DETERMINATION OF VOIP IMPACT ON ILECS' INTERCARRIER NON-LOCAL TRAFFIC COMPENSATION REVENUE NET OF GAINS IN DSL REVENUE

LINE	DESCRIPTION		REVENUE IMPACT BY YEAR					
			2003	2004	2005	2006	2007	2008
1	Hypothetical Access Revenues on VoIP Replacement Minutes (as if VoIP does not exist): Blended Access Rates		$ 125,843,576	$ 206,294,318	$ 323,320,608	$ 456,276,236	$ 620,262,107	$ 789,675,707
2	Intercarrier Compensation on VoIP Minutes: Reciprocal Compensation Regime	1	$ 3,082,302	$ 5,378,481	$ 8,472,312	$ 12,377,675	$ 17,519,043	$ 23,211,288
3	Intercarrier Compensation on VoIP Minutes: Interstate Access Charge Regime				$ 122,529,146	$ 179,631,245	$ 253,541,656	$ 334,989,035
4	Incremental DSL Revenues due to VoIP Availability: VoIP under Reciprocal Compensation Regime		$ 63,639,047	$ 118,486,980	$ 195,577,600	$ 279,717,276	$ 380,194,062	$ 490,907,658
5	Incremental DSL Revenues due to VoIP Availability: VoIP under Interstate Access Charge Regime				$ 156,462,080	$ 223,773,820	$ 304,131,250	$ 392,726,286

Note (1): Today VoIP is compensated at reciprocal compensation rates.

IMPACT OF COMPENSATION REGIME ON LARGE ILECS' INTERCARRIER NON-LOCAL TRAFFIC COMPENSATION REVENUES: COMPARISON TO WIRELESS

		Actual - Baseline	Projected Access Revenues (2004 - 2008)					
		2003	2004	2005	2006	2007	2008	
6 = calculation	Forecasted Access Revenue Decline (Based on User-Adj Inputs for Access Rates and actual MOU trends)		-7.37%	-10.88%	-10.83%	-10.79%	-10.74%	
7 = calculation	Access Revenues (RBOC + Non-Rural Other ILECs) per ARMIS 43-04	$ 7,435,535,436	$ 6,887,464,933	$ 6,138,227,995	$ 5,473,210,601	$ 4,882,726,030	$ 4,356,215,318	
8 = calculation	Hypothetical ILEC Total Access Revenue: Historical Access and VoIP MOUs at Blended Access Rate (after wireless substitution)	$ 7,561,379,014	$ 7,004,092,628	$ 6,242,115,144	$ 5,565,842,686	$ 4,966,363,274	$ 4,431,976,436	
9	Estimated % of Total Interstate MOUs Attributable to Interstate Wireless Usage in 2003	28.05%						
10	Forecasted Change in Access Revenues lost to Wireless		23.84%	17.56%	13.73%	11.11%	9.19%	
11 = calculation	Estimated Access Revenue Impact on Large ILECs Due To Wireless Substitution for Wireline Toll	$ (4,268,246,485)	$ (5,285,780,554)	$ (6,213,349,702)	$ (7,066,603,847)	$ (7,851,368,791)	$ (8,573,088,742)	
12 = 8 - 11	Hypothetical ILEC Total Access Revenues at Blended Access Rates: As if VoIP and Wireless Do Not Exist	$ 11,829,625,499	$ 12,289,873,182	$ 12,455,464,846	$ 12,632,446,533	$ 12,817,732,065	$ 13,005,065,178	purple line
13 = 7 + 2	Total ILEC Non-Local Intercarrier Compensation Revenue: VoIP under Reciprocal Compensation Regime	$ 7,439,617,738	$ 6,892,843,414	$ 6,146,700,308	$ 5,485,588,276	$ 4,900,245,074	$ 4,379,426,606	red line
14 = 7 + 3	Total ILEC Non-Local Intercarrier Compensation Revenue: VoIP under Interstate Access Charge Regime			$ 6,261,757,141	$ 5,655,841,846	$ 5,136,267,687	$ 4,691,204,353	dashed red line
15 = 13 + 4	Total Non-Local Intercarrier Comp. + Incremental DSL Revenues: VoIP under Recip. Comp. Regime	$ 7,502,256,785	$ 7,011,330,394	$ 6,342,277,908	$ 5,765,305,551	$ 5,280,439,136	$ 4,870,334,443	blue line
16 = 14 + 5	Total Non-Local Intercarrier Comp. + Incremental DSL Revenues: VoIP under Interstate Access Charge Regime			$ 6,417,219,221	$ 5,879,615,666	$ 5,440,397,839	$ 5,085,930,639	dashed blue line
17 = 14 - 13	Impact of Shift of VoIP Traffic to Interstate Regime: Total ILEC Non-Local Intercarrier Comp. Revenue Impact (Incl. VoIP)			$ 114,956,833	$ 170,253,538	$ 235,921,612	$ 311,777,747	
18 = 17 / 13				1.8%	2.8%	4.8%	7.1%	
19 = 16 - 15	Impact of Shift of VoIP Traffic to Interstate Regime: Total Non-Local Intercarrier Comp. + Incremental DSL Revenues Impact (Incl. VoIP)			$ 74,941,313	$ 113,910,758	$ 159,958,703	$ 215,596,196	
20 = 19 / 16				1.2%	1.9%	3.0%	4.2%	

Note (2): The change in VoIP traffic intercarrier compensation when interstate access rates are applied vs. reciprocal compensation rates.

Note (3): The sum of the change in VoIP traffic intercarrier compensation and the change in incremental DSL revenue attributable to VoIP stimulation when VoIP traffic pays interstate access rates. Incremental DSL revenue is suppressed due to suppression of VoIP subscribership when higher prices must be charged to cover cost of interstate access rates.

	2003	2004	2005	2006	2007	2008
Baseline 2003 Total RBOC and Other Non-Rural ILEC Switched AMOU	673,839,529,762

CALL TYPES

A: ***PSTN to IP*** **call, locally dialed** (includes *de minimis* POTS-to-POTS), interconnection point within same local calling area as originating caller (originating and terminating caller in different local calling areas)

A1: Terminates on non-ILEC IP - *See PowerPoint DIAGRAM 5*

A2: Terminates on ILEC IP - *See PowerPoint DIAGRAM 6*

B: ***IP to PSTN*** *call*, interconnection point within same local calling area as terminating caller (originating and terminating caller in different local calling areas)

B1: Originates on non-ILEC IP - *See PowerPoint DIAGRAM 3*

B2: Originates on ILEC IP - *See PowerPoint DIAGRAM 4*

Note 1: A value of $0 represents no payments or revenue; it is not meant to suggest that some amount of internal, incremental cost is not experienced by either the originating or terminating carrier. Instead, it is simply meant to represent that no payment is made nor revenue received by/to another carrier.

Note 2: For the most part, these calls are not considered "toll" calls today and access is not paid. This analysis is simply meant to show the disparate revenue/payment experienced by the ILEC given potentially different treatment (i.e., toll versus other).

Note 3: Assume zero call set up time (CMOU = TMOU on individual call).

VoIP Revenue Impact Due to Carrier Regime

	2003	2004	2005	2006	2007	2008
Probability "Locally Dialed" Call to VoIP is Terminated "Non-locally"	20%	20%	20%	20%	20%	20%
Price Stimulation of VoIP Originating Traffic When VoIP is under **RECIPROCAL COMPENSATION** regime	1.10	1.10	1.10	1.10	1.10	1.10
Price Stimulation of VoIP Originating Traffic When VoIP is under **INTERSTATE ACCESS** regime			1.05	1.05	1.05	1.05
Adj. of Terminating Volumes: VoIP customer does not receive as many calls as pre-VoIP (incoming calls are still directed to the customer's ILEC line: Ex.2-line household/business) (factor)	0.80	0.80	0.80	0.80	0.80	0.80

Traffic Type[1]	2003	2004	2005	2006	2007	2008
Terminating Volumes associated with lines substituted by Cable VoIP lines; Probability "Locally Dialed" Call to VoIP is Terminated "Non-locally"	900,682,648	1,486,899,886	2,211,104,900	3,201,484,648	4,863,957,134	6,090,130,859
Terminating Volumes associated with Cable VoIP lines; Probability "Locally Dialed" Call to VoIP is Terminated "Non-locally" lines; Adj. of Terminating Volumes	720,530,038	1,191,119,749	1,769,683,920	2,561,187,718	3,891,165,707	4,872,104,687

Note 1: A value of $0 represents no payments or revenue; it is not meant to suggest that some amount of internal, incremental cost is not experienced by either the originating or terminating carrier. Instead, it is simply meant to represent that no payment is made nor revenue received by/to another carrier.

Note 2: For the most part, these calls are not considered "toll" calls today and access is not paid. This analysis is simply meant to show the disparate revenue/payment experienced by the ILEC given potentially different treatment (i.e., toll versus other).

Note 3: Assume zero call set up time (OMOU = TMOU on individual call).
