an intersection. 2 passed me on the same side, but opposite directions leaving the doctor's office. It wAs obvious to my daughter. It has been obvious to my children for mNy years now. I don't know if the police are trying to protect or play games of intimidation, harassment, or jokes. It is so inappropriate, what hAppened to professionalism.

I started working as an engineer in the telecomm industry in 1985 (at Codex, the modem company) and am currently a professor of computer science at Northeastern University. Use of a "Stingray" constitutes unlicensed transmission on frequencies which have been allocated (for a high price) to a party which has not given consent for this transmission. Note that recent rulings regarding the use of cell phone jammers in prisons have established the principle that the FCC's regulations apply uniformly to all, and that law enforcement may not unilaterally carve out exceptions, regardless of the value of doing so. (e.g. prohibiting cell phone use in certain prisons may be of high social value; however it needs to be addressed by the FCC and/or Congress)
In the case of the Stingray, the devices do not appear to offer significant benefits over existing carrier-based interception mechanisms, but instead are being used because it allows bypassing the troublesome and constitutionally mandated step of getting a warrant. Note that while early cell phone technology (e.g. AMPS) could be monitored via passive reception, allowing one to argue that the phone user had in fact broadcast their call to the listener's location, the Stingray relies on active mimicry in a way that is much more intrusive than telephone wiretaps on which existing wiretap case law is based.

You know, if I wasn't personally targeted by such a device, I wouldn't be signing or commenting on this petition. But I know first hand how this has tactic has been used abusivally, and it has gone farther than we would want it to go. It has taken away so much privacy, and to add to that, when I call the police with a situation, they are quickly finding ways to not exercising any of our rights to do any justice upon the situation, primarily and sadly to say, is because there are many of our law enforcement who engage in the criminal activity we call them about. And therefore, they are siding with the actual criminal they have sent to taunt, terrorize and make your life unlivable, therefore, the listening device is used to see if they are carrying out their creative and decisive plan. Now, I don't say this lightly, I still feel that we have some great law enforcements out there that are doing everything in their power to do righteous works, but even so, they need us to expose the ones, like this who are arbitrarily doing their own personal unilateral methods and strategy to bring someone done because of their own personal belief. Straight up discrimination and a lack of tolerance, to allow people, such as ourselves exercise a right or law that has been handwritten from honored men on high. —Thomas Gump, Santa Fe, NM

Hacking citizens personal conversations in order to disrupt presumed activities or their outcomes would be no different from hacking authorities' sell phoes and communications systems to collect information on planned illegal activities or racist or other attitudes of authorities giving supporting evidence of 'bent of mind" by authorities. Proof of unconstitutional search, seizure, arrest, incarceration, or prosecution should be evaluated. Nixon's "safe streets acts proved an embarrassment, disclosing the paranoia of "peace" officers' intent to maim and criminalizee peaceful and lawful dissent by infiltration and ginning up protest. Same with FBI tactics leading to inducing silly wannabe's into unintended acts to gain "cheap" arrests and prosecution to falsely demonstrate faux-achievement of war on terrorism. We surely can do better than forcing Gestapo principles on America.

—Bruce Gruber, Elk Horn, KY

This is just too scary! Please reign this in now!

Patriotism is about protecting civil liberties, defending civil liberties, and guaranteeing civil liberties (that's all in the Constitution police and politicians alike swear to protect, defend, and serve. It was the court of King George III that wanted unregulated policing and restricting of individuals' movements and autonomy. Just because technology makes it even easier to oversee our every move, thought, and action, doesn't mean it's allowed or okay. It isn't. We're supposed to be against things like this. The politicians and the police are supposed to protect us FROM this kind of abuse of power not engage in it.

We have seen numerous times that the police use their power to violate citizens civil rights---at the very least the police must be required to obtain a warrant. And even then, I am sure the police will not hesitate to use this equipment without discretion just because they can. I do not trust the police anymore than I trust the criminals out there.

Chairman Wheeler and Members of The FCC:

Please consider the privilege, honor, and duty you are presented with here as an opportunity to stand up for the 4th Amendment and what it represents as a safeguard of liberty in our nation.

I ask that you ensure that these devices are used responsibly. You are in a unique and quite powerful position by taking the important yet simple measures requested in this petition.

I believe you will agree as an American that warrantless use of eavesdropping devices by law enforcement should not be permitted simply because agencies have access to such devices. Suspending warrantless use is a responsibility I believe and hope you will take seriously.

Registration, certification, and detailed public policies for the use of these devices are certainly reasonable requests for a minimal level of transparency. Basic documentation is an important step in ensuring that this technology is used responsibly.

I again ask that you see that the FCC has the power and responsibility to ensure that this technology is simply used in accordance with existing laws.

Thank you for your time.

Sincerely,

John Marinko

With Stingrays police are able to locate and track individuals, eavesdrop on calls, send malicious software, and even disrupt interactions between protest organizers. Even more alarmingly, they're doing this all without warrants or public oversight. In fact, the NYPD was just caught using Stingrays more than 1,000 times without a warrant while many other police departments have refused to disclose how they are using them.

But the FCC can reign in the police's secretive and warrantless use of this surveillance tool. Will join me in demanding the act suspend the use of all police Stingray devices?

As long as no-one is being harmed, the rights to gather publicly, express our views freely and follow our individual convictions should not be hindered because a few irresponsible people have abused those same rights. It is senseless to deny the freedoms of all in order to identify and apprehend the few for whom it is appropriate. This path will ultimately lead to a time when Americans will no longer be able to call their homeland "the land of the free" as indicated in our National Anthem.o

U.S. law enforcement has been long-suffering under poor leadership, which has only grown worse in the post-9/11 period. From Washington, DC, to our local police forces, the police are no longer free to simply do their jobs. Instead they have been POLITICIZED. They have allowed themselves to be corrupted by the .01% and turned -- institutionally -- into a racist, Islamophobic, right-wing/reactionary mob, indifferent to the crimes of elites and officials. The New York Times reported in 2002 that the U.S. government was considering broadening the definition of the term "terrorism" to include political activism, including speech, when such activism has cut into someone's "expected profits" (profits which, in this Rand Corporation-outlined scenario, presumably failed to materialize after activists revealed that the company/product is: unhealthy, immoral, tainted). Bush-Obama, those changes to the law have been made. Just as habeas corpus, Posse Comitatus, and due process have been dismantled... along with most of the Bill of Rights. But it's time to take our country back (go, BERNIE!). Officers, stand down: demilitarize and begin community policing, ASAP. Stop acting like predators and the willing tools of obvious fascists. It's time to stop surveilling and persecuting Muslims, minorities, and liberal activists, just because the oligarchs hate us. Just do your damn job, John & Jane Law, like 80% of you would like to, I'm sure. And PLEASE consider the fact that Bush, Cheney, and Wall Street got away with torture, mass-murder, and system-collapsing fraud mostly because you've allowed yourselves to be turned into a nation of blue-suited mercenaries. THAT WILL BE THE PERCEPTION UNTIL YOU BEGIN POLICING THE POLICE... AND THE PRESIDENTS AND GOVERNORS, too, the genocidal, climate-killing shits. Black lives matter, and we are all connected. It's time to care about humanity again. The '80s are over.

Yes, the FCC should require a registry as to who is using stingrays to easdrop on phone conversations, but, law enforcement like the police, in addition should also have to go to court and show probable cause to do the easdropping and secure a warrant of what they are actually looking to listen to. The 4'th Amendment of the United States Constitution does requiore a warrant for searches and seisures of evidence in a person's home or vehicle, with probable cause, if A. the owner or the occupant does not give permission to the search, or the evidence they are loking for is not in plain view.

Thus, it is time for the 4'th amendment to also apply to cellphones as well and as well, any phone or communication devices.

There is hope for police and the innocent people they serve to come together and work together. The police who are using the tools they are supplied to do the right things at the right time are to be recognized and shown appreciation. Pointing out the officers that are not doing the right thing will help those officers trying to do the right things to operate in a safer atmosphere with their co-workers and neighbors. The police, along with our entire criminal justice system, in general, are attempting to infringe on our rights and freedoms in the so-called "fight for homeland security". But when you check on the placement of these cell phone surveillance devices, I'll guarantee you that they're in minority neighborhoods. That's the fight our criminal justice system is concerned with: the fight against black and brown people (the ones it deems are the REAL threat to America, white America).

When predators enjoy the use of the latest technologies to engage in illegal activities there is something wrong with our society. Committing illegal acts to uphold the law is not justifiable, even with cause. Spying on people without probable cause is despicable, reprehensible, and already illegal. The rule of law has been reduced to a joke, and a bad one at that. If law enforcement is allowed to operate outside the law the breaking down of civilization can't be far behind.

Power corrupts. Absolute power corrupts absolutely. People who don't mind invasive and uncontrolled use of technology against protesters or communities of color might change their mind if they were personally a target. Like the famous quote from Pastor Niemoller regarding the Holocaust and not speaking up because it didn't involve him-and when it did no one was left to speak up-applies exactly here. Free speech, privacy rights and other things guaranteed by the U.S. Constitution are often taken for granted by the privileged but people literally died for us to have these rights. We must preserve American Freedom -these rights define and support it. Without these carefully designed controls of State Power, there is nothing to prevent us experiencing the very real abuses of such power like the Disappearances in Central and South America or the open oppression of regimes like Myanmar.

The use of these stingrays is entirely unconstitutional without issuance of properly obtained warrants, especially when they are used again American Citizens who aren't even under suspicion. —Kathy Thompson, Seattle, WA

As an American who knows the laws and Constitution, it sickens me to see (and I know this first hand as this has occurred in my own case) the police abuse their power. In a Black Lives Matter protest 10 undercover police st a protest with 100 + protestors on 12/03/14 in Seattle WA for Eric Gardner, all said thru deposition that they never said that I assaulted an officer on a bicycle. The bike officer said I never assaulted him, not even indirectly, and yet a Sargeant told by an officer who beat me in a police station on camera while handcuffed as a Veteran one day before Veterans Day in 2011 told that Sargeant to arrest me. I never touched a police officer or his bicycle. I moved a protestor away from an officer who was hitting the protestor with his bicycle handles because he couldn't ride so slow and stay on his bicycle. The legal system was designed for the wealthy to survive and it's malfeasance is widespread. The whole damn system is guilty as hell. The police have too much power and discretion and don't know the law and so they violate people's rights all the time. Only suing these cities and officers will hopefully get this to stop and the creation of a new fair system not based on monetary access or skin color will we see true change. There's a saying, "if you have money you get a taste of Justice, if you don't you get a taste of the law"

We were told in the beginning of the terrorist attacks that the law enforcement was just going to use their surveillance equipment to listen in on terrorists and suspected terrorists. Any one with half a brain knows that there are, like every walk of life, good cops and bad cops and it would probably scare the public to death to know just how many bad cops there really are. This country touts that it is the land of the free but more and more we are anything but free. It's a shame that just by using a certain word in an innocent manner during a conversation, you are suddenly put on some list of people to watch as suspected terrorist. This "Stingray" device is going way too far in giving the law an open door to listen in on anyone at anytime and we all know that they do just that. It's a violation of everything this country stands for and should be restricted to be used for terrorist, not just plain US citizens who are simply trying to make a living and be good human beings. Law enforcement officers routinely break laws on a daily basis which jeopardizes the public's right to safety. From sheriffs to police officers to the highway patrol. It seems that their policy went from "protecting and serving" the public to harassing, intimidating, threatening and murdering the public. They use "sound judgment" as an excuse to violate penal codes, vehicle codes and a persons rights either to enforce mandated quotes (performance evaluations) or hidden aggression. So yes you need to monitor and restrict the police because they will find a way to break the law because they think they are above the law.

Dear Criminal Investigation managers:

Property owner Ralph Timberlake files this formal complaint of mail fraud against the USPS and its officials, for not delivering his mail to its addressees, because none but the unscrupulous USPS officials would imprudently and illicitly enjoin the mail addressed to 2117 Atkins Drive, Huntsville, Alabama 35810, returned to its senders. Because USPS officials are surreptitious and furtively returning property owner Ralph Timberlake's mail to its senders, he submits this letter of complaint. Even so, several ignoble USPS officials are unjustly repudiating property owner Ralph Timberlake's rights and privileges to mail delivery service. Notwithstanding, they rebuffed his requests for an impartial hearing about his USPS' property mail delivery service perpetual suspension. In light of their egregious banning property owner Timberlake's rights and privileges to receive USPS' property mail delivery services, he requests a lawful criminal and a lawful civil investigation. Why are 2117 Atkins Drive, Huntsville, Alabama 35810 and Ralph Timberlake's Frist-Class Mail subjected to the USPS personnel's capricious impeding whims? Therefore, the USPS officials took the unauthorized aforesaid, and the harmful denial of property mail delivery services, without due process of law. Hence, such shameful USPS activities are a flagrant illustration, an unashamed example, and a heinous instance of a USPS kakistocracy. Numerous kakistocrtaical USPS officials ordered the perpetual banning of First-Class Mail delivery services to 2117 Atkins Drive, Huntsville, Alabama 35810; while, they deny lawful requests for evidence and an impartial hearing. Conversely, the USPS officials' unceasing abridgment of property owner Ralph Timberlake's right to receive USPS' property mail delivery services illegitimately is a crime of fraud. Nevertheless, a Plethora of USPS official has illegally rebuffed this adverse party's official application for a copy of their lawful reasons, and their legitimate justification for their denial of services. Yes, their unilateral decisions to return Ralph Timberlake's mail to its senders are gross wrongs and an unabashed travesty of justice.

I don't believe police should coordinate something like this without oversight and with communications with various agencies in the first place. Then, they have to have a real viable prove reason to spy at all. They cannot use it to interfere with peaceful protests, which is everyone's constitutional right in the U.S. They have to have a real reason to believe that someone is going to commit serious crimes to access such a device and then, and only then do they need to gain permissions from other agencies so that they do not interfere with other agency jobs! Police alone are not educated nor trained enough to handle some of the country's issues and in many instances, police men are highly unethical, narrow-minded, racist, and out to propagate segregation, oppression, and religious ideologies that have nothing to do with American progress. This uneducated sector of society I have witnessed and have seen, are accusatory, persecutory without real cause, dogmatic, unprofessional sometimes, and those who continuously pick on people make it very hard for good upstanding police to continue and do their jobs. They also subject good officers to peer pressure to go along with their schemes, conventions, and immoral ideas about how society should be subjecting other police to crimes. I have seen this time and time again within the forces, and I have seen utterly uneducated sort of madmen go around with guns and badges wasting American funds on harassing innocent people. Stingrays give cops too much power to invade people's privacy with no accountability, and to unfairly target people for trying to participate in democracy and make our country better. When, if ever, will the DOJ do its job--the economic burden of which we citizens are FORCED TO SHOULDER?

Why would any citizen willingly pay to be spied upon as he or she watches their civil rights and constitutionally guaranteed privacy eviscerated by law-breaking "law enforcement" agencies under the direction of a lawless government (spy apparatus)?

Do the right thing, the LEGAL thing--follow the guiding doctrines upon which this nation was founded: THE CONSTITUTION AND THE BILL OF RIGHTS!!!

I feel that we should end cell phone surveillance. Stop the use of Stingray.

With Stingrays police are able to locate and track individuals, eavesdrop on calls, send malicious software, and even disrupt interactions between protest organizers. Even more alarmingly, they're doing this all without warrants or public oversight. In fact, the NYPD was just caught using Stingrays more than 1,000 times without a warrant while many other police departments have refused to disclose how they are using them. And we all know too well that when police have unrestricted power like this it gets disproportionately used against Black communities.

But there is hope to rein in the police's secretive and warrantless use of this surveillance tool - the FCC. The same federal agency that heard our calls to save the Internet could now stop police from using these devices to illegally monitor our communities.

I demand that the FCC suspend the use of all police Stingray devices.

Greetings, "Color of Change" staff and supporters:

Whereas I certainly agree that such issues as American police using Stingrays, and using armed drones, are serious and should be STOPPED, you should address the correct legal entities, that are - or ought to be - Responsible.

Re "Stingrays", you must understand that the FCC (not being one of the delegated "Powers" of the LIMITED federal government), thus has a limited authority; to wit: commercial broadcasting, on territories and possessions of the United States. (See the "Constitution for the United States of America", the correct "title" at the end of the Preamble, at Article IV., Section 3., Clause 2.)

Actual authority, therefore, lies with the respective legislatures of the States of the Union, involved. Please note the "needful" specificity of my references; it is important!

As a "Legislative Analyst and Writer" (L.A.W.), I invite you to respond to me; very few people will care to/dare to speak the (carefully analyzed) Truth, about such matters.

This Writer does NOT ever "agree" to pay the so-called "Sales Tax" here at California; it (as usually misapplied), does NOT apply to Purchasers, and it does apply ONLY to Federal Areas. (Rev. and Tax. Code, Sections 6051 and 6017, plus R. & T. Regulation 18:1616.)

In other words, take small steps, grow in Confidence - and Knowledge; I am located at Berkeley to assist, if need be.

Thank you,
By: Arthur Stopes, III.

—Arthur Stopes III., Berkeley, CA

it is a violation of right to privacy to monitor citizens calls without probable cause or simply at random. this must stop immediately.

—Crystal A. Myers-wilkins, Springfield, IL

A police car has an identifying number when it could be anonymized because the people have a right to know who and what are the agencies of the state. The people have a right to know what technology their government is using to infringe on their rights (freedom of assembly & protection against unreasonable search and seizure among them), and to decide what technology and power the police are given over the people. In order for this decision to be enforced, the people affected must have some way to detect what is being used. The police have shown consistent attempts to conceal their use of these devices, so abuse prevention measures must be put in place.

WARRANTS MUST BE REQUIRED FOR THE USE OF STINGRAYS!!!

—Kjersten Gmeiner, Seattle, WA

Police and other unwanted nuisances can and do use these and similar devices not only to eavesdrop, but to inject themselves into your conversation, effectively answering your phone call, using false identities, and interrupting your business, be it a medical l emergency, a personal relationahip, etc. They are basicly making very bad choices for you under the premise that their informatiin gathering and processing algorithms are better than your own, and they are wrong often enough to cause severe distress to unwitting and largely powerless people. Eavesdropping can be used as inappropriately and with the same consequences as using a firearm.

We still have a Bill of Rights. ENFORCE IT. It happens I'm white, but so what? My government is allowing secret, warrantless surveillance of ITS OWN CITIZENS and that is wrong no matter who's the target. And we are ALL the targets.

—Tracie Thompson, Saint Paul, MN

If this is true, it is reprehensible. What is this, North Korea?!

—Leigh Dasinger, Millbrook, AL

don't just do this for law enforcement agencies and entities, look at the spy tools by google and other tech industries, with their tracking and monitoring devices. it should be illegal and an invasion of privacy and safety concerns that anyone with computet access can monitor, stalk and obtain personal and private information on anyone.
Please let this be the next cause that you take up to go after tech companies for the information that's made available and seemingly we're not able to do anything about it.

—Tom Howard, San Jose, CA

Innocent until proven guilty? I think NOT, any longer. This is unacceptable policy and should/must be stopped, or disclosed in a transparent society. There should be clear indications of a problem existing (crimes being carried out) before we begin to target and invade privacy. J Edgar Hoover? I think so. We haven't learned our lessons yet.
