Christian	Colella	4924 North Road, Owasco, NY	Auburn	NY	13021	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Lawrence	Ploscowe	23 Colonial Road	Rochester	NY	14609	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Terry	Fontenot	939 Baxter Ave	Louisville	KY	40204	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Daniel	Dowdle	3755 1/2 4th Ave	SAN DIEGO	CA	92103	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Diana	Alcazar-O'Dowd	5711 Laurel St	New Orleans	LA	70115	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Don	Ferkingstad	6003 35th Ave NW	Seattle	WA	98107	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Dennis	Tracy	208 Chestnut Ct.	Tehachapi	CA	93561	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Thomas	Grady	627 I Avenue	Coronado	CA	92118	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. However, the collection and use of this data is largely invisible to consumers and they currently have no effective control over it.

Consumers MUST be able to protect their personal information online. Consumers should also be in the driver's seat when it comes to how their personal information is shared by service providers.

Customers' private information should NOT be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent.

We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.
