I vehemently oppose any and all proposed rule change to the Over the Air Reception Device (OTARD) rule to allow wireless companies to install RF microwave radiation antennas on private homes, apartment and other buildings, circumventing people's ability to control radiation producing devices on their homes, properties and residences. How dare the government force these dubious transmitters on PRIVATE residences and buildings we use. Surely, this is unconstitutional and unAmerican.

Sufficient scientific evidence should give all Americans the power to say NO to 24/7 transmitters put on places we live and spend time, and/or on light poles adjacent to our living and work and school buildings, such as small cell build-outs are planned to do.

Here is just a sample of the evidence of harm.

Peer Reviewed Science on Radiation from Small Cell Wireless Antennas, a ship-load of NEW science shows damage and risks.

A 2019 literature review found 93 out of 100 reputable studies show low RFR causes oxidative stress.

Oxidative stress interferes with normal cellular function and repairs, and is implicated in diseases and conditions, including ADHD, Cancer, Alzheimer's disease, atherosclerosis, heart failure, myocardial infarction, chronic fatigue syndrome, depression and more. RFR keeps the body on constant alert but interferes with the ability to the repair damage. It is a general toxic exposure that can cause or MAKE WORSE many diseases and conditions.

"Oxidative mechanisms of biological activity of low-intensity radiofrequency radiation" found that 93 of the 100 peer-reviewed studies dealing with oxidative effects of low-intensity RFR, confirmed that RFR induces oxidative effects in biological systems."

Besides health impacts, **our privacy is at also huge risk** from up-close-and-personal transmitters actively searching our homes for data and connections. I strongly object to a rule or law change to force us to accept the all and any transmitters on or near our homes, apartments and other buildings we use to live in. I do not give your agency permission to do this. You are NOT elected officials. As a person with constitutional rights, I order you to stop this gross overreach immediately. My lawmakers are being told about this. You cannot get away with it.
