Subject: Comment regarding WT Docket 05-235

From: P. Rasmussen, 213 College Park Dr., Moon Twp., PA 15108

Please retain a Morse code requirement for at least the Amateur Extra Class license.

If you do decide to eliminate the Morse requirement for other amateur licenses, why not ease into the process by allowing the new "no code general class licensees" initially only those portions of the bands that were general class portions when the Advanced Class license was still being issued.

After a few years, if there are no significant problems in the "no code general" segments, then allow the "no code generals" to also use the old Advanced Class frequencies as well.
