Mr. Kennard, Policy 10/10/99

CC DOCKET NO. 99-333

EX PARTE OR LATE FILED

I read the article in the LA. Times this week regarding your comments and concerns of the merger of MCI Worldcom and Sprint. I am very concerned and that is why I'm writing you, so much so, that I have tried to call Sprint Worldwide Headquarters twice this week, with no success since they have no answers yet. My concerns as with most mega mergers, and what is allowed to happen is:

I have been a Sprint long distance subscriber and user since they began this service and I had a choice for long distance service. I am not a user of any other part of the

service like internet, computer, PC's etc. I have continually and still do reject and refuse to even speak to the constant barrage of solicitors for AT&T & MCI long distance service, preferring to stay the course with Sprint. I do not listen there "come-ons" of give a little savings per minute or whatever, to get your business, so they can sell you other services I don't want.

I fear the merger will do exactly what other have done, sell off the best part of their service - ordinary citizens long distance service for phone, or raise rates to offset and pay for the earlier mentioned service, that majority of ordinary citizens

have shunned up to now, and don't care to have to pay for. Thank you for your careful consideration in these matters.

Mrs Alvin Kaodesh
