Verizon Virginia Inc.

In Hearing Record Request

CC Docket Nos. 00-218, 00-249 and 00-251

FCC STAFF REQUEST OF:	Verizon Virginia (Transcript p. 3995)
DATED:	October 25, 2001
REQUEST:	Please provide, for each state within the Verizon East footprint (the old Bell Atlantic and NYNEX territories), the existing state-approved daily usage file charge.
RESPONSE:	Attached are daily usage file charges for the Verizon East operating companies.

"daily usage file rates.doc"

VZ VA Record Request #16

Verizon Daily Usage File Rates

Rate Element	Delaware	District of Columbia	Maryland	New Jersey	Pennsylvania	Virginia	West Virginia

VZ - VA
Exhibit No. 197

Verizon Virginia Inc.

In Hearing Record Request

CC Docket Nos. 00-218, 00-249 and 00-251

FCC STAFF REQUEST OF:	Verizon Virginia (Transcript p. 4559)
DATED:	October 30, 2001
REQUEST:	Please provide the number of loops and the percentage of loops in Virginia that exceed 12,000 feet.
RESPONSE:	The exact number of loops that exceed 12 kft. in total loop length (i.e., feeder length plus distribution length) cannot be determined, but as discussed at the hearing, the number of loops in UAAs where the Transmission Level Point (TLP) (feeder plus distribution length for the longest loop in the UAA) exceeds 12 kft. can be determined. Of the 3,657,000 lines used as input to the Verizon Virginia cost studies, 63% or 2,315,787 are in UAAs where the TLP exceeds 12 kft. This figure includes copper-fed loops and fiber-fed loops. In the loop cost studies, Verizon VA set a maximum copper length of 12 kft beyond the RT for loops beyond the copper/fiber breakpoint.

VZ VA Record Request #17

Verizon Virginia Inc.

In Hearing Record Request

CC Docket Nos. 00-218, 00-249 and 00-251

FCC STAFF REQUEST OF:	Verizon Virginia (Transcript p. 4723)
DATED:	October 31, 2001
REQUEST:	Please provide the data underlying the work times survey used to establish Verizon's proposed nonrecurring rates.
RESPONSE:	The enclosed CD contains copies of the response forms submitted by Verizon personnel in connection with the work time survey.

VZ VA Record Request #18

Verizon Virginia Inc.

In Hearing Record Request

CC Docket Nos. 00-218, 00-249 and 00-251

FCC STAFF REQUEST OF: Verizon Virginia (Transcript p. 4873)

DATED: November 1, 2001

REQUEST: How can the Commission ascertain whether, in fact, nonrecurring retail charges recover nonrecurring retail costs?

RESPONSE: A precise analysis of this question is difficult because there is little in the way of retail cost studies that can be used to make a reasonable comparison between current non-recurring costs and revenues. Moreover, Verizon VA notes that whether a particular cost is recovered through a non-recurring *rate* is independent of whether it is in fact a non-recurring *cost*.

However, given the issue at hand, the Company believes that it would be more relevant to compare an estimate of the wholesale non-recurring costs and the offset made to the Annual Costs Factors ("ACFs"). In order to make such a comparison, Verizon has taken the wholesale unit costs from its NRCM presented in this proceeding and multiplied those units by the retail service volumes in 1999 to determine the expected costs of non-recurring activities in 1999. These non-recurring costs (see "VZVA Record Request_19.xls) total $58m. Verizon then compared that result with the offset taken by Verizon VA to expense ($98m) in the development of the annual cost factors. In this manner, Verizon demonstrates that the offset far exceeded the non-recurring costs for the base period. Furthermore, the matter of waivers applied by Verizon VA in 1999 is mooted by non-recurring revenue offsets that the company took in developing its ACFs. The offsets were in two categories. First, for the customer-facing functions, Verizon off set was $76,285,118 in the 6623 Account (Customer Services and Billing) in the development of the marketing factor. An additional $21,776,765 reduction was taken to the expenses in the accounts used to develop the network factor. Please see the attached file that summarizes this analysis and the supporting attachments.

22	Offset in Excess of Cost	L21 - L20	$	39,999,782

ITEM: AT&T 3-26 What is the average number of lines that are involved in a hot cut order? Please provide all information regarding the method used to calculate the average (e.g. by unique end user and by unique end user location). Does Verizon have any basis to make the statement that hot cut orders for three or less lines are placed for customers having a total of three or less lines (as Verizon applies the definition of customer for application of the ULS limitation)? If so, describe how Verizon made this determination. Limiting consideration to only instances where a hot cut has occurred, provide any data that supports Verizon's conclusions regarding how many lines in total and at a single location a particular customer might have that experienced a hot cut.

REPLY: Subject to its previously filed Objections and without waiver of same, Verizon Virginia states as follows:

The average number of lines involved in a hot-cut order is 1.58. (See attached spreadsheet). The method used to calculate the average is to divide the number of lines migrated on a hot-cut for the period specified on the spreadsheet by the number of service orders for the same period. Verizon does not understand the context of the second question referring to "three or less lines." Nor is Verizon familiar with the term "ULS limitation."
