DOCKET FILE COPY ORIGINAL

To Whom It May Concern:

This letter is in reference to docket #03-123, and is in support of the petition for captioned telephone services being mandated by the ACC.

My uncle is profoundly deaf. Reasonable access to this technology is necessary for him. It enables him to communicate with his family, his doctors, service providers — the list is long!

The same would be true for all people living under the same circumstances. Their quality of life is important. Please help him, and them.

Sincerely,

Kathleen Rogers
