Chairman Kevin Martin
Federal Communications Commission
445 12th Street, SW
Room #8B-201
Washington, DC 20544

Dear Chairman Martin,

I strongly urge you to support the proposal by M2Z Networks outlined in Docket # 07-16 to provide fast, free, family-friendly broadband access to millions of Americans. Expanding access to broadband services will help our businesses stay competitive, our students achieve in school, and provide reliable access to a wealth of information for all citizens.

Access to broadband internet is as commonplace in many parts of our country and around the world as access to electricity. Unfortunately, tens of millions of our citizens are overlooked by the few companies who provide service. These Americans either live in rural communities or simply do not have the financial resources to afford the high monthly cost of broadband.

M2Z Networks hopes to bridge this digital divide between those with broadband access and those without. Small and independent businesses will see vast productivity gains with the tools and services on the internet. Students and teachers will have access to immense amounts of new information, and families with limited resources will no longer have to bear the high costs of broadband access. Additionally, by creating a system that will cover 95% of Americans within the next 10 years, M2Z will relieve local and municipal governments of the burden of providing broadband access to smaller communities.

Secretary Dortch, I sincerely hope that you and your colleagues will support this proposal and allow M2Z Networks to provide fast, free, family-friendly broadband internet service to all Americans.

Sincerely yours,

Tim Moore
