critical administrative applications in the coming school year. The likely cost of such a migration in both time and money would be considerable.

F. Mitigating Concerns for Performing Contract

How does your firm propose mitigating these concerns?

While ENA has no delivery concerns in performing the requirements of this RFP and resulting contract as noted in **Tab IVE. Delivery Concerns** above, as a leading managed service provider we do have processes and procedures in place to quickly address any and all service issues that might occur. Please see **Tab IF. Timeline for Installation and Tab IVC. Delivery Requirement Understanding** for complete information on our customer-centric implementation, installation and ongoing service support.

G. Contractor Responsibilities

Installation

1. **The contractor shall deliver and install all hardware and software onsite at consortium facilities.** ***(Addresses Contractor Responsibilities A.1)***

ENA will deliver and install all hardware in support of managed Internet services onsite at participating Consortium school district facilities. Client software for ENA Live is automatically downloadable via a link provided to the users of the service by ENA. Telephones associated with ENA voice services are designed to be easily installed by the participating Consortium school district. ENA will provide installation service for the telephones as an optional service.

2. **The contractor shall provide their own tools.** ***(Addresses Contractor Responsibilities A.2)***

ENA will provide all tools necessary to perform installation and ongoing support for ENA services.

3. **The contractor shall install and test the system during agreed upon work hours.** ***(Addresses Contractor Responsibilities A.3)***

As noted in **Tab IF. Timeline for Installation**, ENA will work closely with each participating Consortium school district to schedule installation and test activities at a time agreeable to the school district. We are highly attuned to the unique requirements of the K-12 user population as related to testing schedules, in-service days, holidays, and any number of special events that may affect site access and tolerance for service-impacting change activity. For new installation activity, understanding these factors is a primary focus of ENA project kickoff activity; and, we remain flexible through the life of the project and the lifecycle of service delivery to accommodate these unique and changing requirements.

Training and Support

1. **The contractor shall provide onsite training to staff identified by the LEA.** ***(Addresses Contractor Responsibilities B.1)***

As part of its commitment to superior customer care, ENA provides training for each of the services required by this RFP.

- **Managed Internet Access** – ENA will provide access to ongoing web-based training for SCS's and participating Consortium school district's network staff on all our customer accessible network monitoring and management tools via scheduled webinars and online help functionality.

- **Voice over IP** – As part of each ENA SmartVoice implementation, ENA provides administrative training sessions to cover all the details of the intuitive but powerful administrative interface. As part of that training session, ENA also includes "train-the-trainer" documentation so that district personnel can become empowered to train their end users as desired. For end users, ENA provides a Quick Start Guide along with each IP Phone, and also provides a variety of context-specific help and training materials on-line, including dozens of training videos broken down by phone model and feature, so users can quickly get the information they need, without having to watch a long training presentation. Each video is approximately 30 seconds to two minutes long and provides detailed instruction and up close views on how to use specific ENA SmartVoice features. ENA can also provide additional in-person training sessions for ENA SmartVoice users in half-day or full-day increments.

- **Video Conferencing** – As part of each ENA Live videoconferencing implementation, ENA will provide live training on how to use the ENA Live web interface and software client. This training will be conducted over video, and normally does not require an ENA representative to be present at district facilities. ENA also provides both an on-line Quick Start Guide and a more advanced, in-depth instructional guide for using ENA Live. Both guides are available to all ENA Live users. ENA can also provide additional in-person ENA Live training sessions and train-the-trainer- sessions in half-day or full-day increments.

2. **The contractor shall provide management for the continued operations of all solutions to the response of this RFP.** ***(Addresses Contractor Responsibilities B.2)***

With ENA managed service means full service and the ongoing management and support of our services and products are an integral component of our overall solution. ENA has a dedicated technical support structure that is fully staffed, capable and ready to handle all aspects of the delivery and ongoing management and maintenance requirements SCS and participating school districts will need for the full support of all the services and products required by this RFP. ENA has provided detailed information on the support structure, resources, processes and procedures in place to sustain the continued operations of the services proposed in **Tab IH. Quality Assurance Plan.**

Tab V. Past Performance and References

A. References (Addresses Required Responses Table Item V.a.)

ENA has provided below, a list of ten current customers that purchase services that have characteristics identical to or very similar to those requested in this RFP. We focused on references from various standpoints:

- **Tennessee references:**
  - Metropolitan Nashville Public Schools
  - Knox County Schools
  - Bedford County Schools
  - Maury County Schools
  - Greeneville City Schools Consortium
  - Milan/Lenoir City
- **Small and medium school districts representative of the school districts participating in the SCS Consortium**
  - Bedford County Schools
  - Maury County Schools
  - Greeneville City Schools
  - Milan/Lenoir City
  - Fayette County Schools
  - MSD Warren Township
- **Single large school districts serving large student populations**
  - Metropolitan Nashville Public Schools
  - Knox County Schools
  - Atlanta Public Schools
  - Prince George's County Public Schools
- **Large statewide consortiums similar to the Consortium of school districts listed in this RFP:**
  - Greeneville City Schools/Consortium

We have included the required contact information and description of services for each of these customers and encourage you to reach out to them or any of the school districts we serve, as we are confident you will receive positive feedback from each and every one of them. In addition to the references below, ENA has also included letters of recommendation in **Exhibit 14** from:

"Great people. Great service. Great products. Can't say enough about ENA."

Mark Howell, Technology Coordinator
Manchester City Schools, Tennessee

- Metropolitan School District of Warren Township, Indiana
- Metropolitan Nashville Public Schools, Tennessee
- Maury County School District, Tennessee

In addition to the statewide consortium reference included above, ENA also provides services under multiple state contracts in five other states and would be happy to provide additional detail and contact information for these projects upon request.

- **Indiana Department of Education – Statewide K-12 Network**
- **Indiana State Library – Statewide Library Network**
- **Idaho Department of Administration - Idaho Education Network**
- **Vermont Department of Education - Statewide K-12 Contract**
- **New Hampshire Statewide K-12 Connectivity Consortium**

Furnish references for each of the three categories of service listed in the title of this RFP. Extra weight will be given to Tennessee based references and to reference of the size and scope of this RFP.

The table below indicates which of the three categories of service apply to each of the references provided:

Reference 1

Customer:	**Metropolitan Nashville Public Schools**
Customer Address:	2601 Bransford Avenue, Nashville, TN 37204
Contact Name and Title:	John Williams, Executive Director of Information Systems
Contact Phone:	(615) 259-8433
Contact E-mail:	john.williams@mnps.org
Contact Fax:	(615) 291-6431
Services Provided:	Full suite of ENA managed services deployed district-wide including Internet access, wide area network, hosted interconnected voice, desktop videoconferencing and Consortium Partner Program products
Dates of Service:	July 1998 to Present

Budgeted Amount vs. Final Billing Amount:
ENA has been engaged with Metro-Nashville Public Schools (MNPS) on multiple projects and has worked with them to implement services on an annual basis that fit within MNPS' budget. As outlined below, the data and voice projects are both being approached in this manner. In no instances that ENA is aware has the final billing amount exceeded the budgeted amount on an annual basis, but instead ENA has worked to identify cost reduction opportunities throughout the year to enable MNPS to achieve cost savings or accelerate implementation activities. Final Billing amount related to the category of services requested in this RFP for the 2012-2013 fiscal year is $2,530,260.

Description of Services Provided:
MNPS is Tennessee's second largest school district with approximately 73,000 students and 146 school sites. ENA has provided managed network and Internet access services to MNPS since July 1998, utilizing a variety of technologies.

Effective July 2005, MNPS selected ENA to begin a multi-year phased implementation to upgrade all sites to 100 Mbps fiber prioritized by bandwidth needs and funding availability. In the first phase of the project all high schools and the majority of the middle schools were upgraded. Due to the efficient use of E-Rate funds, the district requested ENA to upgrade all remaining sites in 2009. MNPS is served by multiple local incumbent telephone companies, driving the need for ENA to utilize the services of multiple carriers to provide a comprehensive and cost-effective solution to reach all sites. ENA leverages multiple providers to serve all sites with 100 Mbps connectivity as well as some strategic links supplied by the local power company to add resiliency to the district's wide area network.

In 2010, MNPS issued an RFP for managed Internet access, Interconnected VoIP and videoconferencing services. The RFP was structured in a manner that allowed other school districts throughout Tennessee to participate. ENA was awarded a contract for all three categories of service. As a result, MNPS and the majority of school districts in Tennessee now purchase a variety of services from this contract. MNPS is in the process of implementing ENA's Interconnected VoIP solution. Similar to the fiber project noted above, this project is being implemented in a phased approach as premises based equipment reaches end of life or requires costly maintenance.

In addition to the services listed above, ENA provides hosted content filtering, firewall services and extensive traffic management services in support of district-wide applications such as their student management system.

Customer:	**Knox County Schools**
Customer Address:	912 South Gay Street, Knoxville, TN 37902
Contact Name and Title:	Jim Idol, Technology Services Coordinator
Contact Phone:	(865) 594-1726
Contact E-mail:	idolj@k12tn.net
Contact Fax:	(865) 594-1325
Services Provided:	Broad Suite of District-wide ENA Managed Services including Internet access, wide area network, desktop videoconferencing and Consortium Partner Program products
Dates of Service:	July 1998 - Present

Budgeted Amount vs. Final Billing Amount:
ENA has been engaged with Knox County Schools on multiple projects and has worked with them to implement services on an annual basis that fit within the district's annual budget. In no instances that ENA is aware has the final billing amount exceeded the budgeted amount on an annual basis, but instead ENA has worked to identify cost reduction opportunities throughout the year to enable Knox County to achieve cost savings or accelerate required service upgrades Final Billing amount related to the category of services requested in this RFP for the 2012-2013 fiscal year is $1,551,420.

Description of Services Provided:
Knox County Schools is the third largest school district in Tennessee with approximately 53,000 students and 92 facilities. ENA has been providing a variety of managed network and Internet access services to Knox County Schools for over a decade under multiple state and statewide consortium contracts.
In mid-2005 they engaged with ENA to upgrade the district's wide area network and deploy 100 Mbps fiber-based service to all locations. As an extension of this project, ENA worked in conjunction with Knox County government to establish direct connections between the school district and the county to optimize the performance of mission-critical applications and exchange of data between the school district and the county.

In addition to managed telecommunication and Internet access services, ENA is providing hosted firewall and caching services, extensive network consulting and a variety of supplemental curriculum and safety products through ENA's Consortium Partner Program which enables ENA's customers to take advantage of low, negotiated volume pricing for these products.

Knox County Schools is also piloting ENA's hosted multi-point desktop videoconferencing service.

Customer:	**Bedford County School District**
Customer Address:	500 Madison Street, Shelbyville, TN 37160
Contact Name and Title:	Ben Barrett, Director of Curriculum and Technology
Contact Phone:	(931) 703-4334
Contact E-mail:	barrettb@bedfordk12tn.net
Contact Fax:	(931) 685-0698
Services Provided:	Full suite of ENA managed services deployed district-wide including Internet access, wide area network, hosted interconnected voice, desktop videoconferencing and Consortium Partner Program products
Dates of Service:	July 1998-June 2002, July 2005-Present

Budgeted Amount vs. Final Billing Amount:
ENA has been engaged with the Bedford County School District (BCSD) on multiple projects and has worked with them to implement services on an annual basis that fit within the district's annual budget. In no instances that ENA is aware has the final billing amount exceeded the budgeted amount on an annual basis, but instead ENA has worked to identify cost reduction opportunities throughout the year to enable Bedford to achieve cost savings or accelerate required service upgrades. Final Billing amount related to the category of services requested in this RFP for the 2012-2013 fiscal year is $553,020

Description of Services Provided:
BCSD is a K-12 school district located in middle Tennessee serving 8,000 students. ENA has been providing a variety of managed network services to the district over the last 10 years under multiple state and statewide consortium contracts.
ENA began serving BCSD with managed network services in 1998 utilizing a T1 infrastructure. In 2002, the district decided to explore wireless technologies to increase the bandwidth to each site. After experiencing significant challenges with the wireless provider that was selected, BCSD turned once again to ENA to serve the district with managed Internet and network services. In 2007, ENA implemented fiber to every site throughout the district to replace the services being provided by the wireless service provider, significantly increasing the capacity and reliability of the district's wide area network.

In 2008, BCSD selected ENA to begin replacing individual key/PBX systems throughout the district with ENA's Hosted Interconnected Voice over IP solution. We are now serving over half of the district's sites with our managed voice solution.

In addition to ENA's managed voice and data services, BCSD piloted and is now deploying ENA's hosted multi-point desktop videoconferencing service as a very cost-effective instructional and administrative tool throughout the district. BCSD also participates in ENA's Consortium Partner Program which enables ENA's customers to take advantage of low, negotiated volume pricing on a variety of supplemental curriculum and safety products.

Customer:	**Maury County School District**
Customer Address:	501 West 8th Street, Columbia, TN 38401
Contact Name and Title:	Tommy Schuyler, Technology Coordinator
Contact Phone:	(931) 380-1490
Contact E-mail:	tschuyler@k12tn.net
Contact Fax:	(931) 388-1644
Services Provided:	Full suite of ENA managed services deployed district-wide including Internet access, wide area network, hosted interconnected voice, desktop videoconferencing and Consortium Partner Program products
Dates of Service:	July 1998 to Present

Budgeted Amount vs. Final Billing Amount:
ENA has been engaged with Maury County School District (MCSD) on multiple projects and has worked with them to implement services on an annual basis that fit within the district's annual budget. In no instances that ENA is aware has the final billing amount exceeded the budgeted amount on an annual basis, but instead ENA has worked to identify cost reduction opportunities throughout the year to enable Bedford to achieve cost savings or accelerate required service upgrades. In fact, MCSD documented substantial savings as a result of ENA's fiber implementation in 2005-2006. Final Billing amount related to the category of services requested in this RFP for the 2012-2013 fiscal year is $578,400.

Description of Services Provided:
MCSD is a K-12 school district located in middle Tennessee serving nearly 12,000 students. ENA has been providing a variety of managed network and Internet access services to the district for nearly 14 years under multiple state and statewide consortium contracts.

In 2005, the district contracted with ENA as its managed service provider, to evaluate and implement a cost effective means to establish 100 Mbps fiber connections to each site. Upon completion of this project in late 2005, the district was able to centralize a number of curriculum and administrative applications and disaster recovery processes, improving the instructional process, increasing productivity, and realizing significant financial benefits.

In 2007, MCSD selected ENA to begin implementing ENA voice services via PRI and analog connections, as well as our Interconnected Voice over IP solution, to replace some legacy PBX and key systems. Over the last several years, as legacy systems have reached end of life, ENA has upgraded additional sites throughout the district and now serves every site in the district with ENA hosted interconnected voice services.

In addition to ENA's managed voice and data services, MCSD participates in ENA's Consortium Program which enables ENA's customers to take advantage of low, negotiated volume pricing on a variety of supplemental curriculum and safety products and they are currently piloting ENA's desktop videoconferencing solution.

Customer:	**Greeneville City Schools**
Customer Address:	129 W Depot Street, Greeneville, TN
Contact Name and Title:	Beverly Miller, Assistant Director of Schools for Administration
Contact Phone:	(423) 787-8019
Contact E-mail:	millerb@gcschools.net
Contact Fax:	(423) 638-2540
Services Provided:	Full suite of ENA managed services deployed district-wide including managed Internet access, wide area network, hosted interconnected voice, desktop videoconferencing services and Consortium Partner Program products
Dates of Service:	July 1, 2005 to Present

Budgeted Amount vs. Final Billing Amount:
ENA has engaged with Greeneville City Schools (GCS) on multiple projects and has worked with them to implement services on an annual basis that fit within the district's annual budget. In no instances that ENA is aware has the final billing amount exceeded the budgeted amount on an annual basis, but instead ENA has worked to identify cost reduction opportunities throughout the year to enable GCS to achieve cost savings or accelerate required service upgrades. Final Billing amount related to the category of services requested in this RFP for the 2012-2013 fiscal year is $269,880.

Description of Services Provided:
GCS is a small school district located in East Tennessee known for its leadership in education technology. ENA has provided GCS a variety of managed network services since 2005. Our first project with GCS was to implement scalable Internet Access to the district office as well as district-wide fiber to every school. Several years ago GCS began implementing ENA SmartVoice, ENA's Interconnected VoIP solution across the district in a phased approach, replacing legacy PBX solutions as they reach end of life and to avoid significant maintenance expenditures. GCS also utilizes ENA's cloud-based videoconferencing service and various supplemental curriculum tools available through ENA's Consortium Partner Program.

GCS also performed the role of E-Rate Consortium lead on behalf of all participating Tennessee school districts from July 1, 2007 through June 30, 2011 and managed the Consortium contract that was utilized by over 100 of the school districts in Tennessee to purchase ENA's services.

Customer:	**Lenoir City Special School District**
Customer Address:	2145 Harrison Ave., Lenoir City, TN 37771
Contact Name and Title:	Dr. Chris Smallen, Technology Coordinator
Contact Phone:	(865) 986-9022 ext. 1
Contact E-mail:	csmallen@lenoircityschools.com
Contact Fax:	(865) 988-6732
Services Provided:	Full suite of ENA managed services deployed district-wide including managed Internet access, wide area network, hosted interconnected voice, and Consortium Partner Program products
Dates of Service:	July 1998 to Present

Budgeted Amount vs. Final Billing Amount:
ENA has been engaged with Lenoir City School District (LCSD) on multiple projects and has worked with them to implement services on an annual basis that fit within the district's annual budget. In no instances that ENA is aware has the final billing amount exceeded the budgeted amount on an annual basis, but instead ENA has worked to identify cost reduction opportunities throughout the year to enable Lenoir City to achieve cost savings or accelerate required service upgrades. Final Billing amount related to the category of services requested in this RFP for the 2012-2013 fiscal year is $157,680.

Description of Services Provided:
LCSD is a small school system located in east Tennessee serving approximately 5,400 students. ENA has been providing a variety of managed network services to the district over the last 10 years under multiple state and statewide consortium contracts.

ENA currently provides managed Internet access and WAN services, hosted firewall services, content filtering, and dial-tone services via ENA's PRI service. Within the last twelve months, ENA completed an upgrade to deliver 1 Gbps of connectivity to every school in the district and is working with LCSD to finalize a plan to migrate the district's voice service to ENA's hosted VoIP service, ENA SmartVoice.

LCSD also participates in ENA's Consortium Partner Program which enables ENA's customers to take advantage of low, negotiated volume pricing on a variety of supplemental curriculum and safety products.

Reference 7

Customer:	**Atlanta Public Schools**
Customer Address:	130 Trinity Avenue SW, Atlanta, GA 30303
Contact Name and Title:	Chad Zemer, Executive Director, IT Infrastructure
Contact Phone:	(404) 802-2134
Contact E-mail:	czemer@atlanta.k12.ga.us
Contact Fax:	(404) 802-1404
Services Provided:	Broad suite of ENA managed services deployed district-wide including Internet access, wide area network and ENA hosted interconnected voice services
Dates of Service:	July 2011 to Present

Budgeted Amount vs. Final Billing Amount:
ENA has been engaged with Atlanta Public Schools (APS) on multiple projects and has worked with them to implement services on an annual basis that fit within the district's annual budget. In fact, ENA's initial project to implement Metro-Ethernet services to all sites across the district represented significant savings as ENA's managed service costs were less than what the district was spending in the previous year for unmanaged service. ENA has recently implemented SIP trunking at APS which also resulted in significant savings over the traditional PRI service the district was receiving. Final Billing amount related to the category of services requested in this RFP for the 2012-2013 fiscal year is $1,462,356

Description of Services Provided:
APS is the fifth largest school district in Georgia with approximately 51,283 students and 90 facilities. ENA provides managed wide area network (WAN) services, Internet Access, and SIP Trunking services in support of the district's unified communications solution.
In December 2010, APS issued a competitive bid and selected ENA to provide wide area network (WAN) data connectivity services to every school and administrative site across the district. APS was seeking the best value to meet their requirements. ENA worked with the APS team to develop a network design that provides the resiliency APS was seeking, and scalability to meet future bandwidth demands. The solution design provides 100 Mbps service to each end site with the capability to scale up to 1 Gbps and beyond to meet future requirements. ENA is delivering a turnkey managed service that includes the provisioning, installation and ongoing maintenance of all circuits and hardware and includes 24x7x365 proactive network monitoring and support.

In 2011, APS issued an RFP for Internet Service and Session Initiated Protocol (SIP) trunking via Telx for all of their schools and administrative sites and ENA was selected to provide dedicated Internet access and SIP Trunking services to APS. ENA provided consulting and support during the selection and implementation of district equipment, transition to ENA Internet access and throughout the port of 10,000 DIDs for ENA Hosted Interconnected SIP trunking services. The project was completed within the district's desired timeframe and exceeded customer expectations.

Reference 8

Customer:	**Fayette County Public Schools**
Customer Address:	210 Stonewall Avenue W, Fayetteville, GA 30214-1518
Contact Name and Title:	Curt Cearley, Director Technology Services
Contact Phone:	(770) 460-3990 ext. 101
Contact E-mail:	cearley.curt@mail.fcboe.org
Contact Fax:	(770) 460-8191
Services Provided:	Broad suite of ENA managed services deployed district-wide including Internet access and wide area network services
Dates of Service:	July 2011 - Present

Budgeted Amount vs. Final Billing Amount:
Based on the results of their competitive procurement, Fayette County Public Schools (Fayette) budgeted just over $600,000 for the ENA district-wide fiber upgrade and Internet Access project. During the implementation ENA assisted in monitoring actual Internet bandwidth utilization and worked to reduce the district's Internet costs based on actual usage. Final Billing amount related to the category of services requested in this RFP for the 2012-2013 fiscal year is $561,600 (less than the originally budgeted amount.

Description of Services Provided:
Fayette is comprised of 30 schools in the communities of Brooks, Fayetteville, Peachtree City, Tyrone and Woolsey. Fayette serves more than 21,120 students in 17 elementary schools, six middle schools, five high schools, one alternative high school and one open-campus high school. Since 2000, ten district schools have been declared Georgia Schools of Excellence and four have earned the distinction of National Blue Ribbon Schools of Excellence.
In early 2011, Fayette issued an RFP for managed wide area network (WAN) and broadband Internet access services and selected ENA to provide these services to the district's more than 30 schools and administrative sites. As part of a turnkey managed service, ENA provides the provisioning, installation and on-going maintenance of all circuits and network and security equipment and hardware including 24x7x365 proactive network monitoring and E-Rate filing assistance for the life of the contract.

Reference 9

Customer:	**Metropolitan School District of Warren Township**
Customer Address:	975 North Post Road, Indianapolis, IN, 46219
Contact Name and Title:	James Aldridge, Chief Technology Officer
Contact Phone:	(317) 869-4323
Contact Email:	jaldridg@warren.k12.in.us
Contact Fax:	(317) 869-4336
Services Provided:	Broad suite of ENA managed services deployed district-wide including Internet access and hosted interconnected voice services
Dates of Services:	July 2005-Present

Budgeted Amount vs. Final Billing Amount:
ENA has been engaged with the Metropolitan School District of Warren Township (MSD) on multiple projects and has worked with them to implement services on an annual basis that fit within the district's annual budget. Our most recent project to implement district-wide hosted VoIP services was completed ahead of schedule and on budget, resulting in overall cost savings earlier than the school district had planned. In no instances that ENA is aware has the final billing amount for all projects exceeded the budgeted amount on an annual basis. . Final Billing amount related to the category of services requested in this RFP for the 2012-2013 fiscal year is $446,520.

Description of Services Provided:
ENA was selected in 2012 to upgrade MSD's entire voice infrastructure. MSD had unique voice requirements and strict timelines for service transitions. ENA as a trusted partner was able to customize an implementation plan that was tailored specifically to their needs. This plan was developed and executed to provide the district with a seamless transition that eliminated risks associated with porting 20 sites from their current provider to ENA. ENA successfully transitioned eight SmartLink PRI trunking solutions and executed the transition of over 1,300 extensions of ENA SmartVoice over a three month period. In August 2012, ENA completed the transition of 200 Mbps of managed Internet access to service the districts data and voice requirements with anticipation to grow rapidly.

Reference 10

Customer:	**Prince George's County Public Schools**
Customer Address:	14201 School Lane, Upper Marlboro, MD 20772
Contact Name and Title:	Robin Evans, Telecommunications and E-Rate Manager
Contact Phone:	(301) 925-2890
Contact E-mail:	revans@pgcps.org
Contact Fax:	(301) 952-6266
Services Provided:	District-wide ENA managed wide area network services
Dates of Service:	July 2010 to Present

Budgeted Amount vs. Final Billing Amount:
ENA has been engaged with Prince George's County Public Schools (PGCPS) on multiple projects and has worked with them to implement services on an annual basis that fit within the district's annual budget. In fact, ENA's initial project to implement Metro-Ethernet services to all sites across the district represented significant savings as ENA's managed service costs were less than what the district was spending in the previous year for unmanaged service for a documented savings of over $400,000 annually. Final billing amount for the 2012-2013 fiscal year is $2,096,640.

Description of Services Provided:
PGCPS is the 2nd largest school system in the State of Maryland and the 18th largest in the nation with an enrollment of approximately 130,000 students. PGCPS currently employs approximately 18,300 full-time employees, which includes approximately 9,000 teachers.

On January 26, 2010, ENA was selected to provide E-Rate high-speed service by PGCPS. The project is a multi-year contract for high-speed managed Internet access and data service to over 150 PGCPS school and administrative sites. The solution design provides 10, 100 Mbps and 1 Gbps service with capability to scale up to meet all future requirements.

The agreement reflects a saving of over $405,500 per year over the incumbent contract for the same service, providing a total district savings of more than $1.2 million over the life of the contract.

ENA is providing a fully managed service including a comprehensive suite of support services all delivered in a Priority 1 E-Rate eligible package. ENA's turnkey solution enables PGCPS to reduce costs while receiving a superior level of service.

Tab VI. Proforma Contract

Attached at the end of this solicitation is the proposed contract. Those respondents submitting a signed and notarized contract, without exceptions, will receive the maximum points allowed for this portion of the RFP evaluation. You may, in your response in this tab, indicate exceptions to the general terms and conditions of the RFP but scores will reflect SCS's assessment of the impact for these considerations and may reject the proposal as non-responsive if, in the evaluation of SCS, the requested Changes are unacceptable. The points to be awarded for this category shall be 10(TEN) points for signature; or 5 (FIVE) points for completely acceptable exceptions to the contract, or 0 (Zero) points for unacceptable exceptions.

ENA accepts all the terms and conditions of the proposed contract without exceptions. A signed and notarized contract is included in this section.

Provide a contact person to field questions from the evaluation team. This person should be available by phone on March 1, 2013 from 1:00 to 4:00 pm.

Provide the name, title, email address and phone number for the person.

   a. Audited Financial Statements – Past three years as required
   b. Insurance Certificate – Demonstrating required levels of insurance
   c. Letter or Bondability – Meeting performance bond requirements

Tab VIII. Optional Services

Powering education, connecting communities, enabling new technologies and safety and security are the ultimate goals of the services and solutions ENA provides. In addition to our Infrastructure as a Service suite of data, voice and video solutions, ENA delivers a set of complementary and innovative service options that enhance our connectivity, communication and collaboration suite. The comprehensive range of products and services offered by ENA provide a foundation that serves our customers in addition to connecting them. **In addition to the service requested, ENA has the ability to cost-effectively deliver the following additional optional services:**

1. ENA Managed Wi-Fi
2. ENA NetShield Firewall
3. Gaggle E-mail Archiving
4. ENA Engineering Support
5. ENA Quality of Service (QoS) and Traffic Management
6. Consortium Partner Program Products

For a full listing of all of ENA's products and services please visit our website at www.ena.com.

1. ENA Managed Wi-Fi

ENA is capable of providing a holistic managed wireless LAN solution that will ensure an optimal experience for all wireless end users. The ENA managed solutions for wireless services includes ENA's industry-leading management service along with the local control and expansive scalability you need. By extending our customer-centric, managed service approach to wireless services, we will provide **superior end-to-end visibility, reliability and support for wireless services**. The diagram below depicts a graphical interpretation of ENA's Managed Wi-Fi solution.

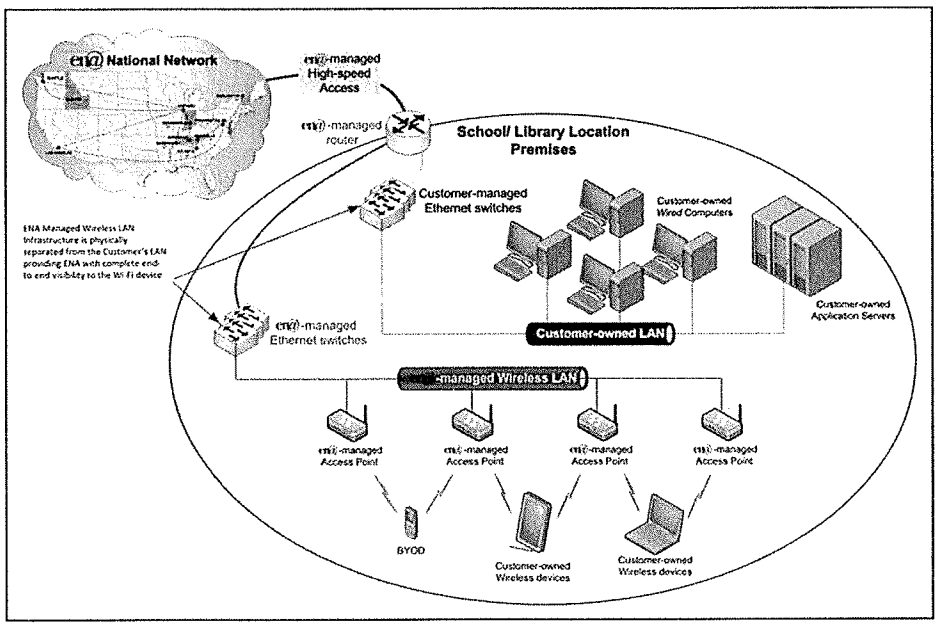

Figure 47: ENA Managed Wireless LAN Service

Managed Wireless Service

ENA's managed wireless service extends our Infrastructure as a Service approach to include a wireless infrastructure at a school or library. We are confident that our approach will result in a more robust overall solution with a single entity responsible for end-to-end wireless connectivity for mobile computing devices and individually-owned devices brought into the school by students, teachers and the community. With ENA as your managed wireless infrastructure provider we will be able to pro-actively analyze and troubleshoot issues which may range from local interference of radio frequency (RF) signal strength on the one hand to WAN and Internet connectivity on the other.

Additionally, ENA-managed wireless is designed to accommodate both the immediate needs of school and libraries as well as the future aspirations of districts and libraries in their pursuit to deliver wireless access to end point devices beyond what the school or library initially expects. ENA will provide a standards-based, flexible wireless solution that will meet and exceed local school and library wireless connectivity requirements. Bring your own device concepts, or BYOD, is a growing trend and challenge for schools and libraries. With an ENA provided solution, schools and libraries can be confident that they have a partner that can help navigate through these challenging and changing dynamics. ENA's managed wireless infrastructure will not only ensure prioritized bandwidth for school and library-owned wireless devices, but will also be able to provide optional service to BYOD and/or guest devices. As schools and libraries make local investments in technology and the number and variety of devices deployed in classrooms and libraries continues to grow, the wireless network infrastructure must be able to accommodate a wide variety of wireless devices while, at the same time, establishing priority networking for the school or library-owned mobile computing devices. ENA's managed wireless service will deliver both.

ENA's managed wireless service builds on years of experience designing, implementing and supporting world-class, highly scalable networks for education and libraries. Our managed wireless solution includes all wireless access points, power over Ethernet (PoE) switches, controller hardware and software, cabling, and implementation and support resources necessary to deliver seamless end-to-end connectivity service for schools and libraries. Our implementation will ensure more than sufficient capacity and coverage to enable all instructional and administrative areas to function wirelessly. Students, teachers, librarians and patrons will be able to seamlessly roam from access point to access point (AP) without needing to re-authenticate as they move among the various rooms and areas of the school or library building. Coverage for wireless devices will include access to all primary high school instructional areas, core administrative areas, academic classrooms, frequently used study areas, media centers, assembly spaces, library and administrative offices. ENA-managed wireless will include:

- Full support for all IEEE Wireless over Ethernet standards, including legacy 802.11a/b/g as well as the most recent standard, 802.11n
- 2.4 and 5 GHz coverage for all areas
- Adaptive radio band management technology that will automatically place connected wireless clients on the spectrum and channel that most optimizes performance and mitigates RF interference

- A completely separate, fully monitored wired LAN per facility to provide PoE to the access points and end-to-end network connectivity between the wireless clients and the Internet
- IP address management and delivery (DHCP) services for all wireless devices
- Routing and security configuration to enable wireless clients to reach appropriate local resources, including printers
- WEP, WPA, and WPA2 encryption options for all network traffic between the client and the AP, as well as SSL encryption of all management traffic between the APs and the controllers
- Certificate-based as well as optional integrated directory (LDAP/Active Directory) authentication for wireless users
- Seamless roaming between APs in the same school and seamless and automatic connectivity when a device is moved from one school to another in the same district
- Sophisticated wireless policy management that will enable ENA to provide variable wireless bandwidth and access control to different users not only based on their authenticated username but also their device type (in order to provide support for individually-owned devices but also prioritize access for school or library-owned devices)
- Optional rogue AP detection and neutralization
- Quickly scalable design that will allow for wireless coverage growth as schools expand, desire coverage beyond the instruction areas or implement new computing initiatives
- Fault tolerant architecture that will automatically recover in the event that a local access point fails by appropriately increasing RF spectrum strength of the adjacent APs in order to provide seamless coverage
- Round-the-clock network monitoring and support
- Historical trend reporting and quality of experience monitoring, including network and performance data, user session histories, and roaming patterns

2. ENA NetShield Firewall

As an optional service, ENA offers a comprehensive, centrally-hosted and managed firewall service including all hardware, software and support that is delivered using redundant, industry-leading firewall appliances. These devices are hosted within ENA's core network POPs and can be deployed at the local site or regional router level. In order to qualify as an E-Rate eligible Priority 1 service, the firewalls must be provided and owned by ENA. **Based on individual enhanced security requirements, we can work with each customer to develop specific implementation plans and maintenance schedules to meet your unique requirements.**

The state-of-the-art ENA NetShield solution provides rich inspection services, tracking the state of all authorized network communications and preventing unauthorized network access. Moreover, our service provides an additional layer of security via intelligent, "application-aware" security services that examine packet streams at Layers 4-7, using inspection engines specialized for many of today's popular applications. Furthermore, the ENA NetShield can provide all of these services well above Gigabit speeds, far surpassing many firewall products on the market.

The following graphic illustrates ENA NetShield's centrally hosted service:

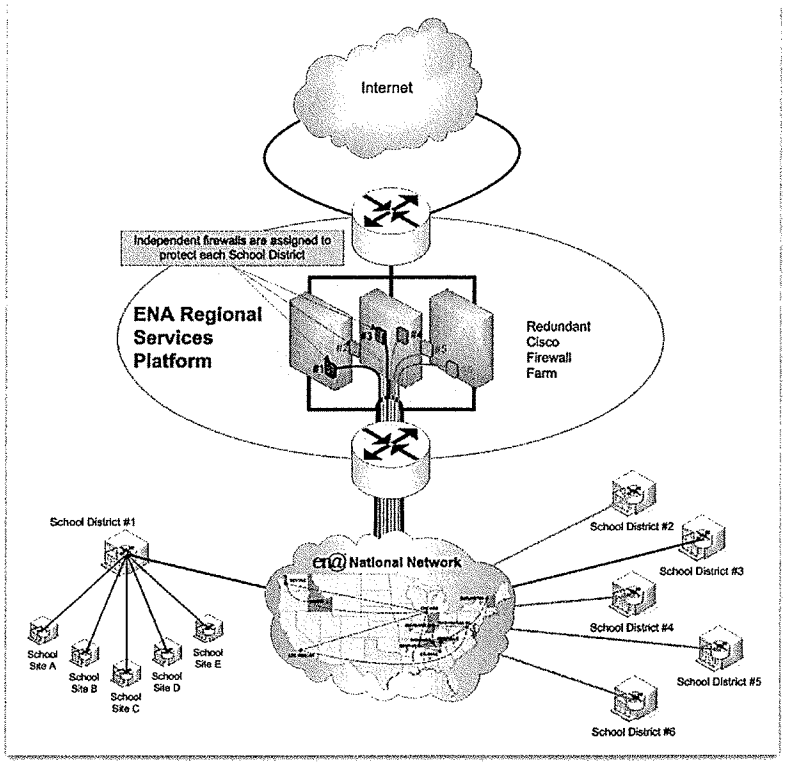

Figure 48: ENA NetShield's Centrally Hosted Service

ENA can also provide management and maintenance of customer-owned firewall appliances that can be configured to be hosted locally and perform many of the same tasks as our centrally hosted solution.

3. Gaggle E-mail Archiving

Through our partnership with Gaggle, ENA offers an e-mail archiving solution that provides comprehensive archiving, retention and search and discovery capabilities that will help customers comply with recent changes to the Federal Rules of Civil Procedure (FRCP).

Highlights of the offering include:

- Automatic archiving of every message sent and received by your e-mail users
- Advanced, secure online search and discovery
- Compatibility with the most widely used e-mail platforms
- Hassle-free setup and support
- A cost-effective, reliable solution offered at competitively priced per-user subscription rates

4. ENA Engineering Support

In addition to the on-site support and service provided at no cost by ENA's Account Service Managers, Customer Solution Engineers and Field Engineers, ENA offers packages of hourly engineering support services.

Typical engagements have included Active Directory implementation, LAN assessment and review and in-building wireless implementations. By leveraging our many years of experience and outstanding record of success in directing and managing large, complex technology implementation projects, we are able to reduce costs and implementation time for our customers.

5. ENA Quality of Service (QoS) and Traffic Management

Using ENA's MPLS-based backbone, we can implement dedicated bandwidth, packet prioritization and QoS measures, collectively referred to by ENA as traffic management, across the network at your direction.

Such dedicated traffic management configurations will permit the ability to dedicate slivers of bandwidth to specific applications and/or packet types to ensure priority routing and minimize latency. These configurations and traffic management implementations maximize the availability of online testing and data collection as well as to minimize any network-attributed latency to applications such as videoconferencing, online courses, student information systems and Voice over IP.

6. Consortium Partner Program Products

ENA develops partnerships with solution providers who we believe offer best-of-breed solutions at exceptional value to our customers. Individual customers are able to take advantage of lower, volume-based negotiated prices on outstanding instructional, productivity and safety products than they would otherwise be able to qualify for individually. **The product portfolio is enhanced each year, but currently includes the following*:**

- Big Universe Online Reading and Writing Community
- BrainPOP Animated Curriculum Content
- CILC Professional Development and Interactive Video Content
- ClassLink LaunchPad Device-agnostic Cloud-based Virtual Desktop
- DefinedSTEM Project-based Learning STEM Curriculum
- Education2020 Virtual Curriculum and Instruction
- Gaggle Student E-Mail and Collaboration Tools
- Grade Results Online Courses and Credit Recovery
- Learn360 Streaming Video
- netTrekker Educational Search Engine
- School Dude Online Management Tools
- Think Through Math Online Math Intervention with Live Teachers

Please see **Exhibit 15** for detailed information on ENA's Consortium Partner Program.

*Not all products are available in all geographies ENA serves. Please check with your Account Service Manager for availability.

Gaggle Student E-Mail

Gaggle.net provides a safe, web-based communication system for students where the teacher is always in control. Gaggle offers a suite of safe online learning tools including Zoho docs (text documents, spreadsheets and presentation software that students can access anywhere), GaggleTube (filtered YouTube), student-to-teacher SMS texting, integrated calendars, a filtered blogging tool, homework drop boxes, digital lockers, message boards, filtered instant messaging and 7 GB of storage for each account. In addition, Gaggle now offers their Human Monitoring Service as part of your subscription.

ClassLink LaunchPad

ClassLink LaunchPad is a personalized cloud-based desktop that gives teachers and students access to all of their applications and files from anywhere, anytime and from any device. Because the program is cloud-based, it is accessible from any Web browser without having to install additional software, making it ideal for BYO and 1:1 initiatives.

Notice to: **Bob Collie, Chief Technology Officer**
Education Networks of America

From: Melanie R. Miller, Ph.D., Director of Schools

Re: RFP 13-1 Managed Internet Access, Voice-Over-IP and Video Conferencing

Date: March 1, 2013

I am pleased to notify you that Education Networks of America is hereby awarded the contract for RFP 13-1 Managed Internet Access, Voice-Over-IP and Video Conferencing.

Melanie Miller

A - 30569

CONTRACT NO. 2-225071-00A3

AMENDMENT NUMBER 3 TO

METROPOLITAN BOARD OF PUBLIC EDUCATION CONTRACT

WITH

ENA SERVICES, LLC

FOR

PURCHASE OF Goods and Services

This amendment is entered into by and between the **METROPOLITAN GOVERNMENT OF NASHVILLE AND DAVIDSON COUNTY BY AND THROUGH THE METROPOLITAN BOARD OF PUBLIC EDUCATION**, hereinafter "MBPE," and ENA Services, LLC, 1101 McGavock Street, 3rd Floor, Nashville, Tn 37203 hereinafter "Contractor."

WITNESSETH

WHEREAS, the parties desire to modify the terms and conditions and to add or delete certain other terms and conditions to their original agreement filed with the Metro Clerk's Office March 10, 2011, MBPE Contract No. 2-225071-00 and its 2 amendments, hereinafter the "Contract," the parties hereby agree as set forth below.

1. Section 4 "compensation" is modified to as follows:

    - Effective November 11, 2013 pricing is updated as outlined in Attachment A

2. Subject to the modifications set forth in this amendment, the above-referenced Contract between the parties is hereby ratified and confirmed

3. This amendment shall not be binding upon the parties until it has been signed first by the authorized representatives of Contractor, by the authorized representatives of the Metropolitan Government, and filed in the office of the Metropolitan Clerk.

Attachment A to MNPS contract# 2-225071-00A3

The following pricing items are in addition to or update current pricing. All pricing elements not specifically updated in this Amendment continue to be effective. Pricing notes and explanations are additive to current pricing footnotes.

Category I

District with 10 sites
Managed Internet Access - Priority I Service

Number of Sites	Bandwidth	Cost 3rd Year	Cost 4th Year	Cost 5th Year
6	100 MB	$108,360.00	$108,360.00	$108,360.00

Category III

District with 80 sites
Managed Internet Access - Priority I Service

Number of Sites	Bandwidth	Cost 3rd Year	Cost 4th Year	Cost 5th Year
10	10 MB	$60,600.00	$60,600.00	$48,600.00
60	100 MB	$723,600.00	$687,600.00	$651,600.00
3	Gig	$73,260.00	$73,260.00	$73,260.00
2	2 Gig	$96,120.00	$96,120.00	$96,120.00

Category V

District with 150 sites
Managed Internet Access - Priority I Service

Number of Sites	Bandwidth	Cost 3rd Year	Cost 4th Year	Cost 5th Year
5	10 MB	$30,300.00	$30,300.00	$30,300.00
120	100 MB	$1,447,200.00	$1,375,200.00	$1,303,200.00
10	Gig	$244,200.00	$244,200.00	$244,200.00
3	2 Gig	$144,180.00	$144,180.00	$144,180.00

Category IX

Managed VOIP (per site)

Number of End User Devices	Type of Features	Cost 3rd Year	Cost 4th Year	Cost 5th Year
10 Admin	ENA SmartVoice Prime	$1,500.00	$1,500.00	$1,500.00
50 Classroom	ENA SmartVoice Prime	$7,500.00	$7,500.00	$7,500.00
Telephony Lines (based on a 60 device site)	Number of lines/ talk paths Per site	Cost 1st Year	Cost 2nd Year	Cost 3rd Year
PBX Based service lines	6	$1,440.00	$1,440.00	$1,440.00
SIP Trunk (60 devices)	3	$720.00	$720.00	$720.00

Analog and PRI lines based on expectation of purchasing at least 10 sites at the volumes listed.

PBX Based service lines are priced based on a per channel basis with expectation of IP enabled PBX and purchasing at least 100 channels.

SIP Trunk pricing based on per channel pricing and purchase of at least 100 channels.

Managed VOIP services not available in all areas.

Category X

Managed Video Conferencing (per site cost)

Options	Number of Sites Participating	Cost 3rd Year	Cost 4th Year	Cost 5th Year
Option 1	3	$240.00	$240.00	$240.00
Option 2	10	$240.00	$240.00	$240.00
Option 3	40	$240.00	$240.00	$240.00
Option 4	150	$240.00	$240.00	$240.00

Different configurations of video conferencing services are available - see **Supplemental Services Listing** details.

End user software download required and priced separately.

Category XI

Firewall

Number of End Sites	Number of Sites Participating	Cost 3rd Year	Cost 4th Year	Cost 5th Year
District Hosted Firewall	10	$0.00	$0.00	$0.00
District Hosted Firewall	80	$0.00	$0.00	$0.00
District Hosted Firewall	150	$0.00	$0.00	$0.00
Hosted Firewall Service – per additional rule set		$1,200.00	$1,200.00	$1,200.00

Basic Firewall with standard rule set protecting the ENA network and districts is included with managed Internet Access.

District customization and control options are available - see **Supplemental Services Listing** section.

LEA Hosted Firewall Integration service is for base level service - different configurations are available

Pricing Notes

Pricing for Category I is based on average pricing for services to school systems with less than 80 schools. Individual site prices may vary and certain services may not be available in all areas.

Pricing for Category III is based on average pricing for services to school systems with 80 to 149 schools. Individual site prices may vary and certain services may not be available in all areas.

Pricing for Category V is based on average pricing for services to school systems with 150 or more schools. Individual site prices may vary and certain services may not be available in all areas.

10 Mb service is offered via Managed Fiber or Wireless and may not be available for all sites.

Higher Broadband Service - 10mb and higher - requires end site to be ready to receive fiber. Certain make ready costs such as conduit, electrical power, ground and backer board may be required. ENA will work with customer to minimize these costs.

Additional Managed Internet Access service levels are available to allow scalability up to 10 gb and beyond. Maximum pricing for those service levels will be derived based on the price points and service levels listed above.

Governmental fees (to the extent the customer is not exempt from such fees) including state, local and federal taxes, fees, USF, E911 taxes/fees and similar are in addition to the above rates. These fees will be charged at the applicable rates set by governmental entities and are subject to change over the life of the service contract. Currently, such fees only apply VOIP services.

Aggregated Egress represents fixed service level. Burstable service is also available - see **Supplemental Services Listing** section.

Managed VOIP (per site)

Cost per End User Devices	Make & Model	Cost
1 Admin	Polycom IP331	$0.00
10 Admin	Polycom IP331	$0.00
100 Admin	Polycom IP331	$0.00
500 Admin	Polycom IP331	$0.00
1 Classroom	Polycom IP321	$0.00
25 Classroom	Polycom IP321	$0.00
100 Classroom	Polycom IP321	$0.00
500 Classroom	Polycom IP321	$0.00

Based on recent FCC action, ENA is offering a bundled handset with each applicable purchase of VOIP service for a thirty-six month time frame (consistent with this RFP term) at no additional cost

Standard pricing for phones is listed in our **Supplemental Services Listing** section in the event that a customer wishes a month to month solution or an upgraded phone solution.

Other bundles of handset and voice packages are available as well as options to upgrade from a free bundled handset to a different handset model. See **Supplemental Services Listing** section.

In the event that the FCC, SLD or E-Rate program determine bundled handset options are not eligible for E-Rate, standard handset prices will apply as listed in the **Supplemental Services Listing** section.

Make and model represent available handsets at the time of this proposal. ENA reserves the right, with approval from the customer, to substitute equivalent make and model phones over the life of the contract.

Price includes applicable manufacturer warranty. Extended warranty service is available.

Installation is typically performed by ENA's customers. ENA installation services are available for an additional charge.

Models listed above assume the availability of Power Over Ethernet (POE). If POE is not available, a separate charge for a power adapter will apply.

○ Supplemental Services Listing – updates and additions

1. ENA Connectivity Services Pricing

ENA Connectivity Services

Service	Monthly Fee Per Site (Unless otherwise indicated)	Note
Fully Managed WAN Service – 10 Gbps	$12,000	1
Site Moves	Actual Telco Cost + ENA Consulting Hours	
ENA Managed Wi-Fi Services (Only Available with ENA Managed Internet Access and Wi-Fi-Capable Devices)	$50.00 per individual user, per year	5, 7
Customized ENA WebSafe Content Filtering		
ENA WebSafe Pro	$2.00 per individual user, per year	5, 7, 8
ENA NetShield Basic Firewall Protection (Only Available with ENA		

Managed Internet Access)		
5 Sites or Less	$500.00	
6 to 20 Sites	$750.00	6
21 to 50 Sites	$1,000.00	
51 Sites or More	$2,000.00	
QoS and Traffic Management Services	$25.00 per configuration, per device	
Aggregated Internet Egress		
500 Mbps	$11,005.00	2
1 Gbps	$12,005.00	
Per 1 Mbps above 1 Gbps	$10.00	

Training Services		4
Half-day	$600.00	
Full-day	$1,000.00	

Notes:

1. WAN pricing is subject to evaluation of specific site and pricing is subject to availability.
2. Higher broadband service pricing is subject to evaluation of specific site and pricing is subject to availability.
3. For support services/consulting beyond ENA's managed WAN service. Project-based pricing and bulk purchase discounts are available.
4. Additional travel and expense charges may apply.
5. Not available in all markets.
6. Firewall pricing based on school district sizes.
7. Minimum quantities may apply. Site survey required.
8. ENA WebSafe Pro has a minimum price of $200.00 per month or $2,400.00 per year.

Please note:

- Pricing for optional services is for basic configurations and services for the category and are subject to change and availability.
- Customization and advanced configurations are available.
- All pricing will be agreed upon between ENA and the customer before services are installed.
- Prices listed above are not to exceed prices – pricing may be lower based on specific location review and quote.
- Government taxes and fees may apply as applicable and may change over the term of the contact.

2. ENA Voice Services Pricing

ENA's voice service is designed to be flexible. The pricing list shown below includes all our voice options. Many of these options can be combined to create a customized service bundle that meets your specific needs.

ENA SmartVoice

All ENA SmartVoice services include the following: Online User Interfaces, Administrator's Portal, and Local Number Portability (LNP) at no extra charge.

Service	Description	One-time Fee	Monthly Fee
Interconnected VoIP Extension Types			
ENA SmartVoice Prime			$12.50
ENA SmartVoice Plus			$30.00
ENA SmartVoice Pro			$45.00
ENA SmartVoice Loud Ringer			$32.00
ENA SmartVoice Auto Attendant			$40.00
Extension for Integration with Existing Intercom/Paging/Door Locks			$30.00
ENA SmartFax [1]			$25.00

E-rate Application Information Request

Date: 5/21/2015

Larry Stein/ Diana Howard
Sweetwater City School District
Phone: 423-337-7051
Fax: 423-337-6773
E-mail: larry.stein@scstn.net; Diana.howard@scstn.net

Response Due Date: 5/28/2015

Dear Applicant,

We have completed our review of FY2013 FCC Form 471 917099 FRN 2500725 and FCC Form 471 919406 FRNs 2508370 & 2508549. Based on the documentation you provided, you failed to demonstrate that a valid contract exists between Sweetwater City School District Consortium and ENA Services, LLC (ENA). In response, you provided a contract between Metropolitan Nashville Public Schools (MNPS) and ENA (Contract Number 2-225071-00). That contract was signed an executed March 7, 2011. In your response, you also stated "the cost proposals [from AT&T and ENA] to the Sweetwater bid were lower than the cost proposed in the previous consortium procurement with MNPS." You selected MNPS pricing instead of executing a contract with ENA based on the lower pricing offered to Sweetwater. Thus, there was not a contract between Sweetwater City School District Consortium and ENA to provide to USAC demonstrating you selected the most cost effective solution. In addition, the FCC Form 470 issued by Sweetwater City School District Consortium, FCC Form 470# 283390001111946, was issued 1/29/13 and has an Allowable Contract Date (ACD) of 2/26/13. There is no provision in the Metropolitan Nashville Public Schools contract with ENA, or in the underlying RFP and ENA bid proposal, that allows for the Sweetwater City School District Consortium to piggy-back onto that contract. This contract was established prior to the ACD of the Form 470 issued by the Sweetwater City School District Consortium. You have not established that a valid contract exists between Sweetwater City School District Consortium and ENA and all FRNs are denied. Consequently, FY2014 FCC Form 471 945733 FRN 2574934, FY2014 FCC Form 471 947375 FRN 2579179 and FY2015 FCC Form 471 1012581 FRNs 2752206 and 2755911 are denied.

Sweetwater Consortium did not choose the most cost-effective bid offering. ENA Services, Inc. (ENA) and AT&T submitted bids to provide E-rate services. Sweetwater selected ENA to provide its E-rate services. ENA's bid proposal was $9,336,396, $ 3 million more than AT&T's $6,053,804.04 bid. USAC evaluated Sweetwater's competitive bidding process and the services requested and determined that the applicant did not select the most-cost effective offering. Sweetwater awarded maximum points or near maximum points to ENA in all categories besides eligible cost. Sweetwater scored AT&T lower in the categories that are not eligible cost of goods and services. Sweetwater was also afforded an opportunity to explain if special circumstances existed that influenced its selection decision. Sweetwater

stated AT&T's bid had "defects" and provided "incomplete and/or inadequate responses" which "had the cumulative effect of offsetting the value of a lower sticker price." Sweetwater also stated they had a "lack of confidence in ATT's ability to deliver the services requested by the RFP" and indicated "the bid team clearly determined that ATT's bid was deficient and therefore, scored the RFP consistent with that determination." Sweetwater acknowledged that the price differential is "significant." Lastly, Sweetwater indicated that ENA's service offering was unique and was not comparable to AT&T services. A thorough review of the bids provided by ENA and AT&T shows that the bids are similar in the services offered. The Managed Internet Access service, Managed VoIP, and Managed Video Conferencing services offered by both of the services providers in their bids contain similar Network infrastructure, similar Network Support, similar On Premise Network Equipment, similar Monitoring Service, both have similar experience and operate in Tennessee, both have extensive experience with the e-rate program, and both service providers provided references from past customers who were satisfied with the service providers. The circumstances presented by Sweetwater do not justify the selection of a bid over $3 million more than a competing bid and it has been determined that Sweetwater failed to adhere to the requirements that applicant's select the most cost-effective bid offering; therefore, FY2013 FCC Form 471 917099 FRN 2500725 and FCC Form 471 919406 FRNs 2508370 & 2508549 are denied. Consequently, FY2014 FCC Form 471 945733 FRN 2574934, FY2014 FCC Form 471 947375 FRN 2579179 and FY2015 FCC Form 471 1012581 FRNs 2752206 and 2755911 are denied.

We are providing you with an opportunity to submit further documentation and/or any special circumstances that we should consider during the review.

Lastly, please complete, sign, and date the attached certification and return with your response.

Response Reminders
Please fax or email the requested information to my attention. If you have any questions or you do not understand what we are requesting, please feel free to contact me.

It is important that we receive all of the information requested **within 7 calendar days** so we can complete our review. **Failure to respond may result in a reduction, denial, or rescinding of funding. If you need additional time to prepare your response, please let me know as soon as possible.**

Thank you for your cooperation and continued support of the Universal Service Program.

Notification of Commitment Adjustment Letter

Funding Year 2013: July 1, 2013 - June 30, 2014

October 30, 2015

Matt Marcus
DAYTON CITY SCHOOL DISTRICT
520 CHERRY ST
DAYTON, TN 37321 1482

Re: Form 471 Application Number:	918525
Funding Year:	2013
Applicant's Form Identifier:	Year 2013 Dayton City
Billed Entity Number:	128277
FCC Registration Number:	0011930955
SPIN:	143030857
Service Provider Name:	ENA Services, LLC
Service Provider Contact Person:	Rex Miller

Our routine review of Schools and Libraries Program (Program) funding commitments has revealed certain applications where funds were committed in violation of Program rules.

In order to be sure that no funds are used in violation of Program rules, the Universal Service Administrative Company (USAC) must now adjust your overall funding commitment. The purpose of this letter is to make the required adjustments to your funding commitment, and to give you an opportunity to appeal this decision. USAC has determined the applicant is responsible for all or some of the violations. Therefore, the applicant is responsible to repay all or some of the funds disbursed in error (if any).

This is NOT a bill. If recovery of disbursed funds is required, the next step in the recovery process is for USAC to issue you a Demand Payment Letter. The balance of the debt will be due within 30 days of that letter. Failure to pay the debt within 30 days from the date of the Demand Payment Letter could result in interest, late payment fees, administrative charges and implementation of the "Red Light Rule." The FCC's Red Light Rule requires USAC to dismiss pending FCC Form 471 applications if the entity responsible for paying the outstanding debt has not paid the debt, or otherwise made satisfactory arrangements to pay the debt within 30 days of the notice provided by USAC. For more information on the Red Light Rule, please see "Red Light Frequently Asked Questions (FAQs)" posted on the FCC website at http://www.fcc.gov/debt_collection/faq.html.

TO APPEAL THIS DECISION:

If you wish to appeal the Commitment Adjustment Decision indicated in this letter to USAC, your appeal must be received or postmarked within 60 days of the date of this letter. Failure to meet this requirement will result in automatic dismissal of your appeal. In your letter of appeal:

1. Include the name, address, telephone number, fax number, and email address (if available) for the person who can most readily discuss this appeal with us.

2. State outright that your letter is an appeal. Identify the date of the Notification of Commitment Adjustment Letter and the Funding Request Number(s) (FRNs) you are appealing. Your letter of appeal must include the
- Billed Entity Name,
- Form 471 Application Number,
- Billed Entity Number, and
- FCC Registration Number (FCC RN) from the top of your letter.

3. When explaining your appeal, copy the language or text from the Notification of Commitment Adjustment Letter that is the subject of your appeal to allow USAC to more readily understand your appeal and respond appropriately. Please keep your letter to the point, and provide documentation to support your appeal. Be sure to keep a copy of your entire appeal including any correspondence and documentation.

4. If you are an applicant, please provide a copy of your appeal to the service provider(s) affected by USAC's decision. If you are a service provider, please provide a copy of your appeal to the applicant(s) affected by USAC's decision.

5. Provide an authorized signature on your letter of appeal.

We strongly recommend that you use one of the electronic filing options. To submit your appeal to USAC by email, email your appeal to appeals@sl.universalservice.org or submit your appeal electronically by using the "Submit a Question" feature on the USAC website. USAC will automatically reply to incoming emails to confirm receipt.

To submit your appeal to us by fax, fax your appeal to (973) 599-6542.

To submit your appeal to us on paper, send your appeal to:

Letter of Appeal
Schools and Libraries Division - Correspondence Unit
30 Lanidex Plaza West
PO Box 685
Parsippany, NJ 07054-0685

For more information on submitting an appeal to USAC, please see "Appeals" in the "Schools and Libraries" section of the USAC website.

FUNDING COMMITMENT ADJUSTMENT REPORT

On the pages following this letter, we have provided a Funding Commitment Adjustment Report (Report) for the Form 471 application cited above. The enclosed Report includes the Funding Request Number(s) from your application for which adjustments are necessary. See the "Guide to USAC Letter Reports" posted at http://usac.org/sl/tools/reference/guide-usac-letter-reports.aspx for more information on each of the fields in the Report. USAC is also sending this information to your service provider(s) for informational purposes. If USAC has determined the service provider is also responsible for any rule violation on the FRN(s), a separate letter will be sent to the service provider detailing the necessary service provider action.

Note that if the Funds Disbursed to Date amount is less than the Adjusted Funding Commitment amount, USAC will continue to process properly filed invoices up to the Adjusted Funding Commitment amount. Review the Funding Commitment Adjustment Explanation in the attached Report for an explanation of the reduction to the commitment(s). Please ensure that any invoices that you or your service provider(s) submits to USAC are consistent with Program rules as indicated in the Funding Commitment Adjustment Explanation. If the Funds Disbursed to Date amount exceeds your Adjusted Funding Commitment amount, USAC will have to recover some or all of the disbursed funds. The Report explains the exact amount (if any) the applicant is responsible for repaying.

ENA Services, LLC

Funding Commitment Adjustment Report for
Form 471 Application Number: 918525

Funding Request Number:	2506944
Services Ordered:	INTERNET ACCESS
SPIN:	143030857
Service Provider Name:	ENA Services, LLC
Contract Number:	2-225071-00
Billing Account Number:	Dayton City Schools
Site Identifier:	128277
Original Funding Commitment:	$36,000.00
Commitment Adjustment Amount:	$36,000.00
Adjusted Funding Commitment:	$0.00
Funds Disbursed to Date	$23,116.80
Funds to be Recovered from Applicant:	$23,116.80

Funding Commitment Adjustment Explanation:

We have completed our review of the competitive bid process conducted by the Sweetwater City School District Consortium that utilized Funding Year (FY) 2013 FCC Form 470# 283390001111946. Dayton City School District is listed as a member of the Sweetwater City School District Consortium and also relied upon FCC Form 470# 283390001111946 in awarding services to ENA Services, LLC (ENA) in FY2013, FY2014 and FY2015. Based on our review, we have determined that no valid contract exists between Sweetwater City School District Consortium and ENA. When asked to produce a copy of the related contract, Sweetwater provided a contract between Metropolitan Nashville Public Schools (MNPS) and ENA (Contract Number 2-225071-00) that was signed and executed on March 7, 2011. During this review, Sweetwater also stated "the cost proposals [from AT&T and ENA] to the Sweetwater bid were lower than the cost proposed in the previous consortium procurement with MNPS." Sweetwater ultimately selected MNPS pricing instead of executing a contract with ENA based on the lower pricing offered to Sweetwater. Thus, there was no contract between Sweetwater City School District Consortium and ENA to provide to USAC demonstrating that Sweetwater selected the most cost effective solution. The FCC Form 470 issued by Sweetwater City School District Consortium, FCC Form 470# 283390001111946, was issued on 1/29/13 and had an Allowable Contract Date (ACD) of 2/26/13. Sweetwater City School District Consortium also issued Request for Proposal (RFP) # 13-1 in conjunction with the posting of the FCC Form 470. Thus, the bidding process conducted by Sweetwater City School District Consortium is independent of the bidding process established between Metropolitan Nashville Public Schools and ENA. Moreover, there is no provision in the Metropolitan Nashville Public Schools contract with ENA, or in the underlying RFP and ENA bid proposal, that allows for the Sweetwater City School District Consortium to piggy-back onto that contract. This contract was established prior to the ACD of the Form 470 issued by the Sweetwater City School District Consortium. Therefore, Sweetwater City School District Consortium failed to establish that a valid contract exists between Sweetwater City School District Consortium and ENA and all FRNs that utilized this FCC Form 470# 283390001111946 are denied. Consequently, FY2013 FCC Form 918525 FRN 2506944 and any future funding requests that reference FCC Form 470# 283390001111946 are denied and any commitments will be rescinded in full and USAC will seek recovery of any improperly disbursed funds from the applicant.

Based on the documentation provided and reviewed, we determined that Sweetwater Consortium did not choose the most cost-effective bid offering. ENA Services, Inc. (ENA) and AT&T submitted bids to provide E-rate services. Sweetwater selected ENA to provide its E-rate services. ENAs bid proposal was $9,336,396, $3 million more than AT&Ts $6,053,804.04 bid. USAC evaluated Sweetwaters competitive bidding process and the services requested and determined that the applicant did not select the most-cost effective offering. Sweetwater awarded maximum points or near maximum points to ENA in all categories besides eligible cost. Sweetwater scored

AT&T lower in the categories that are not eligible cost of goods and services. Sweetwater was also afforded an opportunity to explain if special circumstances existed that influenced its selection decision. Sweetwater stated AT&Ts bid had "defects" and provided "incomplete and/or inadequate responses" which "had the cumulative effect of offsetting the value of a lower sticker price." Sweetwater also stated they had a "lack of confidence in ATTs ability to deliver the services requested by the RFP" and indicated "the bid team clearly determined that ATTs bid was deficient and therefore, scored the RFP consistent with that determination." Sweetwater acknowledged that the price differential is "significant." Lastly, Sweetwater indicated that ENAs service offering was unique and was not comparable to AT&T services. A thorough review of the bids provided by ENA and AT&T shows that the bids are similar in the services offered. The Managed Internet Access service, Managed VoIP, and Managed Video Conferencing services offered by both of the services providers in their bids contain similar Network infrastructure, similar Network Support, similar On Premise Network Equipment, similar Monitoring Service, both have similar experience and operate in Tennessee, both have extensive experience with the e-rate program, and both service providers provided references from past customers who were satisfied with the service providers. The circumstances presented by Sweetwater do not justify the selection of a bid over $3 million more than a competing bid and it has been determined that Sweetwater failed to adhere to the requirements that applicants select the most cost-effective bid offering; therefore, all FRNs that relied upon FCC Form 470# 283390001111946 and its competitive bid process in the award of services to ENA are subsequently denied. Consequently, FY2013 FCC Form 918525 FRN 2506944 and any future funding requests that reference FCC Form 470# 283390001111946 are denied and any commitments will be rescinded in full and USAC will seek recovery of any improperly disbursed funds from the applicant.

Re:	Applicant Name:	ACHIEVEMENT SCHOOL DISTRICT
	Billed Entity Number:	16071130
	Form 471 Application Number:	1022325
	Funding Request Number(s):	2828216, 2828239, 2828620
	Your Correspondence Dated:	December 04, 2015

After review of the information and documentation provided, the Schools and Libraries Division (SLD) of the Universal Service Administrative Company (USAC) has made its decision in regard to your appeal of USAC's funding commitment decision for the FCC Form 471 Application Number and funding requests number(s) (FRN(s)) referenced above. This letter provides an explanation for USAC's decision. The date of this letter also begins the sixty (60) day time period for appealing this decision. If your Letter of Appeal included more than one FCC Form 471 Application Number, please note that you will receive a separate decision for each funding application.

Funding Request Number(s): 2828216, 2828239, 2828620
Decision on Appeal: **Denied**
Explanation:

- The FRNs were denied because the applicant failed to demonstrate that a valid contract exists between Sweetwater City School District Consortium (SCSDC) and ENA Services, LLC (ENA). In addition, SCSDC appeal did not justify the selection of ENA's bid proposal of $9,336,396, which is over $3 million more than AT&T's $6,053,804.04 bid, as the most cost-effective solution.

  SCSDC argues there was a valid contract under Tennessee law and that there was offer and acceptance. SCSDC explains that the memorialization of the contract was through the MNPS contract that was offered as an alternative in ENA's bid proposal to SCSDC. SCSDC also asserts that the FCC lessened the written contract requirement in the E-rate Modernization Order and that there was a

legally binding agreement based on ENA's performance via the MNPS contract. SCSDC asserts there was an offer and an acceptance and a valid contract existed under Tennessee law.

USAC does not have evidence of valid acceptance. SCSDC refers to a March 4, 2013 award letter in its appeal, but a copy of this award letter was not provided.

The FCC lessened the written contract requirement in the E-rate Modernization Order codifying the legally binding standard effective November 2014. At the time SCSDC entered into a contract with ENA, the legally binding standard was not effective and is not applicable to SCSDC contract. SCSDC was required to demonstrate that a contract was in place with ENA at the time its FCC Form 471 certification. As noted above, SCSDC has not provided evidence that it accepted ENA's proposal at the time the FCC Form 471 was submitted.

Although there are provisions in the Tennessee code that would allow SCSDC to use certain contracts that are executed by other local governmental units or LEAs, the provisions cited by SCSDC did not become effective until July 1, 2013 and were to apply to contracts that were executed on or after that date. In addition, the former Tennessee statutes for allowing local governmental units and LEAs to purchase off of existing contracts would not apply to the 2011 Metro-Nashville contract for two reasons. Section 12-3-1004(b)(1)-(2), allowed LEAs to purchase "equipment" based on another LEA's existing contract. ENA's contract with Metro-Nashville was not limited to "equipment." Further, section 12-3-1004(c)(1)-(2) allowed local governmental units to purchase "same goods and equipment" where the unit price did not exceed ten thousand dollars. The 2011 Metro-Nashville contract would not fall within this provision because it was for services and not limited to "goods and equipment" and the unit price was greater than $10,000.

SCSDC argues that the prices offered by the service provider, ENA, were below the prevailing market rates. SCSDC also asserts that the AT&T's bid to the SCSDC was actually higher than ENA's bid by $1.8 million. SCSDC states that the figures in AT&T's bid response did not include all charges for the requested services. For example, AT&T did not include installation charges in its bid pricing because it had not yet engineered, much less installed, the circuits required to render the services required by the RFP. SCSDC further proffers that the quality of service proposed by ENA was higher than that offered by AT&T as determined through analysis of the bid responses and prior experience of the consortium members with both bidders.

AT&T's bid was not higher than ENA's bid. SCSDC assumes that AT&T's bid price included the pricing from a NetTN contract referenced in AT&T's bid. Also, the evaluation forms clearly account for the costs that SCSDC claims AT&T excluded from their bid price. Further, SCSDC did not provide any documentation to support the allegation that AT&T's hypothetical "actual" bid price would be $11.1 million and therefore $1.8 million higher than ENA's bid.

The claim that ENA's bid was lower than AT&T's prices elsewhere under a state contract does not change the fact that the price of the ENA bid was $3 million more than the price of AT&T's bid. Comparing ENA's SCSDC bid to an entirely unrelated AT&T bid is not a fair comparison.

SCSDC did not provide any supporting documentation to support this assertion. Instead, SCSDC cites to a portion of the AT&T bid that describes AT&T's projected timeline for installation after the contract has been awarded. While SCSDC argues that this language excludes installation costs, this section does not mention costs associated with installation and is in direct response to SCSDC's question, "What delivery concerns do you have in performing this contract?" AT&T's response to the question, and the title of this particular section, is "AT&T has no delivery concerns in support of this contract." SCSDC has misconstrued the meaning of this portion of AT&T's bid language in its appeal.

SCSDC's arguments and assertions also fail to identify how AT&T's service offerings are of a lower quality than ENA's service offerings. SCSDC mischaracterizes the AT&T bid by stating, among other assertions, that it failed to commit to a July 1 start date, failed to identify personnel, and failed to give assurances of timely performance. AT&T's bid does not support SCSDC's characterization of AT&T's shortcomings.

SCSDC has not addressed the issue of why it selected to use the MNPS contract with ENA that included higher pricing than ENA's bid proposal to SCSDC. ENA did not reduce the pricing of the MNPS contract until December 2013, nearly a year after SCSDC submitted it FCC Form 471 application to USAC. Therefore, even relying on the ENA pricing, SCSDC did not select the most cost-effective service offering when it decided to piggyback off the MNPS contract.

SCSDC argues the consortium conducted a fair and open competitive bidding process that evaluated the bidders on price and other factors, as allowed by Commission rules. Additionally, SCSDC asserts the consortium met the Commission's competitive bidding requirements, including using price as a primary factor.

Although SCSDC asserts that it complied with the FCC's competitive bidding rules, SCSDC did not demonstrate that it selected the most cost-effective bid. SCSDC did not provide any supporting documentation to justify the selection of ENA's bid, which was $3 million more than the AT&T bid, as the most cost-effective solution. In addition, SCSDC has not explained how its decision to piggyback off the MNPS contract which had higher pricing than ENA's bid proposal to SCSDC was the most cost-effective service offering. Although ENA eventually lowered its pricing in the MNPS contract to match the pricing in the SCSDC bid proposal, this amendment was nearly a year after SCSDC submitted its FCC form 471 application.

With respect to SCSDC's arguments that the consortium will suffer significant harm if USAC does not reverse its decisions and that the denials would set a

precedent requiring schools and libraries to purchase the cheapest services, regardless of quality and other factors, USAC cannot make policy decisions.

If you wish to appeal this decision, you may file an appeal pursuant to 47 C.F.R. Part 54, Subpart I. Detailed instructions for filing appeals are available at: http://www.usac.org/sl/about/program-integrity/appeals.aspx.

We thank you for your continued support, patience and cooperation during the appeal process.

CONTRACT
BETWEEN THE STATE OF TENNESSEE,
DEPARTMENT OF FINANCE AND ADMINISTRATION
AND
AT&T CORPORATION

This Contract, by and between the State of Tennessee, Department of Finance and Administration, hereinafter referred to as the "State" and AT&T Corporation, hereinafter referred to as the "Contractor," is for the provision of NetTN services, as further defined in the "SCOPE OF SERVICES."

The Contractor is A FOR-PROFIT CORPORATION.

Contractor Vendor Identification Number: 13-4924710
Contractor Address: 333 Commerce, Suite 2101, Nashville, TN 37201
Contractor Place of Incorporation or Organization: Delaware

A. SCOPE OF SERVICES:

A.1. The Contractor shall provide all service and deliverables as required, described, and detailed by this Scope of Services and shall meet all service and delivery timelines specified in the Scope of Services section or elsewhere in this Contract.

Contract Section A outlines the scope of services and deliverables the State shall require the Contractor to provide. It also describes the level of revenue sharing required by the State. The scope of service for Network Tennessee (NetTN) shall be demanding in nature, and the Contractor must meet the requirements detailed in this Contract as well as all requirements imposed by Additional Documents listed in Contract Section E.7.

A.2. Network Concept and Connectivity

A.2.a. The Contractor is responsible for the design, construction, implementation and management of a flexible and scalable, high-speed, statewide Optical Transport Network (OTN) infrastructure. During the implementation and migration of existing sites, the NetTN network will run in parallel and directly communicate to the existing networks, which are known as the TNII Network.

A.2.b. The Contractor will be responsible for the placement of at least three Network Access Points (NAPs), one each, in Nashville, Knoxville, and Memphis. For redundancy purposes, the NAPs are required and must mesh together with redundant links.

A.2.c. The NetTN Contractor is required to provide Ingress/Egress to two different Internet Service Providers in two different NAPs with automatic failover.

A.2.d. All Core Network locations (NAPs or Points of Presence [POPs]) shall have circuit diversity (different fiber sheath and fiber route) for active redundancy to other Core Network locations with the same bandwidth availability to ensure reliability of the Core Network.

A.2.e. The Contractor will design, deliver, install and manage all the necessary bandwidth, network hardware and software systems for the TNII Association partners: the State of Tennessee, Department of Finance and Administration, Office for Information Resources (OIR); Tennessee Board of Regents (TBR); University of Tennessee (UT); State of Tennessee Department of Education (SDE); and local government individual End Sites for NetTN services. It is the intent of this managed service to provide a technical infrastructure for TNII Association Partners and end users to access, utilize and leverage Internet and WAN based resources as effectively as possible and meet the technical specifications. The Contractor is responsible for a secure logical VRF (Virtual Route Forwarding) for each current and future TNII Association Partner.

LT/Sweetwater000649

vi. Wireless
- Wi-FI
- WiMAX

vii. Other applicable technologies

A.2.n. The Contractor shall be responsible for providing content filtering. For SDE, the Contractor shall be required to provide a solution that complies with the Children's Internet Protection Act (Pub. L. 106-554), Title XVII-Children's Internet Protection.

A.2.o. Upon transition of SDE to NetTN, the Contractor shall provide email services including management and administrative functions required for email support to NetTN SDE subscribed users. The Contractor will be responsible for the implementation and transition from the existing SDE Contractor to the NetTN network.

A.2.p. The Contractor shall be responsible for providing DNS services.

A.3. Universal Services Fund. Support for Universal Services Fund: The Universal Services Fund (USF) provides communities across the country with affordable telecommunication services. The Universal Services Administrative Company (USAC) manages the fund. The Schools and Libraries Universal Service Support Mechanism (E-Rate) provides discounts to assist most schools and libraries in the United States in obtaining affordable telecommunications and Internet access. Rural Health Care is a universal service support mechanism that provides reduced rates to rural Health Care Providers (HCPs) for telecommunications services related to the use of telemedicine & telehealth. The Contractor must provide a network that will allow the schools and libraries in Tennessee to qualify for Universal Services Administrative Company (USAC) Funds. The network must allow the Rural Health Care providers in Tennessee to qualify for Universal Services Administrative Company (USAC).

A.3.a. E-Rate Service Provider Compliance Requirements. The Contractor will comply with all service provider related requirements associated with the USAC's Schools & Libraries E-rate Program. (http://www.universalservice.org/sl/providers/). The following defines the mandatory requirements for the Contractor to be in compliance with the E-Rate rules and regulations as they pertain to successfully submitting a bundled K12 service offering. The K12 bundled Internet service offering must provide a solution that complies with these requirements as part of their overall service offering. Contractor's failure to meet these requirements will be cause for the State to immediately terminate the contract and pursue a cause of action for damages.

i. The NetTN Contractor must be an eligible telecommunications provider and comply with all service provider related requirements associated with the USAC's Schools & Libraries E-rate Program.

ii. The E-rate Program is built on the foundation of self-certification. The service provider who participates in the E-rate Program has a responsibility to educate themselves about the Program requirements and timelines. Certain service provider requirements are outlined in the Schools and Libraries Division (SLD) Guide to Service Provider Participation in the E-Rate, which is located on the SLD web site at www.universalservice.org/sl. The SLD web site contains other pertinent information relevant to service providers.

iii. The NetTN Contractor must be in compliance with the E-rate Program rules at all times. In the event that the SLD determines that the service provider has not acted in compliance with Program rules, it can result in denial of funding, reduction in funding, cancellation of funding (a commitment adjustment), audit or other investigation, for which the service provider will take full responsibility.

iv. The NetTN Contractor will be registered with USAC by filing FCC Form 498, Service Provider Information Form. In addition, each K-12 service provider must have on file with USAC FCC Form 473, Universal Service for Schools and Libraries Service Provider Annual Certification Form.

v. The NetTN Contractor must comply with and/or assist the State in the following E-Rate

99). Contractor warrants that it is familiar with requirements of FERPA and its accompanying regulations and that it will comply with all applicable FERPA requirements in the performance of its duties in this Contract. Contractor agrees to cooperate with the State as required by FERPA and its regulations in the performance of its duties in this Contract. Contractor agrees to maintain the confidentiality of all education records and student information and use such records and information for the exclusive purpose of performing its duties in this Contract.

E.16. Transition Services. As this Contract nears its end, the Contractor agrees to cooperate fully with the State and, or any vendor that receives an award for a subsequent contract for NetTN successor services, to transition the NetTN Services from the Contractor to the State and/or the subsequent vendor. At the State's discretion, the State shall start these transition services as early as 24 months prior to the end of the present Contract. The Contractor shall:

a. Provide continuing services that are the same as those currently provided, with no decrease in quality, as the State coordinates the transition from the present Contract.

b. Six months prior to the expiration of the present Contract, the Contractor in cooperation with the State shall establish the fair market value of the NetTN end-site equipment, excluding K-12 sites. At the end of the present Contract, the State shall have the option of purchasing end-site equipment at this fair market value, as determined by the average of three nationally reputable used equipment resellers mutually agreed to and selected by the State and the Contractor.

c. Fully cooperate with the State and any subsequent vendor in testing and parallel operation of any new network that supersedes the existing NetTN network.

E.17. Price Decreases

a. The Contractor shall extend to the State the benefit of any rates included in the Contractor's contracts with other clients with lower or equal revenue volumes to those of the State that are lower than the rates being paid by the State. The basis of comparison shall be the benchmark described in Contract Section E.17.d.ii.

b. The Contractor's failure to offer lower rates than other contracts with lower or equal revenue volumes, for functionally equivalent NetTN Services, shall be considered a violation of the terms of the contract. The Contractor shall issue credits to the State retroactively from the published or effective date of the reduced rates and appropriately adjust the rates for the remainder of the term of the contract.

c. The Contractor must agree to come into conformity with general price and cost decreases resulting from law, regulatory decisions, or industry competitive forces.

d. Competitive Price Assurance. In order to identify the lowest rates available, the State of Tennessee will have a benchmark analysis prepared annually by an independent telecommunications industry consultant. The benchmark study shall:

i. Be performed on an annual basis.
ii. The benchmark shall compare the State's rates against rates contractually provided to other States and enterprises, with attention given to functionally equivalent NetTN Services, annual commitments, and mix of services associated with such other contracts in the State of Tennessee and other states in the sourthern region. For purposes of this Contract, the "states in the southern region" are the following: Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Arkansas, Florida, and Tennessee.
iii. The benchmark shall emphasize those rates in effect at the time of the benchmark analysis.

43xxx	Centrex (see above)										New		
01xxx	**End Site WAN Circuit with Internet access.** Explanation: This section is used for ordering data circuits to the End Site locations. The cost per month includes the local loop, long haul circuits, all associated end site and network hardware, appropriate LAN Interface with minimum (2) 10/100 Mbps ports, Internet Access, NetTN security, network management and operation support, includes 7 a.m. - 6 p.m. local time coverage Monday - Saturday.												
01xxx	**Note 1** - Automatic Protection Switching Service - Automatic Protection Switching (APS) provides 1:1 fiber path protection between the customer premises and the serving Ethernet switch. This is access protection, as opposed to core network protection provided by Core Automatic Trunk Failure (CATF) AT&T installs a protection switch and optical splitter at both the customer premises and Ethernet equipped CO. A secondary fiber path, which can be diversely routed from the primary path, is provisioned between the customer location and the central office. Both fiber paths connect to the protection switch3es installed on each end of the fiber loop. The protection switch connects to a single port on the Metro Ethernet switch. The protection path is used only when a primary path failover occurs. When an outage occurs the protection switch will automatically switch the customer's traffic over t0 the secondary path. APS only provides fiber route diversity. APS does not provide port diversity, switch diversity, or optical protection. APS is provisioned between the customer's premises and the Ethernet equipped central office. APS is available to a customer with Metro Ethernet Service connection of 10Mbps or higher.							New

1-Sep-15

Commodity Code	Service Description	Unit	Initial Contract	Amendment 01	Amendment 02	Amendment 03	Amendment 04	Amendment 05	Amendment 06	Amendment 07	Amendment 08	Amendment 09	Amendment 10
01xxx	APS may be ordered as a structurally diverse transport path (Structural Protection) or a route diverse transport path (Route Protection) Structural Protection APS is defined as the APS secondary facility and the primary Metro Ethernet Connection facility being in separate sheaths that are in separate structures located along the same route. Route Protection APS is defined as the APS secondary facility being in a separate sheath and in an underground, aerial, or direct buried structure that runs along a separate physical path from the facility associated with the primary Metro Ethernet connection. Route protection provides physical route diversity from the Metro Ethernet-equipped central office to the customer's property line or servicing wire center.							New					
01xxx	Core Trunk Automatic Failover Feature - Core protection is configured using two (2) or more redundant and diverse trunks between two Metro Ethernet switch routers. The designed diversity between the two trunk paths will utilize separate IOF routes and separate Metro Ethernet switch ports (will also use separate interface cards where available). The automatic failover between trunks is supported by industry standard IEEE 802.3ad Link Aggregation Control Protocol (LACP). Link Aggregation allows the Metro Ethernet switch to combine several physical inter-switch trunks with diverse paths between two switches into a single logical trunk. If there is an outage with one of the physical trunks, the customer's traffic will continue over the unaffected trunk member. CATF provides core protection only; it does not provide access protection, defined as protection on the link between the serving Metro Ethernet switch and the customer premises.							New					
01xxx	**Note 2** - The State has discontinued DSL as an access method in contract Amendment 9, therefore there are no costs in the table above for contract years 7 through 10 **Note 3** - The State has discontinued Core Trunk Automatic Failover in contract Amendment 9, therefore there are no costs in the table above for contract years 7 through 10											New

022xx	**K12 WAN Circuit Managed point to point without Internet access - Premium Metro Ethernet** -**Note 1** - Email archiving Email archiving is only for NetTN email customers. Email archiving is a domain wide service. Email archiving is not available for specific mailboxes only (email archiving archives all mailboxes within the domain). Once email archiving is activated, all new mail incoming and outgoing is archived once a day at 1am Eastern or every 3000 inbound or outbound messages, whichever comes first. Existing email with NetTN prior to email archiving activation is not automatically archived. Archiving existing email can be accomplished by one of two methods: 1) If the mail already exists in our mailboxes the Transition Team can upload the information for the customer. 2) If the customer has the mail and it does not exist in NetTN email boxes, they will need to export their data to either PST, EML, MSG or MBOX files and compress them to either ZIP, RAR, BZ2 or GZ format. The Legacy Data import process usually takes between 2-5 weeks depending on the amount of data the customer has to be imported.

03xxx	**End Site WAN Circuit without Internet access.** Explanation: This section is used for ordering data circuits to the End Site locations. The cost per month includes the local loop, long haul circuits, all associated end site and network hardware, appropriate LAN Interface with minimum (2) 10/100 Mbps ports, NetTN security, network management and operation support, includes 7 a.m. - 6 p.m. local time coverage Monday - Saturday.												
03xxx	**Note 1** - Automatic Protection Switching Service - Automatic Protection Switching (APS) provides 1:1 fiber path protection between the customer premises and the serving Ethernet switch. This is access protection, as opposed to core network protection provided by Core Automatic Trunk Failure (CATF) AT&T installs a protection switch and optical splitter at both the customer premises and Ethernet equipped CO. A secondary fiber path, which can be diversely routed from the primary path, is provisioned between the customer location and the central office. Both fiber paths connect to the protection switch3es installed on each end of the fiber loop. The protection switch connects to a single port on the Metro Ethernet switch. The protection path is used only when a primary path failover occurs. When an outage occurs the protection switch will automatically switch the customer's traffic over to the secondary path. APS only provides fiber route diversity. APS does not provide port diversity, switch diversity, or optical protection. APS is provisioned between the customer's premises and the Ethernet equipped central office. APS is available to a customer with Metro Ethernet Service connection of 10Mbps or higher.							New					

LT/Sweetwater000662

NetTN Catalog of Services Commodity Codes

1-Sep-15

Commodity Code	Service Description	Unit	Initial Contract	Amendment 01	Amendment 02	Amendment 03	Amendment 04	Amendment 05	Amendment 06	Amendment 07	Amendment 08	Amendment 09	Amendment 10
03xxx	APS may be ordered as a structurally diverse transport path (Structural Protection) or a route diverse transport path (Route Protection) Structural Protection APS is defined as the APS secondary facility and the primary Metro Ethernet Connection facility being in separate sheaths that are in separate structures located along the same route. Route Protection APS is defined as the APS secondary facility being in a separate sheath and in an underground, aerial, or direct buried structure that runs along a separate physical path from the facility associated with the primary Metro Ethernet connection. Route protection provides physical route diversity from the Metro Ethernet-equipped central office to the customer's property line or servicing wire center.							New					
03xxx	Core Trunk Automatic Failover Feature - Core protection is configured using two (2) or more redundant and diverse trunks between two Metro Ethernet switch routers. The designed diversity between the two trunk paths will utilize separate IOF routes and separate Metro Ethernet switch ports (will also use separate interface cards where available). The automatic failover between trunks is supported by industry standard IEEE 802.3ad Link Aggregation Control Protocol (LACP). Link Aggregation allows the Metro Ethernet switch to combine several physical inter-switch trunks with diverse paths between two switches into a single logical trunk. If there is an outage with one of the physical trunks, the customer's traffic will continue over the unaffected trunk member. CATF provides core protection only; it does not provide access protection, defined as protection on the link between the serving Metro Ethernet switch and the customer premises.							New					
03xxx	**Note 2** - The State has discontinued DSL as an access method in contract Amendment 9, therefore there are no costs in the table above for contract years 7 through 10 **Note 3** - The State has discontinued Core Trunk Automatic Failover in contract Amendment 9, therefore there are no costs in the table above for contract years 7 through 10											New

NetTN Catalog of Services Commodity Codes

1-Sep-15

Commodity Code	Service Description	Unit	Initial Contract	Amendment 01	Amendment 02	Amendment 03	Amendment 04	Amendment 05	Amendment 06	Amendment 07	Amendment 08	Amendment 09	Amendment 10
04xxx	**Note 1** - Automatic Protection Switching Service - Automatic Protection Switching (APS) provides 1:1 fiber path protection between the customer premises and the serving Ethernet switch. This is access protection, as opposed to core network protection provided by Core Automatic Trunk Failure (CATF) AT&T installs a protection switch and optical splitter at both the customer premises and Ethernet equipped CO. A secondary fiber path, which can be diversely routed from the primary path, is provisioned between the customer location and the central office. Both fiber paths connect to the protection switch3es installed on each end of the fiber loop. The protection switch connects to a single port on the Metro Ethernet switch. The protection path is used only when a primary path failover occurs. When an outage occurs the protection switch will automatically switch the customer's traffic over to the secondary path. APS only provides fiber route diversity. APS does not provide port diversity, switch diversity, or optical protection. APS is provisioned between the customer's premises and the Ethernet equipped central office. APS is available to a customer with Metro Ethernet Service connection of 10Mbps or higher.							New					
04xxx	APS may be ordered as a structurally diverse transport path (Structural Protection) or a route diverse transport path (Route Protection) Structural Protection APS is defined as the APS secondary facility and the primary Metro Ethernet Connection facility being in separate sheaths that are in separate structures located along the same route. Route Protection APS is defined as the APS secondary facility being in a separate sheath and in an underground, aerial, or direct buried structure that runs along a separate physical path from the facility associated with the primary Metro Ethernet connection. Route protection provides physical route diversity from the Metro Ethernet-equipped central office to the customer's property line or servicing wire center.							New

Mr. Cofer,

Good Day to you. AT&T did not send a response to your mini-bid since Cannon County is not within the AT&T serving area.

Thank-you

Subject: Mini-Bid Request

Ms. Spears,

I was just wondering why you didn't respond to our request for a mini-bid in regard to the Tennessee Education Broadband Consortium (TEBC) State Master Contract?

Regards,

Bryan Cofer

West's Tennessee Code Annotated
Title 12. Public Property, Printing and Contracts
Chapter 3. Public Purchases (Refs & Annos)
Part 10. Local Governments

T. C. A. § 12-3-1001

§ 12-3-1001. Supplies and equipment; purchases and advice by department of general services

Effective: April 1, 2012
Currentness

(a) The department of general services may, upon request, purchase supplies and equipment for any county, city, municipality, special district, school district, or other local governmental unit of the state. The purchases shall be made on the same terms and under the same rules and regulations as now provided for the purchase of supplies and equipment by the department. The cost of any purchase made pursuant to this section shall be borne by the local governmental unit concerned. The department has the power to promulgate all rules and regulations necessary for the operation of this section, subject to the approval of the procurement commission.

(b) It is the intent of this section that the department advise local governments of the benefits to be derived from the use of the purchasing procedures authorized herein. Where any local or private act, charter, or general law requires that a local governmental unit purchase by competitive bidding, the local unit of government may, notwithstanding the local or private act, charter, or general law, purchase, without public advertisement or competitive bidding, under the provisions of contracts or price agreements entered into by the department.

(c) To the extent permitted by federal law or regulations, local governments may make purchases of goods, except motor vehicles, or services included in federal general service administration contracts or other applicable federal open purchase contracts either directly or through the appropriate state department or agency: provided, that no purchase under this section shall be made at a price higher than that which is contained in the contract between the general services administration and the vendor affected.

(d)(1) Except as provided in subdivision (d)(5), where any local or private act, charter, or general law requires that a local governmental unit purchase by competitive bidding, the local unit of government may, notwithstanding the local or private act, charter, or general law, purchase, without public advertisement or competitive bidding, any item from local sources if such item is available for purchase under the provisions of contracts or price agreements entered into by the department, and such item is available at the same or lower cost from such local sources. This subsection (d) shall apply only in cases where the local governmental entity is not permitted to purchase from an existing contract established by the department. Any item purchased locally must be of equal or better specifications than the item under the competitive bid contract.

(2) The legislative body of a county by resolution and a municipality by ordinance may establish and adopt a program to encourage participation in government purchasing programs by minority-owned businesses. Such programs may include set-aside provisions which conform to federal law.

(3) This subsection (d) shall be permissive relative to sellers of motor vehicles.

(4) This subsection (d) shall have no effect unless it is approved by a two-thirds ($^{2}/_{3}$) vote of the local legislative body and such approval is filed with the comptroller of the treasury.

(5) This subsection (d) does not apply in a county having a metropolitan form of government and a population in excess of five hundred thousand (500,000), or in a county having a population in excess of eight hundred thousand (800,000), according to the 1990 federal census or any subsequent federal census.

NOTES OF DECISIONS

Construction and application ½

Federal contracts 2

Housing authorities 3

Purpose of public bidding 1

½ Construction and application

Section 12-3-1001 et seq. applies to local governmental purchases and therefore applies to housing authorities. Op.Atty.Gen. No. 05-170, Nov. 21, 2005, 2005 WL 3521008.

1 Purpose of public bidding

Public bidding statutes are intended to promote public interest by aiding governments in procuring best work or materials for lowest practical price, providing bidders with fair forum for competing for government contracts, and protecting public from its officials' self-dealing, extravagance, and favoritism. T.C.A. § 12-3-1001. Computer Shoppe, Inc. v. State, 1989, 780 S.W.2d 729. Public Contracts 121

2 Federal contracts

A local government may make purchases through federal government service administration (GSA) contracts, but only to the extent permitted by federal law or regulations. Op.Atty.Gen. No. 04-121, July 22, 2004, 2004 WL 1881170.

3 Housing authorities

Sections 12-3-1001 through 12-3-1009 govern purchases by local government and, therefore, apply to a housing authority. Op.Atty.Gen. 05-170, Nov. 21, 2005, 2005 WL 3521008.

T. C. A. § 12-3-1003

§ 12-3-1003. Secondhand articles or equipment; purchases by municipalities

Effective: May 26, 2010
Currentness

(a) Notwithstanding any charter, private act, or general law requirements, any municipality or any county may purchase used or secondhand articles consisting of goods, equipment, materials, supplies, or commodities from any federal, state, or local governmental unit or agency without public advertisement and competitive bidding.

(b) Notwithstanding any charter, private act, or general law requirements, any municipality or any county may purchase used or secondhand articles consisting of goods, equipment, materials, supplies, or commodities from any private individual or entity without public advertisement and competitive bidding as long as the purchasing government documents the general range of value of the purchased item through a listing in a nationally recognized publication or through an appraisal by a licensed appraiser, and the price is not more than five percent (5%) higher than the highest value of the documented range.

West's Tennessee Code Annotated
Title 12. Public Property, Printing and Contracts
Chapter 3. Public Purchases (Refs & Annos)
Part 10. Local Governments

T. C. A. § 12-3-1004

§ 12-3-1004. Purchases for other government units upon request

Effective: March 21, 2012
Currentness

(a) Any municipality, county, utility district, or other local governmental unit of the state may, upon request, purchase supplies, equipment, and services for any other municipality, county, utility district, or other local governmental unit.

(1) The purchases shall be made on the same terms and under the same rules and regulations as regular purchases of the purchasing entity.

(2) The cost of the purchase shall be borne by local government for which the purchase was made.

(3) Where the local government making the request is required to advertise and receive bids, it shall be sufficient for those purposes that the purchasing entity comply only with its own purchasing requirements.

(b)(1) Any local education agency (LEA) may purchase equipment under the same terms of a legal bid initiated by any other LEA in Tennessee.

(2)(A) Any LEA may purchase directly from a vendor the same equipment at the same price and under the same terms as provided in a contract for such equipment entered into by any other LEA.

(B) Any LEA which purchases equipment under this subsection (b) shall directly handle payment, refunds, returns, and any other communications or requirements involved in the purchase of the equipment without involving the LEA which originated the contract. The originating LEA shall have no liability or responsibility for any purchases made by another LEA under a contract which the originating LEA negotiated and consummated.

(c)(1) Any municipality, county, utility district, or other local governmental unit of the state may purchase goods and equipment, where the individual unit price does not exceed ten thousand dollars ($10,000), under the same terms of a legal bid initiated by any other municipality, county, utility district, or other local governmental unit of the state in Tennessee.

(2)(A) Any municipality, county, utility district, or other local governmental unit of the state may purchase directly from a vendor the same goods and equipment, where the individual unit price does not exceed ten thousand dollars ($10,000), at the same price and under the same terms as provided in a contract for such goods and equipment entered into by any other municipality, county, utility district, or other local governmental unit of the state.

(B) Any municipality, county, utility district, or other local governmental unit of the state which purchases goods and equipment under this subsection (c) shall directly handle payment, refunds, returns, and any other communications or requirements involved in the purchase of the goods and equipment without involving the entity which originated the contract. The originating entity shall have no liability or responsibility for any purchases made by another entity under a contract that the originating entity negotiated and consummated.

T. C. A. § 12-3-1005

§ 12-3-1005. Used or surplus personal property; transfer between government units

Effective: August 5, 2011
Currentness

(a) Notwithstanding any other provisions of law, counties, municipalities and metropolitan governments may purchase, trade or receive as a gift, upon approval of the governing bodies involved in the transaction, any used or surplus personal property from another county, municipality, metropolitan government, state government, federal government or any instrumentality of the foregoing, without regard to any laws regarding public advertisement and competitive bidding. Also notwithstanding any other provision of law, any county, municipality, or metropolitan government may by resolution or ordinance of its governing body establish a procedure for the disposition of its surplus personal property to other governmental entities, including, but not limited to, counties, municipalities, metropolitan governments, the state of Tennessee, the federal government, other states or their political subdivisions and the instrumentalities of any of the foregoing, by sale, gift, trade, or barter upon such terms as the governing body may authorize, without regard to any other provisions of law regarding the sale or disposition of used or surplus personal property.

(b) This section shall be construed as supplemental authority for counties, municipalities and metropolitan governments.

T. C. A. § 12-3-1006

§ 12-3-1006. Auction purchases; reports

Currentness

(a) Notwithstanding the requirements of its charter, or any other law, any municipality or county may purchase at any publicly advertised auction new or secondhand articles or equipment or other materials, supplies, commodities and equipment without public advertisement and competitive bidding. The governing body shall establish written procedures governing purchases at publicly advertised auctions.

(b) If a municipality or county purchases any materials, supplies, commodities or equipment at a publicly advertised auction pursuant to subsection (a), then the purchasing official shall report the following information to the governing body of the municipality or county making such purchase:

(1) A description of the materials, supplies, commodities or equipment that was purchased;

(2) The auction where such items were purchased;

(3) The purchase price of such items; and

(4) The vendor of such materials, supplies, commodities or equipment.
