- Introduction
- A Brief History of Globalstar
- Globalstar's future heavily depends on how the FCC resolves pending spectrum issues
    - Decline to require any further L-band sharing with Iridium
    - Reinstate Globalstar's 2 GHz license and afford Globalstar access to a portion of the 2 GHz MSS spectrum
    - Favorable consideration of Globalstar's petition to expand its ATC authority to encompass all of its assigned spectrum.
