Dear Persons:

I sometimes watch Access Tucson, Pima College TV Channels and Tucson City channels as part of my basic cable package from Cox Cable in Tucson, AZ.

These provide some of the best television available and provide an extremely important local service. These types of channels should be made to multiply and increase. It is true that some programing is poor, very poor and even very offensive. However that is a small price to pay for our freedoms and our democratic system. It is also true that these channels nurture genius and innovation.

Please find ways to nurture this diverse form of TV programming and availability.
