Dear Sir / Madam;

What are you thinking about, when you want to subject some one trying to read, to 100 people screaming into their cell phones on planes. I think it is a terrible idea to allow cell phone use on planes. Most conversations are not that important and can wait until the plane lands.

It would be torture for some one wanting peace & quiet to be confine in a metal tube at 35,000 ft. force to listen to 100 cell phone conversations.

Sincerely
Judy Weston

Dear Sir/Madam:

My wife and I are retired. We make many trips each year on airplanes.

Please - no cell phones. It would be a living hell to fly from San Diego to New York, if a hundred or more passengers were talking on their cell phones.

Please - NO to cell phones on flights.

Sincerely yours,

Ron Erickson

No cell phones on airplanes please!
It's annoying enough in the airport [illegible] area to hear phone conversations such as "It's 10 minutes to boarding" or "Now I'm 7th in line to boarding." I've even heard "What's for dinner?"

If cell phone use is permitted, I've got my own solution – singing. My first thought was to sing opera but then I had the most marvelous solution.

Pretend I'm a 2nd grader on a school bus going on a field trip. Start by singing "Old MacDonald Had a Farm" then change to "100 bottles of beer on the wall." Next thing you know – other annoyed passengers will join me. I love it.

Sincerely yours
Nancy A. [illegible]

Gentlemen!

Please! do not permit use of cell phones in airplanes.

Flying is stressful as it is, let alone sitting next to a person talking loudly for four hours.

I do not want to hear their personal business

PLEASE PLEASE

Do not allow cell phones to be used on phones.

I travel several times a year to Las Vegas. enjoy having hours to read in peace. I can imagin over 200 people talking on phones. Let us [illegible] in peace.

Ann Hildesley
