AREA CODE 310 **WARNING** AREA CODE 909

California Wants to Take YOUR Wireless Phone Number!

The California Public Utilities Commission (CPUC) wants to take your wireless phone number and give it to a new **hard-wired** telephone customer in the 310 or 909 area code. **You would have no choice.** The overall takeback will affect about **three million** existing wireless customers and the CPUC has never asked wireless customers what they prefer. But there is a **better solution, a fair solution**—create a new area code for new customers, whether wireless or hard-wired, and let existing wireless customers keep their phone numbers!

If the CPUC proposal is approved, your wireless phone will need to be reprogrammed with your new phone number. If your phone is more than 1 1/2 years old, you may need to go to a store to get this done. In addition, you will need to notify customers, clients, family and friends of the number change.

If you don't want to be forced to change your wireless number, and want a better, fair solution, **contact the CPUC, and the Federal Communications Commission** (FCC), and tell them not to take back **your wireless phone number**. See contact information listed on the reverse.

Write today!

To send your message *automatically* to the CPUC and the FCC, visit

www.keep310.com or **www.keep909.com**

It's fast. It's easy. It's important.

If you would prefer to voice your opinion, you may contact the Commissioners at the following numbers:
