

***The FCC is not a health organization and should not be in a position to make decisions that have the potential to affect health. Thousands of published, peer-reviewed studies by independent scientists have demonstrated harm from exposure to radio-frequency (RF) microwave radiation. Serious human health problems include reproductive harm, neurological problems and cancer. Children and other vulnerable populations are particularly at risk.***

***Yet the FCC is considering changing the OTARD rule, which would put more people, pets and wildlife at health risk from the close proximity of antennas in our neighborhoods.***

***This would be an egregious assault on the human, health and environmental rights of those who do not give their consent to be irradiated by 5G antennas.***

***Therefore the OTARD rule must not be changed. We must preserve both the local & state rights of citizens who do not wish to be exposed to an untested and unsafe technology.***

***Thank you.***
