~~Dear Senator~~ Hutchison, 17 Jun 03

02-277

I am very proud of you. Your position against the FCC's decision to allow Giant Corporations "Lobble up" and control all or most Media outlets in any given market is "right on".

However, after listening to the Chairman of the FCC and the woman who co-conspires with him in supporting the "big boys" — I suggest your Committee ask for their resignation.

I suggest this because after listening to these two FCC Board Members answer questions, one could only conclude: They b~~oth~~ have a character and personality disorder manifested by making obvious twisted and false statements that could only be made if they believe you, your fellow Senators and the public are so stupid we don't know the difference.

Many years ago (I am over 70) when I was a First Sergeant of a unit with over 300 - you might find one or two people in a year with this defect.

To find two out of five on a powerful US Commission is unbelievable. But, it is true and it is unacceptable.

Of course another explanation could be they are stupid "crooks" who really work for big business. Their past ties and present associations and actions give some validity to this thought. He does look a little like Al Capone - without the scar.

Also, most other areas of the FCC responsibilities and authority are used to favor big business with little or no regards for the interest of the general public.

All of the above gives credence to my suggestion - they be asked to resign.

With Respect,

Howard Nixon
