F. C. C.

CS Doc. 98-201

RECEIVED
MAR 30 1999
FCC MAIL ROOM

We dont agree with the recent F.C.C. proposal, stating the eligibility standards to our access to network programming.

We live in a rural area that doesn't receive a good quality signal the majority of air time. Our rural location and a good number of tree's and high frequency towers are prevalent.

EX PARTE OR LATE FILED

Do you agree that viewers should have the ultimate decision of whether the picture quality of their local network television show is inadequate?

We would appreciate your input on this issue so that we could enjoy a clear, precise picture on our satellite network.

Thank-you and please consider our plight.
