EX PARTE OR LATE FILED

Dear Mr. Canard,

I am writing to request:

1. A moratorium on the shut-down of current low-power F.M stations that operate in local communities without a license from the F.C.C.
2. Establish simple legalizative procedures that local community stations can comply with.

Examples of successful stations such as Praise FM in Hartford provides much community value since its inception with its high percentage of locally originated coverage. There are numerous, similar stations through out the country reflecting the interests of the communities involved.

More and more we are witnessing a severe erosion of democratic participation of the radio waves.

Sincerely,

Ellen Donnelly Davis PhD.
