BCPM2

- applying expenses where they are actually incurred (e.g. actual metallic expense)
- Solution: Allow user to determine when expenses are applied per investment category, per line, or combination of both.
- Average Costs unaffected, cost distribution changes.

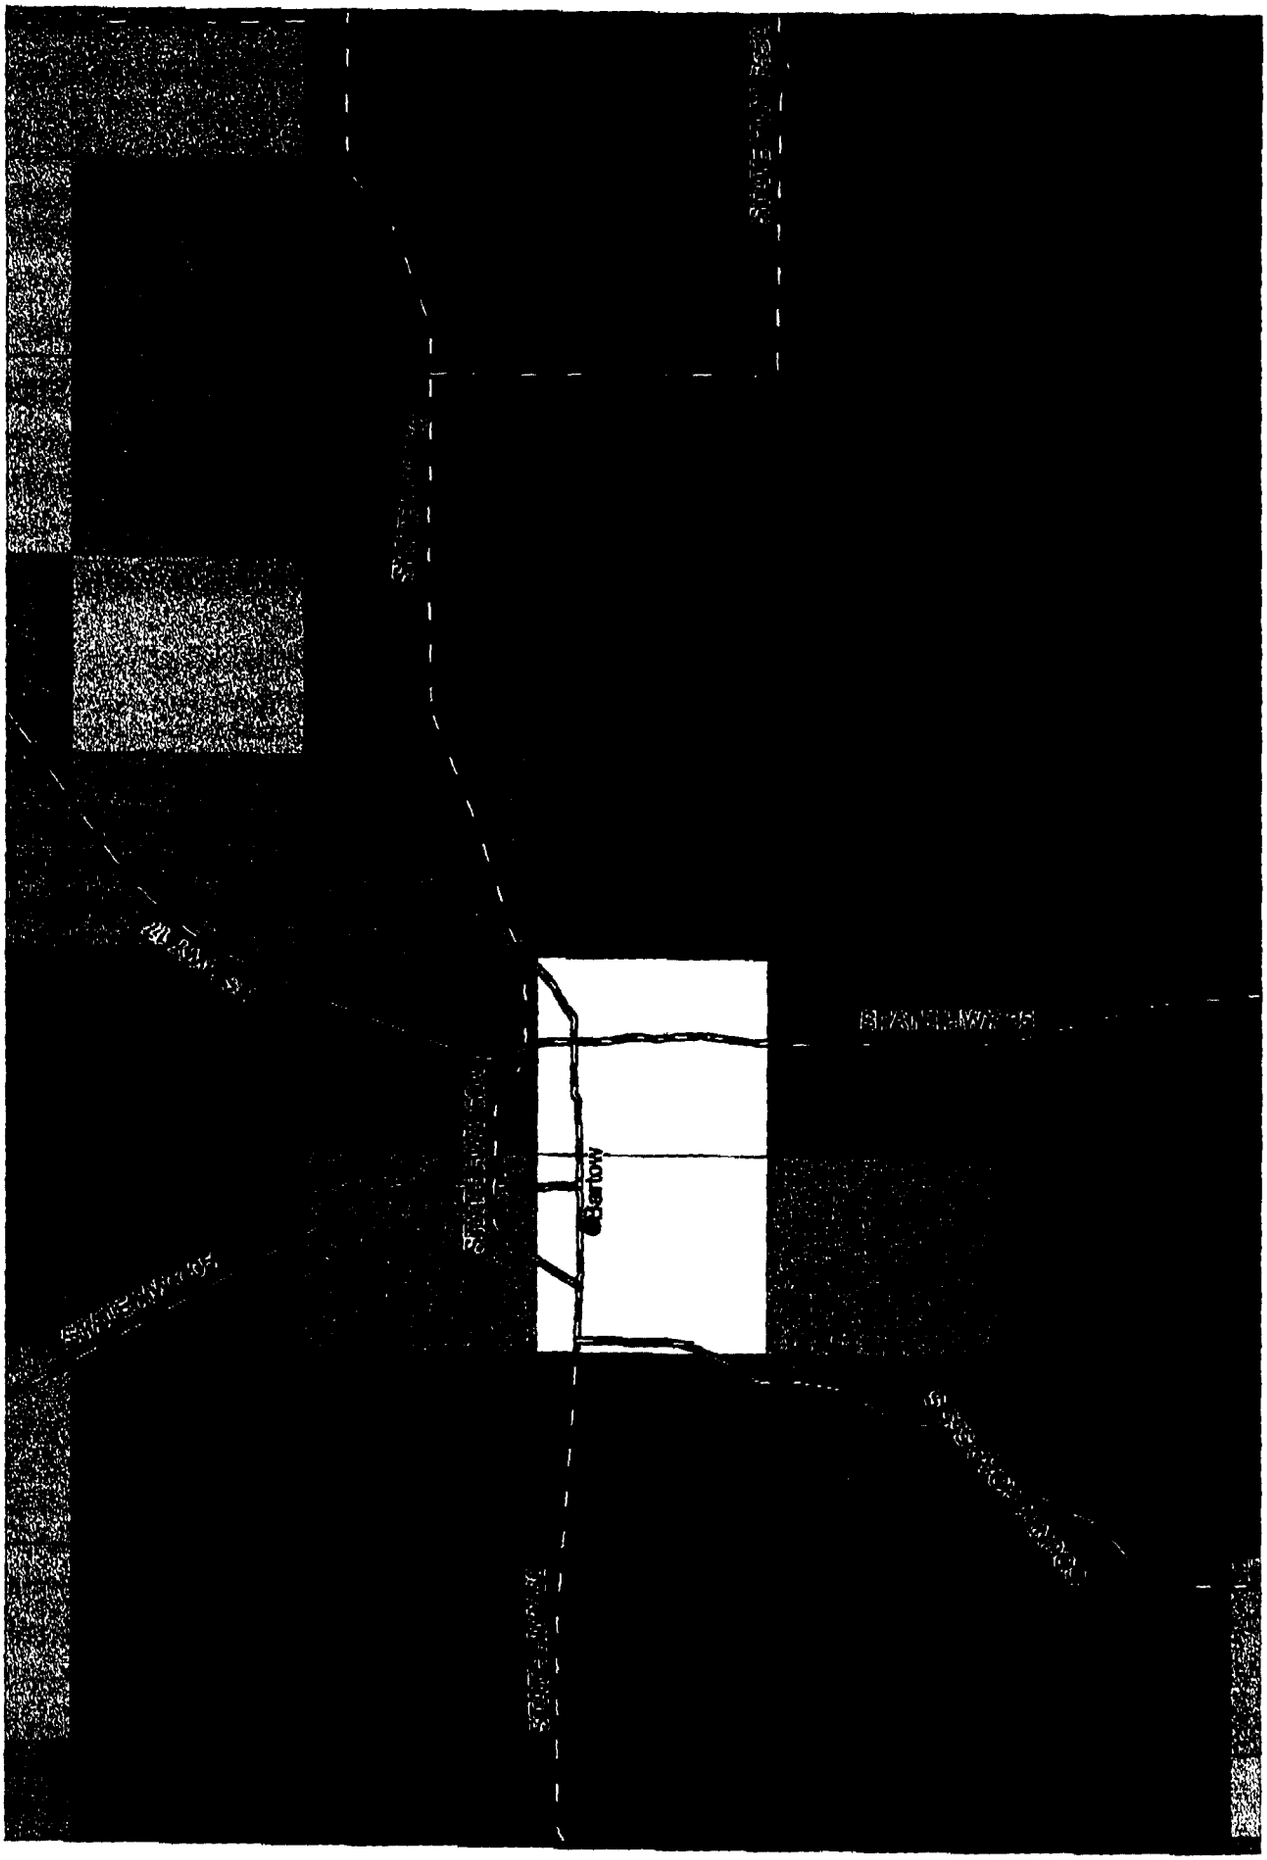
STATE HWY 26
Gainesville



Barrow

BCPM2

- Issue: Not always appropriate for more distant areas where large amounts of subfeeder required. Not economically efficient.
- BCPM2 Solution: Allowing feeder routes to "tilt" targets feeder at population, minimizes sub-feeder.
