Public Comments regarding FCC Proceeding Number 16-106

First Name	Last Name	Street Address	City	State	Zip Code	Comment to the FCC
Joshua	Terry	1012 Kitsap Street	Port Orchard	WA	98366	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.
Janis	Alldis	110A Crescent Ct.	Scotts Valley	CA	95066	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Please stop allowing ISP s to share our personal information without our knowledge. They gouge us right and left and we don't even have any control over our privacy online. This has got to end. They should not be allowed to share any of our online activity or personal information.

Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it.

Gayle Janzen 11232 Dayton Ave N Seattle WA 98133

Internet service providers are the Internet's de facto gatekeepers, with a comprehensive view of consumers' online behavior. However, the collection and use of this data are largely invisible to us consumers, and we currently have no effective control over it.

We consumers must be able to protect our own personal information online; it is we who should have the absolute and final say when it comes to how our personal information is shared by the ISPs.

A.J. Averett PO Box 468 Potsdam NY 13676

Customers' private information should not be used nor shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent.

We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Robert	Duncan	602 Roosevelt	YPSILANTI	MI	48197	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Dear FCC:

Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it.

Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers.

Donis Eichhorn, RN, PhD 1509 Del Dayo Drive CARMICHAEL CA 95608

Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent.

We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Keith	D'Alessandro	42486 Saratoga	Canton	MI	48187	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

John P.	Davis	Huntington Woods, MI	Huntington Woods	MI	48070	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Jane	Harazim	880 Kane Street	South Elgin	IL	60177	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Sean	Wilkie	3978 foothill ave	Carlsbad	CA	92010	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.
