Goodmorning

May 8 2003

It has come to my attention that some of the larger broadcasting companies (AOL Time warner, CBS and ABC) are requesting that the Federal Communications Commission relax the "Broadcast Ownership Rules"

As a private citizen any relaxation of these rules scare me to death. Why! Because of the quest of many powerful companies and individuals to join the world in a One world government, a one world economy. Thank you very much but I want no part of that nor does any student of world history.

I beg you not to consider this request as our freedom and liberties are at stake.

What better way for our enemies to infiltrate our shores and boarders than through a media that is BIG, and more Powerful than the Government it's self.

Please help save the United States of America for future generations - do not change the current Broadcast Ownership Rules

Sincerely

Former Marine - always an American
