Carolyn	Faille	18 Mallard Cir.	Tariffville	CT	6081	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Neil	Fisher	307 S 71st West Ave	Tulsa	OK	74127	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Joan	Taylor	143 North Street	Geneva	NY	14456	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Phillip	Phoelich	EgÃ¸jevej 121, 4600 KÃ¸ge			20000	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Rickey	Palmer	3080 Mogadore Rd.	AKRON	OH	44312	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

David Addison 5700 11th St N ARLINGTON VA 22205

Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it.

Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers.

Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent.

Therefore, the FCC must move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Nerissa	Russell	1251 Ellis Hollow Road	Ithaca	NY	14850	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

						I pay for my Internet service so that it will serve me. What I pay should not be used by providers or their customers to invade my personal information. Because Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior, they should be held to a fiduciary standard of protecting the customer's information and not become a vehicle to sacrifice the customer's privacy in order to increase the provider's profits.

Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.
Don And Carol	Dodson	727	Elgin	SC	29045	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.
