ROBERTA	SEBASTIAN		Homestead	FL	33034	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Robert	Hansberry	461 Piedmont	York	PA	17404	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Daniel	Piatek	220 west 24th street apt 6C	New York	NY	10011	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Mark	Tolpin	256 Glen Avenue	Millburn	NJ	7041	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Ronald	Kornmiller	50 County Road 519	Newton	NJ	7860	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

sandra l	lawrence	1428 main st	kerrville	TX	78028	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

David	Nevin	28 Wheeler Rd	LITCHFIELD	CT	6759	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

						I am an attorney in Washington State. I have learned that Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is not transparent to consumers and they currently have no idea what is being collected and how it is being used. Further, consumers have no effective control over the usage of the information that is collected.
Cheryl	Mitchell	24 W. Augusta Ave.	Spokane	WA	99205	Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. As an attorney, I frequently communicate with my clients via email. The attorney-client privilege is supposed to protect these communications. If my emails are being read, then there is no protection and my clients will not want to use this method to communicate with me, or any other attorney.
						Customers' private information should not be used or shared for any other purposes, excep

Matthew	Ford	183 Division St.	New Haven	CT	6511	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Judith	Cantor	315 east 72nd st.	New York	NY	10021	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Dane Bowen 8740 Blair rd CHARLOTTE NC 28227

Monopolies should not be allowed to sell our data.

Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it.

Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers.

Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent.

We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Andrew Wright 1 RiverPointe Plaza #1106 Jeffersonville IN 47130

Internet service providers act as the on-ramp to the Internet and have a complete view of consumers' online behavior. However, the collection and use of these data are largely invisible to consumers and they currently have no effective control over how the data are used..

Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers.

Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent.

I strongly urge the FCC to move forward as expeditiously as possible to put meaningful privacy protections in place and return control to broadband Internet users.

Laurie	Storm	80 Howell St	Buffalo	NY	14207	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.
