Washington, DC 20554

Dear FCC:

I support the petition to the FCC for captioned telephone service mandated by the FCC. See docket # 03-123.

I have hearing loss and although I can still use the telephone, I have friends whose hearing loss is such that they cannot. I do not call them using other telephone relay services. They have the same problem with businesses — making an appointment, using the telephone in their jobs or getting emergency assistance from 911.

Captioned telephone service is effective and as Title IV of the Americans with Disabilities Act requires, is functionally equivalent to telephone access by those who can hear and speak.

If I ever need captioned telephone service, I hope it is available everywhere.

Yours truly,
(Mrs.) Natalie Robertson
