Please do not allow the use of cell phones on airplanes. I can't imagine being seated next to someone chatting, or worse, arguing on their cell as I am trying to sleep or read. NO!

Sirs,

Please, please, please do not allow phones on planes. Can you imagine being stuck between two phone addicts on a three (or more) hour flight? Not only are they annoying, they usually seem to have to converse in a louder than usual voice.

Its bad enough having to listen to inane conversation between flights — at least there, one can get up & put some distance between you & the gabber. — What can one do on a plane???

I beg of you, let a plane ride be a haven from those with those hideous growths on their ears. (oops I mean phones)
