RE: FCC Docket No. 02-278

Prior to the "no call list" being instigated in Indiana, we would receive 6 to 10 telemarketing calls per week.

They would usually come around family time between 5 to 9 pm.

Now we receive no more calls.

Indiana's "no call list" does work and we don't need anyone "tinkering" with it to make it have "exceptions" and ways for telemarketing people to make calls again, and invade our privacy.

If I need a service or product, I'll make the effort from my end to check it out and buy it.

Thank you very much,

Bryan J White
