But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Vance	Blosser	453 Back Mountain Road	Winchester	VA	22602	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Gary Killpack 1850 SE 23rd Drive Lincoln City OR 97367

Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it.

Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers.

Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent.

I DEMAND the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

						The operative words are "My" and "Mine" and "You" and "Your". Personal pronouns that state my name, address, and PERSONAL INFORMATION is MINE and the Business of absolutely NO ONE ELSE! The RIGHT to PRIVACY in "OUR" "OWN" HOMES is OUR"S by the Constitutional 4th Amendment. Taking OUR information without a WARRANT and using it Commercially for the Companies to make more money is ILLEGAL, a complete DISGRACE, and Simply UNAMERICAN!

						When the telephone was our primary means of communication, we had every expectation that our conversations would be private and that no one (unless they had a federal warrant) would be eavesdropping. When we watched television, no one was watching us back. When companies wanted to know our preferences, they asked us in surveys and we only complied to the extent that we were willing.
Jacalyn	Strouble	541 Meadow Branch Road	Pittsboro	NC	27312	How, then, did we get to this point where corporations can spy on us and track our every move? I pay them handsomely to provide me with Internet access but apparently that's not enough for them. The Internet allows them to gather up all manner of data on me and sell it to the highest bidder without consulting or informing me. Not to mention that their ads and their scrapers and bots are slowing down my computer to the point where it's almost useless. I have to resort to all manner of ad blockers and privacy settings just to be able to scroll through a website without my computer hanging and becoming unresponsive. It's my compu

Gayle B.	Rosenberry	703 Gorsuch Ave.	Baltimore	MD	21218	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Dan	Fast	33-68 21st Street, LIC, NY	Astoria	NY	11106	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

						Every single member of your committee has electronic files on EVERY activity you have online. ISPs (as well as websites, social media, etc.) hide tracking software that monitors everything you do. (There are numerous apps, add-ons and plug-ins that show users these trackers and the numbers are staggering for even the simplest use. It goes WAY beyond cookies. To embedded pixel trackers.)
Kenneth	Alexamder	14398 Gemstone Rd	Sparta	WI	54656	This data is sold to marketers. It is supposed to be anonymous, but it contains all of your personal information.
						Imagine if it is hacked, or sold to unethical companies or governments. Being in marketing, I know many of the risks this data poses. Yet its use and ownership is totally unregulated. Just think what would happen if everything you or members of your family did became public knowledge. Including your banking, investing, online purchases, browsing and other activities. It's unnerving to say the least and a potential danger to our freedoms at worst.

Max	Hyre	685 Forest Road	West Haven	CT	6516	In former days, getting a telephone required but your address and some suggestion that you could pay for it, with the information available in the telephone directory (unless you paid extra). Nowadays, we can get the Internet only through an ISP, which is privy to the websites we visit, the e-mails we send and receive, and vastly more information that we'd rather not have sprayed out to advertisers, strangers, police, etc. (If you're not familiar with this, I strongly suggest that you read _Data and Goliath_, by Bruce Schneier [http://www.amazon.com/Data-Goliath-Battles-Collect-Control/dp/0393244814, or check your library]). We should return to the days when such information was available only on presentation of a warrant, approved by the judiciary branch, limited to specific data. The FCC should promulgate regulations to ensure this as soon as possible Let the U.S. catch up to the European Union in this respect.

Internet service providers (ISP s) have a more invasive view of our lives than our doctors. Deeper than our family members. More complete than our employers, or our banks. Yet (blackmail aside)--unlike all the other people who see our private data, there are no laws governing collection and use of this data by ISP's.

In a turn-about on normal privacy laws, collection of the data and use of the data by ISP's is mostly hidden from the consumer, and exempt from consumer control.

Joy	Sabl	7008 Willard St	Pittsburgh	PA	15208

We'd never say, "if you don't want someone using your medical data, don't go to to doctor." We would not say, "if you want your financial transactions to be private, put your money in your mattress." But when it comes to ISP's, too often, the only message consumers get is, "if you don't like ISP's using your data, find another ISP, or don't use the internet." That's crazy.

Consumers should be able to protect their personal information online, and should control--by an opt-in process--how their personal information is shared b

Jerry Mosier 1009 northridge drive YREKA CA 96097

Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it.

Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers.

Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent.

I strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Eric	Hubbard	211 rio mar dr	PORT SAINT LUCIE	FL	34952	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Jonathan	Wilk	146 North Encinal Ave.	OJAI	CA	93023	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

Michael	Brown	9211 Dandelion Drive	Murfreesboro	TN	37129	Internet service providers act as the Internet's gatekeepers and have a comprehensive view of consumers' online behavior. But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.

David	Strachan	905 Conway Ave Apt 44	Las Cruces	NM	88005	We NEED privacy protections for our internet use - from our ISP. I pay a healthy sum of money each month for Comcast/Infinity to connect me to the internet. I have never given them permission to make even more profit from stealing my private information, my private communications, and my private use of the internet. In no other business is a paid provider allowed to use information to spread my private communications to whomsoever they choose. ISP's are already making a fortune from fees charged to the users - they have no right to make even more money by selling information that I have given them no right to use. If I took their private company secrets and sold them to the highest bidder, I would be charged with a crime - and rightfully so. The same should be true for their use of my secrets.

But the collection and use of this data is largely invisible to consumers and they currently have no effective control over it. Consumers must be able to protect their personal information online, and consumers should be in the driver's seat when it comes to how their personal information is shared by service providers. Customers' private information should not be used or shared for any other purposes, except for providing services or upgrades, without their express, affirmative consent. We strongly urge the FCC to move forward as expeditiously as possible to put in place meaningful privacy protections and control for broadband Internet users.
