Hi

DOCKET FILE COPY ORIGINAL

It is very important to me that cell phones are not allowed on airplanes. The electro magnetic waves causes an immediate migraine within minutes. I would not be able to travel at all by airplane & I take trips 3 times a year. I had a car accident which caused structural damage to my neck & skull + thus the sensitivity to cell phones. I have spoken to other people who have suffered the same thing & these people have lots of migraines & cell phones can be a trigger.

Additionally the noise & psychological energy from people constantly talking nearby would be anxiety provoking especially on long trips.

Thank you for your close attention to this matter

Sincerely

Sudi Scull
