Re: *Improving Public Safety Communications in the 800 MHz Band*
WT Docket No. 02-55 and ET Docket Nos. 00-258 and 95-18

Dear Ms. Dortch:

Sprint Nextel and the broadcast community are pleased to report further substantial progress in the broadcast auxiliary service (BAS) transition. This bimonthly progress report responds to the Commission's request for additional information about the transition of BAS licensees to frequencies above 2025 MHz.[1]

The BAS licensees and Sprint Nextel have now successfully relocated BAS operations in a total of 161 markets covering more than 83 percent of the United States population, or more than 254 million Americans. Moreover, 98 percent of all replacement BAS equipment has been delivered, and 96 percent of BAS operators have received all of the control systems, mobile and fixed transmitters, connectors, cabling, transmission lines, antennas, decoders, modulators, central receive antennas, and other elements of BAS systems that they need to relocate.

Following the successful relocation of Philadelphia, PA, San Francisco, CA and many surrounding markets, the territory cleared of incumbent BAS systems totals more than 2.6 million square miles extending through all of California, the entire Eastern Seaboard, all of the Gulf Coast, and most of the Southwest, Great Lakes, and Great Plains regions.[2]

In the last sixty days, Sprint Nextel and the broadcast community have transitioned 15 Designated Market Areas (DMAs) of all sizes across the country. Transitioned markets include: Lafayette, LA; Jonesboro, AR; San Francisco-Oakland-San Jose, CA; Sacramento-Stockton-Modesto, CA; Monterey-Salinas, CA; Philadelphia, PA; Syracuse, NY; Salisbury, MD; Sioux

[1] *Improving Public Safety Communications in the 800 MHz Band,* Memorandum Opinion and Order, 23 FCC Rcd. 4393, ¶ 44 (2008) (*BAS Extension Order*); Report and Order and Order and Further Notice of Proposed Rulemaking, 24 FCC Rcd. 7904, ¶ 45 (2009) (*BAS Report and Order*).

[2] As a result, both Mobile Satellite Service licensees that occupy the majority of the spectrum cleared of BAS incumbents have access to their 2 GHz spectrum assignments over a vast portion of the nation without risk of interference from or to BAS operations. *See BAS Report and Order*, 24 FCC Rcd. at ¶ 45 (holding that "MSS entrants are able to begin operations [in cleared BAS market areas] when they are ready to do so").

Falls, SD; Fargo-Valley City, ND; Rapid City, SD; Casper-Riverton, WY; Minneapolis-St. Paul; South Bend-Elkhart, IN; and Twin Falls, ID.

The extensive list of BAS equipment involved in the relocation of four major markets during this period included:

	San Francisco Oakland San Jose (DMA No. 5)	Sacramento Stockton Modesto (DMA No. 19)	Minneapolis St. Paul (DMA No. 14)	Philadelphia (DMA No. 4)	Total
Mobile Trucks	106	30	23	76	235
Central Receive Sites	52	31	16	56	155
Fixed Links	2	3	11	21	37
Studio Master Control	14	8	6	16	40
Helicopters	5	2	4	7	20
Portable Transmitters	65	33	52	73	219

More detailed information about the parties' progress appears in the appendices to this report. Appendix A provides a graphical overview of the significant nationwide progress that the broadcasters and Sprint Nextel have made across the country. Appendix B identifies the transition status of each eligible primary BAS operator in the United States.[3] Appendix C provides a copy of the planned and actual transitions for each of the nation's DMAs. Appendix D identifies each eligible primary BAS operator that has not entered into a Frequency Relocation Agreement (FRA) and describes why the FRA has not been signed.

Appendix E identifies the multi-system DMAs where issues affecting a single BAS operator prevent transition of a DMA in which every other operator in the market is ready, willing, and able to transition to the new band plan. Ten markets – or 19% of all unrelocated markets – are ready to relocate but for one BAS operator in the market. In these cases, either the BAS systems installers have not completed work at the station or the station licensee has not applied for or received a modified license from the FCC. The ten markets where all but one BAS operator is prepared to transition are: Burlington, VT-Plattsburgh, NY; Traverse City-Cadillac, MI; Seattle-Tacoma, WA; Wheeling, WV-Steubenville, OH; Bluefield-Beckley-Oak Hill, WV; Idaho Falls-Pocatello, ID; Tri-Cities, TN-VA; Cincinnati, OH; Columbia-Jefferson City, MO, and Quincy, IL-Hannibal, MO-Keokuk, IA.

Two additional DMAs – Lafayette, IN and Springfield, MO – are completely installed. These markets are ready and able to transition, but are waiting on an adjacent market to relocate to ensure continuous news coverage throughout the region and to prevent harmful

[3] The percentage of markets at different stages of the transition shown in Appendix B is calculated by dividing the number of Frequency Relocation Agreements (FRAs) by 965, which is the total number of primary-status FRAs involved in the relocation. Calculating percentages based on population, stations, or DMAs creates slight differences from the FRA-level view presented in Appendix B.

interference to the neighboring market. In addition, as discussed in greater detail below, the Charleston-Huntington, WV and Clarksburg-Weston, WV DMAs are also completely installed and expected to relocate in early December. Together, the foregoing 14 markets constitute 27% of all markets remaining to be relocated.

Working together, the BAS licensees and Sprint Nextel have overcome many of the negotiation, manufacturing, integration, installation, testing, licensing, and scheduling issues that had previously prevented transition in several market areas. Some challenges remain, however, and are extensive or persistent enough to warrant mention here.

Albuquerque-Santa Fe, NM (DMA No. 49). Since the last report, considerable progress has been made toward execution of FRAs with the three New Mexico BAS licensees listed in Appendix D. The three New Mexico public television stations – KNME-TV, Albuquerque, NM; KENW-TV, Portales, NM; and KRWG-TV, Las Cruces, NM – have provided Sprint Nextel with most of the cost estimates or "quote packages" necessary to replace all of their 2 GHz BAS equipment, and Sprint Nextel has identified the additional information needed. To execute FRAs with these three stations, Sprint Nextel must generate five separate sets of FRA Schedules. Sprint Nextel has prepared two of those sets and sent them to the stations for review. After Sprint Nextel has received the additional information needed and completed its review, then it can generate the three remaining sets of FRA Schedules. Given the considerable amount of time necessary to reach this stage of the relocation process, however, it remains uncertain when the New Mexico stations will receive equipment and when DMA transition will occur.

Burlington, VT-Plattsburgh, NY (DMA No. 91). The relocation of this market is awaiting FCC grant of an application for modification of BAS license KB96836. Mt. Mansfield Television, Inc. is the licensee of KB96836 and uses the license to support WCAX-TV, Burlington, Vermont. The Burlington, VT-Plattsburgh, NY DMA was originally scheduled to relocate in October 2008; however, relocation was delayed while WCAX-TV made additional equipment changes to reconfigure its BAS system. In July 2009, WCAX-TV submitted its BAS modification application, but the FCC returned the application September 1, 2009 because, among other things, WCAX-TV did not meet certain requirements necessary to secure Canadian frequency coordination. When the incumbent refiled the application, it indicated that Canadian frequency coordination was not necessary. The FCC, however, required Canadian coordination and sent the application to Canada. On November 7, 2009, the FCC again returned the application because Canada objected to the use of certain frequencies and anticipated harmful interference. The incumbent will not agree to relocate to the new frequencies on a temporary or secondary basis because it says that it is concerned that one or both of the adjacent-channel MSS licensees, neither of which are currently serving customers, may interfere with its BAS operations. With WCAX-TV declining to relocate until the FCC grants its BAS modification application, transition of the Burlington, VT-Plattsburgh, NY DMA has been postponed. As of today, no alternative date for transition has been established.

West Virginia Markets (DMA Nos. 59, 140, 148 and 164). West Virginia Media Holdings, LLC ("WVMH") is the licensee of four TV stations in the state of West Virginia – WOWK-TV, Huntington (Charleston-Huntington DMA No. 59); WTRF-TV, Wheeling (Wheeling-Steubenville DMA No. 140); WVNS-TV, Lewisburg (Bluefield-Beckley-Oak Hill DMA No. 148); and WBOY-TV, Clarksburg (Clarksburg-Weston DMA No. 164). All four DMAs were scheduled to relocate in October 2009; however, WVMH did not file modification applications for its BAS facilities in time to permit an October relocation. The incumbent BAS operators did not wish to relocate during the November sweeps period, which ended November 25. At this point, WVMH

has filed most of its BAS modification applications. Sprint Nextel currently projects the relocation of the four DMAs will occur during the first week of December.

*** * * ***

Looking ahead, Sprint Nextel anticipates that several factors could affect the small number of markets that remain to be relocated between now and February 2010. These factors could, as a result, delay some of those relocations until May or June 2010, and possibly later. These factors include: (a) application and processing delays for new or modified BAS licenses; (b) winter weather conditions; (c) manufacturer limitations; (d) installer constraints; and (e) a handful of especially complex and difficult relocations.

Licensing Delays. Many BAS operations require FCC licensing and, in some cases, international coordination. In cases where international coordination is required, no operations on the new frequencies are possible until the coordination process is complete. Even where international coordination is not required, some BAS operators are not willing to operate on a secondary or temporary basis pending grant of a BAS license. Depending on the need for international coordination or, in the absence of an international coordination concern, a licensee's willingness to operate on a new frequency on a secondary basis pending grant of a BAS license modification, delays in applying for or receiving a modified license could delay transitions in some of the remaining markets.

Winter Weather. In many of the areas that remain to be transitioned, transmitter sites may soon become difficult or impossible to reach because of low temperatures, ice, snow, high winds and other extreme conditions. This week's weather forecast for Bismarck, ND, for example, calls for below freezing temperatures and snow throughout the week with blustery winds of up to 36 miles per hour on some days. While not all as-yet untransitioned DMAs face weather conditions as extreme as those in Bismarck, winter weather conditions will limit the tower crews' ability to reach some facilities and, once there, low temperatures, wind conditions and ice build-up could constrain, and perhaps prevent, the installation of new equipment as quickly as might otherwise occur if the weather were more favorable.

Manufacturer Limitations. Now that almost 98% of equipment has been delivered, manufacturers have turned their attention to post-relocation business activities. Several of the manufacturers that added employees to accommodate the BAS transition have started to downsize, which has caused delays in delivering the final equipment orders and in correcting manufacturing faults. In addition, four percent of all BAS operators do not yet have all their equipment. Delays in delivering critical equipment may push installations into December and January, perhaps February or later. Moreover, system compatibility problems persist, and quality control issues exist as well. "It's rare that we have a flawless install," one vendor has said. The limited capacity of modern manufacturing to produce flawless equipment in high-volumes in a short period of time will thus affect when additional markets are relocated.

Installer Constraints. Equipment integrators and installation vendors are in high demand. Current scheduling commitments extend through January, and additional incumbents must still be scheduled. Even in good weather conditions, scheduled commitment dates sometimes slip, which delays subsequent installations. Those markets affected by winter weather conditions could experience further delays, possibly until spring, for installations scheduled for December and January. Despite extensive training and compliance with all Occupational Health and Safety Administration standards and regulations, tower climbing and installation remains one of the country's most dangerous professions. The judgment of whether or not to climb under challenging conditions rests with each crew leader. If a crew leader

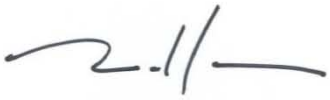
decides that climbing is not feasible or too dangerous, then transition for both the DMA and follow-on markets will be affected because there are few, if any, “back up” tower climbers that can make up the productive installation time of an experienced crew.

System Complexity. The interdependent relationship among facilities in certain areas may threaten timely relocation because a challenge with a single device in a single location could prevent the entire BAS cluster from relocating. For example, the State of Oregon, which contains four DMAs – Portland (No. 23), Eugene (No. 122), Medford-Klamath Falls (No. 142) and Bend (No. 200) – has elaborate fixed-link microwave systems that connect primary and satellite TV stations, TV translators, low power TV stations and cable head ends across very difficult terrain. Due to the interconnected nature of these facilities, successful installation must occur at every BAS facility throughout the entire state before any one market can relocate.

*** * * ***

As documented in the attached report, more than 83 percent of the United States’ population lives in areas cleared of BAS incumbents, and many additional markets are scheduled to transition in the very near future. While circumstances beyond the control of Sprint Nextel and many of the incumbents may require some markets to be relocated after February 2010, Sprint Nextel and the broadcast community continue to make steady progress toward nationwide clearing of fixed and mobile BAS systems below 2025 MHz. If you have any questions concerning this report, please contact me.

Sincerely,



Trey Hanbury, Esq.
Director, Sprint Nextel Corporation
