As a hard-of hearing person, I am concerned that 216-217 MHZ may be auctioned off. My remote control for my Phonak hearing aids uses this frequency, and it would be a big nuisance to encounter interference on this band in theatres.

To whom it may concern, OET 00-221

person I am concerned as a hardy hearing directed you to auction that Congress has [illegible] off some spectra that includes the frequency band 216-217 MHZ which is used for assistance listening device in theatres, schools, and other public places.

Please do everything in your power to see that this frequency band is not sold to commercial uses

Sincerely
Kathleen Mazzacane

Dear Mr. Salas:

Please relay to Congress that I, as a Hard-of-Hearing person, resent being relegated to a second, or third or fourth, class citizen. The loss of the frequency band 216-217 MHz would reduce me to a 2nd class citizen. Keep this band for those of us who suffer from poor hearing. In my first 80 years my hearing was excellent, but no longer. Remind Congress that we hearing impaired citizens vote.

Sincerely,
Henry J. Kear

Mr Secretary:

I belong to a hard-of-hearing support group which has worked hard to get assitive-listening systems installed in local theaters. I also help distribute [illegible] to our church-goings on Sunday morning.

Since many of these ALDs use the 216/217 MHz frequency band, I urge you NOT to sell this to commercial users. We need it for HOH people!

Dorothy Holland-Kaupp
