Notes:

(1) Overall HIT or MISS is determined by the Yes or No results for two out of the last three months. Two or more results of Yes = HIT; two or more results of No = MISS. A dash means the result is neither a hit nor a miss and is not counted.

(2) A Critical Z Value of 1.68 is now being used for counting hits and misses on all HOMR reports, regardless of the number of measures reported. This is the lowest possible critical Z value on the table. Remedy payment calculations may use a slightly higher critical Z.

(3) Beginning with August 2000 data, T2A Version 1.7 rules, some measures no longer use the critical Z allowance to determine compliance. The column headed "Z" shows "Y" if the critical Z is allowed and "N" if it is not allowed.
Measures marked "N" for "critical Z not allowed" will have a z-score of either 0 or 2. (0=Hit, 2=Miss) All measures involved have benchmarks rather than parity comparisons.

(4) PM 5, 56, 56.1, 65 and 67 which are FCC 20 measures 1, 6c, 6c.1, 12c and 13c are reported to the FCC for version 1.6 only. However, on the HOMR we show version 1.7 for these measures. So the disaggregations reported to the FCC may differ slightly.
